AIR CONDITIONERS LINEUP

FUJITSU GENERAL AIR CONDITIONING (UK) LIMITED

FUJITSU GENERAL Way

Our Mission

Living together for our future

Through innovation and technology, we deliver a brighter future with peace of mind to our customers and societies around the world.

Our Philosophy

Act Spontaneously

We embrace new challenges by investing in ourselves for personal growth, and through continuous creativity with a spontaneous attitude.

Develop Our Team

We respect and value our people, and optimise their abilities through fostering culture and diversity, and utilising a collaborative effort focused on communication.

Value Integrity

To achieve our goals, we always act with integrity and shared ethics.

The background of the page features a wide-angle photograph of a rural landscape. In the foreground, there is a lush green field, likely a crop like wheat or barley. The terrain is slightly undulating. Above the horizon, the sky is a vibrant blue, dotted with wispy, white, cirrus-like clouds.

for Future

Future

Green Aspect for Refrigerant

We provide reliable technologies approved and cultivated in the European market where environmentally friendly regulations are very strict. We are working on making environmentally friendly products we can be proud of in the future in our research, development and manufacturing processes.

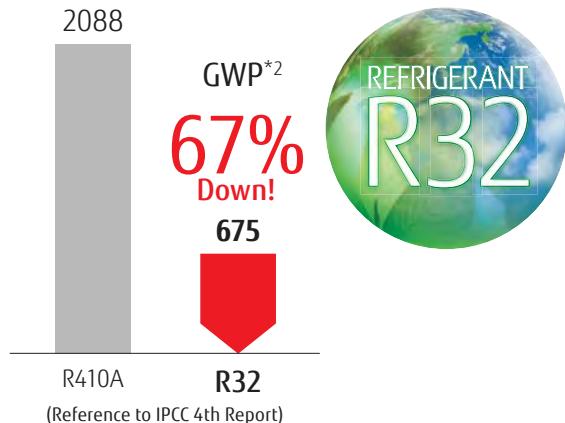

New refrigerant R32 for the reduction of the global warming potential.

- The ozone-depleting potential (ODP^{*1}) is **0!**
- Environmental properties
- Performance
- Economic efficiency

***1 ODP (Ozone-Depleting Potential):** This is the relative value indicating the impact of ozone-depleting substances per unit weight if they are emitted into the atmosphere when CFC-11 (trichlorofluoromethane, CCl₃F) is considered to be 1.0.

***2 GWP (Global-Warming Potential):** This is the number that indicates the global warming capability of other greenhouse gases with reference to carbon dioxide as the standard. This is the estimated integration value, which is indicated as a ratio to CO₂, of the radiant energy given to the earth (i.e., impact on global warming).

Our Pioneering Efforts Make A Green Future

Approach to new energy efficiency standard Fujitsu General following the EU climate action plan 20/20/20 by 2020.

20% Less Primary Energy Use

Fujitsu General products with high efficiency and therefore low electricity

20% Less CO₂ Emissions

Fujitsu General products sharply following the F-gas regulation 517/2014

20% Share of Renewable Energy

Fujitsu General promoting air sourced heat pumps as renewable energy source heating systems

New Energy Labelling Requirement 626/2011/EU

Our Air Conditioners have reached the "**Class A**" ranking, the highest energy efficiency level that is now shown on energy labels in Europe.

ENERG		Y		IA	
FJUTSU		AOYG		LFCASYHG	
SEER		SCOP		SEER	SCOP
A***	SEER > 8.50	A***	SCOP ≥ 5.10		
A**	6.10 ≤ SEER < 8.50	A**	4.60 ≤ SCOP < 5.10		
A	5.60 ≤ SEER < 6.10	A	4.00 ≤ SCOP < 4.60		
B	5.10 ≤ SEER < 5.60	B	3.40 ≤ SCOP < 4.00		
C	4.60 ≤ SEER < 5.10	C	3.10 ≤ SCOP < 3.40		
D	4.10 ≤ SEER < 4.60	D	2.80 ≤ SCOP < 3.10		
E	3.60 ≤ SEER < 4.10	E	2.50 ≤ SCOP < 2.80		
F	3.10 ≤ SEER < 3.60	F	2.20 ≤ SCOP < 2.50		
G	SEER < 2.60	G	SCOP < 1.90		

Less Space

Installation Flexibility

The top-class compact dimensions of outdoor units from 8 to 18 HP capacity, keeping the building appearance as it is by improvement on the installation flexibility.

Installation Space

Weight (18HP model)

VRF System outdoor units **AIRSTAGE J-IVL**

Less Refrigerant

Design with small refrigerant

Significantly reduce the system refrigerant volume by new small indoor unit, piping design and optimised heat exchanger volume design.

System Refrigerant Volume

The minimised refrigerant volume may allow the application to prevent the installation of a refrigerant leak detector required under EN 378.

Current model 20.5 kg
↓
16.8 kg^{*3}

-18%

Less Noise

Top Class Low Operating Sound

Top class low operating sound is achieved. Highly suited to densely populated areas thanks to their low operating sound.

Sound Power Level (8HP model)

^{*1}: J-IV models is compared with V Series outdoor unit 14/16/18 HP models. ^{*2}: J-IV 18 HP model is compared with V-IV 18 HP models. ^{*3}: Ex) In the case of 30 indoor units connection in 1 system (Outdoor unit: 12 HP, Indoor unit: 1 kW × 30, Total piping length: 277.5 m) • J-IV model is compared with current models. ^{*4}: J-IVL 8 HP model is compared with V Series outdoor unit 8 HP model.

Design

Beautiful Space Design

Fujitsu General provides the well-designed model with special texture for Europe, the design-award-winning product suitable for the room interiors, and the various designed Cassette type matched to office space. We also have the lineup with elegant design models such as the Ceiling model with beautiful curved surface.

Wall Mounted

KE Designer Series

What we aimed for is a well-designed air conditioner especially for Europe. It is different from the Japanese one, harmonised with its surroundings. it envelops a comfortable elegant feeling in the room. Light-elegant and three-dimensional expression composed of curved surface looks beautiful from anywhere.

CMF: Colour Material Finish

The texture of the front panel expresses craftsmanship existing in Europe. The texture changes the expression by the changing light of the day.

Design Award winning products

Quick Service & Maintenance

If trouble should occur in a unit or system, abundant support tools such as trouble code display at the product, Service Tool that allows checking of the detailed status of the entire system, and remote monitoring tool that uses the internet, etc. support quick service and maintenance anywhere and at any time.

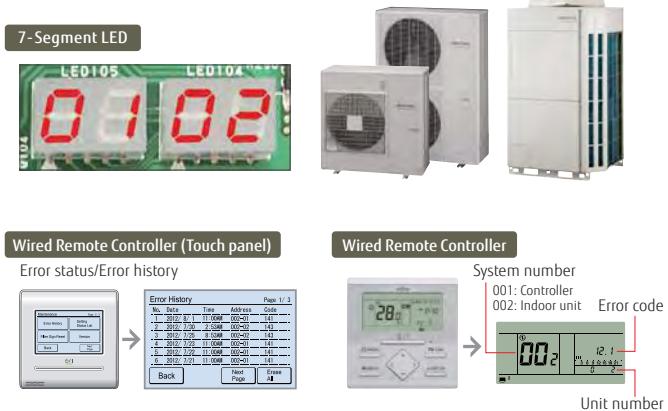

Easy maintenance & monitoring

Design for easy maintenance

The air conditioner operating status and error status of that detailed are displayed at the 7-segment of the outdoor unit PCB or on the remote controller screen. The unit status can be checked rapidly allowing for a quick response.

- Operation mode status
- Discharge temperature/Pressure status
- Compressor operation indication
- Address/Type/Number of outdoor unit
- Error code.

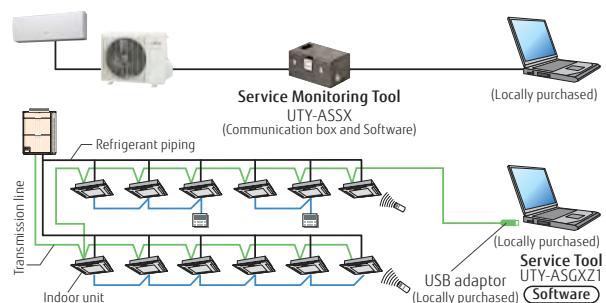

Error diagnosis by Service Tool

The unit status details from single split models to VRF system can be checked on a PC screen by connecting the Service Tool.

Quick countermeasures can be taken

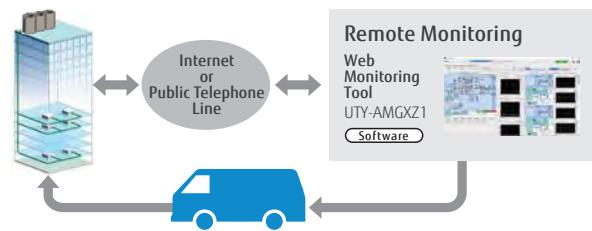

- Operation status/control
- Monitoring operating condition
- Monitoring sensor data
- Indication of trend graph
- Error history
- Indication of refrigerant circuit diagram (For VRF)

Remote monitoring

VRF system operating status and trouble status details can be constantly and remotely monitored over the Internet, etc.

Rapid cooperation with the service personnel are also possible.

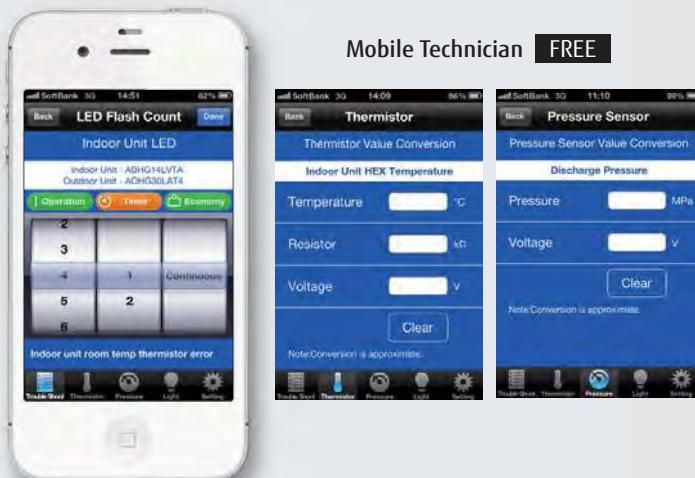

Mobile Troubleshooting Tool for iPhone & Android

We have released a Troubleshooting Tool App to be used on Android and Apple products. This application is a troubleshooting tool for Fujitsu General air conditioning products (RAC/VRF)

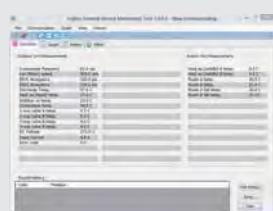

It helps you to check for Error codes, Sensor check, Troubleshooting and to check the condition of the air conditioner.

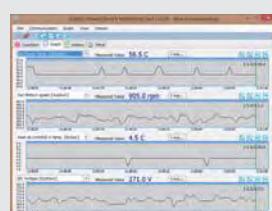

Service Monitoring Tool for Single Split, Multi-split

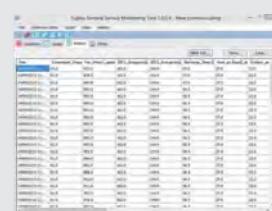

- Quick overview about temperature sensor readings and controlled parts like EEV, Fan, Compressor and so on.
- Visualisation of protection operation
- Helpful for intermittent troubleshooting
- Proof of normal operation for the customer during periodical maintenance.

AIRSTAGE™/RAC Support Tool

Put the charts and pens away and design your projects on your computer with ease using the Design Simulator. Everything from selecting indoor and outdoor units, allocating controls and optional parts to designing the piping and wiring systems is made easier using the program's built-in features.

Once your project is designed take advantage of the Export functions to easily get materials lists, product specifications, refrigerant calculations and more - it'll even export to Word, Excel, or Acrobat formats, and group the relevant CAD data for your project.

Design Simulator

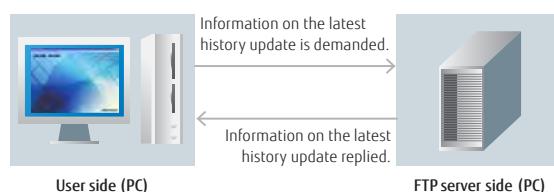

Output the format that matches the application

The information specific to your project can be exported in a number of industry standard file formats.

- Word format (rtf)(doc)
- Excel format (csv)
- Acrobat format (pdf)
- Auto CAD format (DXF)
- 2D Data (DXF)
- 3D Data (RFA)

Automatically create model selection information

- Each unit can be automatically set by entering the required performance, type, and temperature conditions for each indoor unit and then dragging and dropping into the outdoor unit.
- Piping and wiring diagrams can be created automatically and it is easy to set branches, grouping, and options.
- The additional refrigerant charging amount is automatically calculated when the pipe length is entered.
- It is also easy to set the remote controller groups, central controller and converters.
- The equipment list including the equipment information is created automatically.

Update your Design Simulator

Database can be easily updated online using AutoUpdate function through FTP.

NEW BIM Building Information Modeling

BIM files of Fujitsu General's products available on BIMobject®

We are pleased to inform that Fujitsu General has released BIM files of products on BIMobject®'s website (BIMobject.com).

Outline of BIMobject

BIMobject® is a game changer for the construction industry, offering development, maintenance, and syndication of objects on the world's biggest BIM platform.

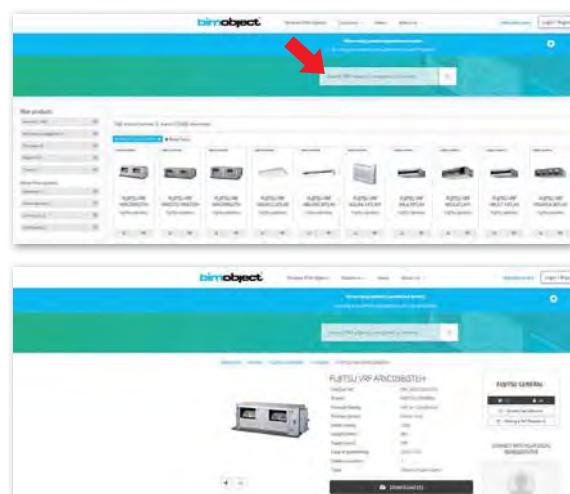

About the BIM file

- BIM files are Autodesk Revit 2018 version.
- Each of the BIM files has different refrigerant and drain piping connector location.
- Each of the BIM file includes several family types.
- Revit file type catalog (Specification) is available for every product.

bimobject®
www.bimobject.com/en

Go to search bar and key in the brand name FUJITSU GENERAL to search the products

RFA (Revit data)

Data format available for BIM-designed projects.

Data content

- Shape (Size)
- Drain direction
- Piping direction
- Power source location
- Specifications etc.

Type catalog
(specifications of product)

DWG

Standard data available for Autodesk's products.

DXF

Intermediate data generally available for CAD products.

Data content

- Shape (Size)

*How to use the BIM files please refer to Instruction video on each product page.

AIRSTAGE™ J-IVL

Outdoor Unit 8 - 18 HP model

152~

- Slim & compact design
- Top class low noise
- Up to 42 indoor units can be connected
- Design with small refrigerant volume
- Intelligent refrigerant control

8/10/12 HP

14/16/18 HP

AIRSTAGE™ J-IV

Outdoor Unit 4/5/6 HP model, Single & 3 Phase

148~

- Slim & compact design
- Top class low noise
- Up to 14 indoor units can be connected (6 HP)
- Intelligent refrigerant control

AIRSTAGE™ J-IVS

Outdoor Unit 4/5/6 HP model

144~

- Height 998 mm Compact & light weight design
- Low sound level design
- Up to 13 indoor units can be connected (5/6 HP)
- Intelligent refrigerant control

AIRSTAGE™ VR-IV

Outdoor Unit 8 - 48 HP model

160~

- Smart and cutting-edge design.
- Top class low noise
- Up to 64 indoor units can be connected
- Simultaneous cooling and heating operation using 1 refrigerant system
- Intelligent refrigerant control

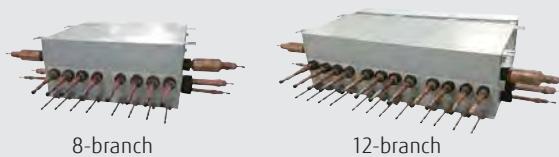

8/10/12 HP

14/16 HP

RB unit Multi-split type for Heat recovery (8-branch / 12-branch)

221

- Flexible piping connection
- Flexible installation
- Easy to maintain in a narrow space

8-branch

12-branch

VENTILATION

Air Handling Unit

238~

- Full comfort
- Easy design and installation
- Total solution concept

Air Handling Unit Controller

260

- Easy to install. Control connects to AHU programmable logic controller.
- Able to install the control after building decoration.
- Mode lock function: user can lock the running mode of Air Handling Unit.

CONTROL SYSTEM

Compact Wired Remote Controller

190

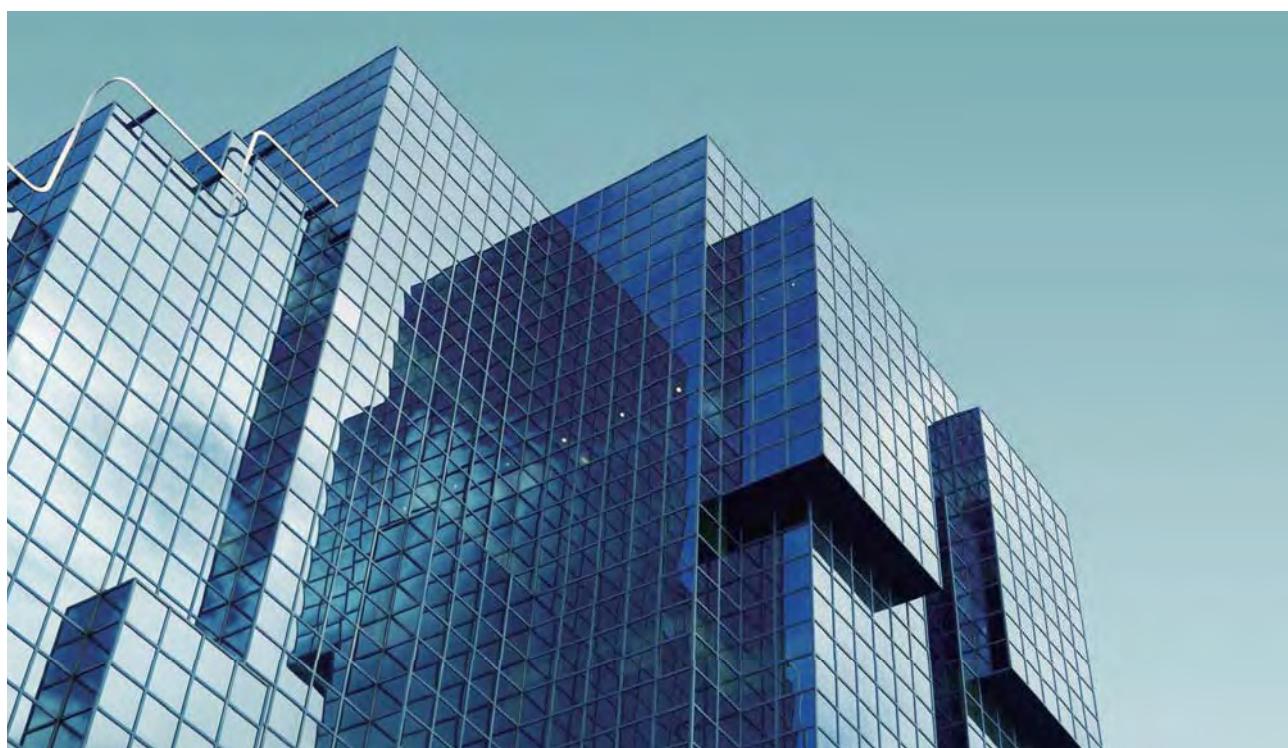

- Although the size is compact, the screen is large
- Large letters makes it easy to see
- Operation is simple and easy-to-understand

Mobile Application

105

- When you add our Wireless Interface and "FGLair" app, you can control your home's cooling and heating anytime and anywhere!
- Simple design and user-friendly interface

Control Operation from Anywhere

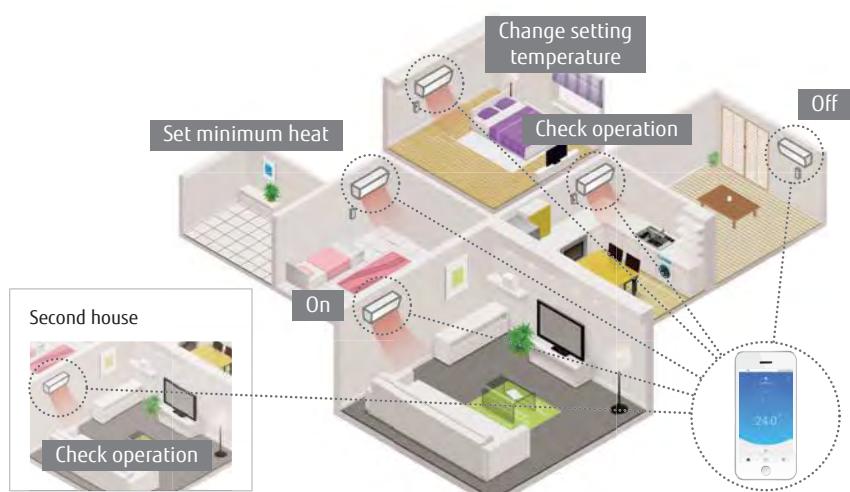

User friendly screen display facilitates easy operation. NEW

By using our Wireless LAN Interface and "FGLair" app, you can control your home's cooling and heating anytime and anywhere.

If you forget to turn off your system before you left your home - no problem!

"FGLair" is an application software that enables you to operate the Fujitsu General's air conditioner(s) with a mobile device from either in your home or when you are on travelling.

Wireless LAN Interface

The exclusive Wireless LAN adaptor enables you to operate the air conditioner by smartphone or tablet PC from outside.

New Compact Wired Remote Controller

Large screen and simple display

- Although the controller is compact, the screen is large
- Large letters makes it easy to see
- Operation is simple and easy-to-understand

Feature Explanation

Energy Saving Function

Dual side fans
Comfortable space can be created with Hybrid Airflow, which creates areas of different temperatures air current and velocities.

Economy mode
Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.

Save human sensor
Human sensor detects the movement of people in the room to operate the energy saving function operation.

Room temperature set point limitation
The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

Save & Stop human sensor
Human sensor (option) detects movement of people in the room and decides whether to save energy or stop the unit.

Set temperature auto return
The setting temperature automatically returns to the previously set temperature.

Comfortable Function

Powerful heating
Keeping the rated heating capacity even when the outdoor ambient temperature is -7°C.

Powerful mode
Operation at maximum air flow and compressor speed, and quickly makes the room comfortable.

Auto-changeover
The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.

Automatic fan speed
The micro-computer automatically adjusts the airflow effectively to follow the changes of room temperature.

Fresh air intake
Fresh air can be taken in by a fan which can be connected using external control unit.

Power diffuser
An additional louvre that opens based on monitoring sensors to quickly enhance immediate comfort needs.

10°C HEAT operation
The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.

Up/down swing flaps
The up/down flaps automatically swing up and down.

Auto restart
In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once power supply is restored.

Connectable distributing duct
Systems are capable of attaching locally purchased branch ducts distributing the airflow.

Server room operation
Interlock operation is possible by connecting 2 indoor units even in low temperature.

Low noise mode
Sound noise level of outdoor unit can be selected.

Double swing automatic
Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.

Connectable fresh air duct
Outside air can be introduced by attaching locally purchased duct to fresh air knockout and optional part.

Individual airflow direction control
Each louvre of 4-way Cassette type can be controlled individually and provides comfortable airflow.

Convenient Function

Auto off timer
Automatically stops operation when a fixed time has elapsed from the start of operation.

Weekly timer
Different ON-OFF times can be set for each day.

External error output

Sleep timer
The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

Weekly + setback timer
Weekly + Setback timer can set temperature for two times spans and for each day of the week.

External ON/OFF input

Program timer
This digital timer allows selection of one of four options:
ON, OFF, ON » OFF or OFF « ON.

Filter sign
Indicates the filter cleaning period by lamp.

Wireless LAN control
The exclusive Wi-Fi adaptor enables to operate the air conditioner by smartphone or tablet PC from outside.

Clean Function

Plasma air clean
The electrostatic precipitator removes dust particles such as pollens and house dust. It is washable so can be kept clean.

Apple-catechin filter
The Apple-catechin filter uses static electricity to clean fine particles and dust in the air.

Filter auto clean
The dust collected by the air filter is automatically removed. A routine disposal of the dust stored in the dust box is necessary.

Long life filter

Ion deodorisation filter
The filter deodorises by powerfully decomposing absorbed odors using the oxidising and reducing effects of ions generated by the ultra-fine-particle ceramic.

Washable panel
Since the front panel is easy to remove, maintenance is also easy.

Installation

Automatic airflow adjustment
Automatically detects required airflow in each application case and adjusts the volume.

Drain pump as standard

Blue fin

All DC models

i-PAM control models
i-PAM inverter control is a technology which reduces loss by adjusting the current waveform to a better sine waveform.

V-PAM control models
V-PAM inverter control reduces the effects of magnetic flux and increases the maximum speed and efficiency of the compressor by vector control technology.

Wall Mounted

High Spec Series

High Spec & Design

**ALL
DC**

High energy saving

Top class high efficiency is achieved by a highly efficient lamda heat exchanger, large cross flow fan and new refrigerant.

Hybrid-heat exchanger

The heat exchange efficiency has been significantly improved with the large hybrid heat exchanger, attaining the top-level SEER and SCOP.

Ø107 Large cross-flow fan

With the large-diameter fan, efficient air volume can be obtained at low power.

Human sensor

Human sensor catches movements of people in a room, and operates with lower capacity when people leave the room. When people come back to the room, it automatically returns to previous operating mode.

Comfortable airflow & Silent operation

The big louvre and the new air blowing structure have attained a comfortable air flow that spreads wider to user's feet and silent operation.

19 dB(A)

(07/09/12 models)
Cooling only

Smartphone Control (option)

Easy air conditioner control from inside or outside the house and office using Smartphones, Tablets, and PC.

Wireless LAN Interface

The exclusive WiFi adaptor enables to operate the air conditioner by smartphone or tablet PC from outside.

Small and light weight outdoor unit

This model is much more compact than a conventional outdoor unit. It can be installed with ease in restricted spaces.

Human sensor

Human sensor catches the movements of people in a room and operates with a lower capacity when people leave the room. When people come back to the room, it automatically returns to the previous operating mode.

Adopting new refrigerant R32

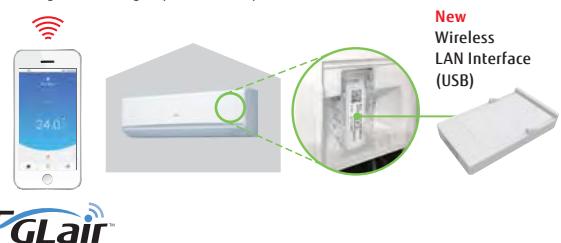

R32 Refrigerant has a lower global warming potential than other refrigerants currently available, making it a more environmentally friendly solution.

Smartphone control (option)

This model can be controlled from anywhere using Smart Device Control by installing an optional wireless LAN interface. The wireless LAN interface can be installed easily without specialised installation work.

When you add our Wireless Interface and FG Lair app, you can control your home's cooling and heating anytime and anywhere.

	Additional Charge	g/m	40	40
Operation Range	Cooling	°CDB	-15to46	-15to46
	Heating		-15to24	-15to24

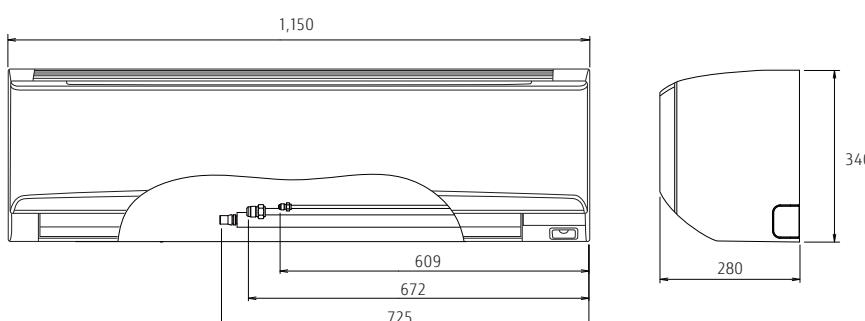

Optional parts

Compact Wired Remote Controller:	UTY-RCRYZ1	External Input and Output PCB:	UTY-XCSZ2	Network Convertor for single split (DC power supply type): UTY-VTGX
Wired Remote Controller (Touch Panel):	UTY-RNRYZ3	Communication Kit:	UTY-TWRXZ2	Network Convertor for single split (AC power supply type): UTY-VTGXV
Simple Remote Controller (Without operation mode):	UTY-RHRY	Wireless LAN Interface:	UTY-TFSXF2	Wireless interface for use with Smart home products: FJ-AC-WIFI-1
Simple Remote Controller:	UTY-RSRV	External Switch Controller:	UTY-TERX	
External Connect Kit:	UTY-XWZXZ5	KNX® Convertor:	UTY-VKSX*	
		MODBUS® Convertor:	UTY-VMSX*	

*: It can be used only when the wireless LAN interface (UTY-TFSXF2) is removed.

Economy Series

Compact & Comfort

**ALL
DC**

Slim & stylish square design

Slim and stylish square design is achieved by a high density multi-path heat exchanger and a high efficiency fan.

High energy saving

Top class high efficiency is achieved by a highly efficient lamda heat exchanger, large cross flow fan and new refrigerant.

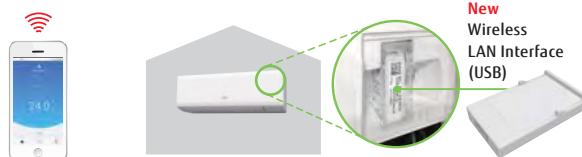

Comfortable airflow & Silent operation

The large louvre and associated structures provide a comfortable air flow that spreads to the user's feet with silent operation.

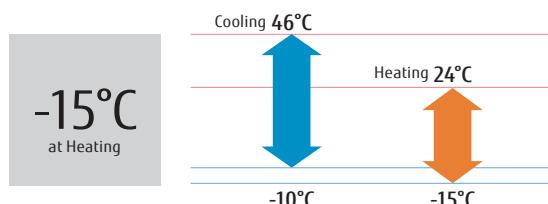

Smartphone Control (Option)

This model can be controlled from anywhere using Smart Device Control by installing an optional wireless LAN interface. The wireless LAN interface can be installed easily without specialised installation work.

Low ambient operation

Model: ASYG09KPCA / ASYG12KPCA

Economy Series

Comfort for Large Room

**ALL
DC**

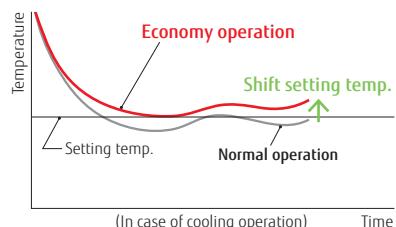

Narrow width & Compact Design

High performance and compact design model. Powerful airflow is generated despite a 790 mm wide compact design for compact spaces such as bedrooms or home offices.

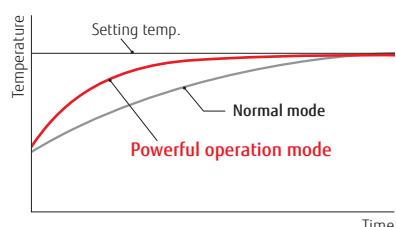

Economy operation

Room setpoint automatically changes by 1°C to avoid unnecessary cooling and heating.

Powerful operation

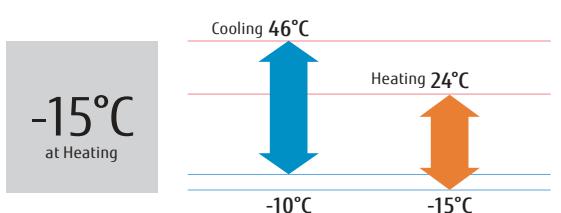

20 minutes continuous operation with maximum airflow and maximum compressor speed. Rapid cooling and heating make the room comfortable quickly.

ON-OFF Programmable timer

You can set an integrated ON-OFF or OFF-ON timer suitable for your lifestyle. (Setting time: 0.5, 1, 1.5, 2, 2.5, ----9.5, 10, 11, 12 hours)

Low ambient operation

Easy maintenance

Maintenance is easy by removing the ceiling panel next to the grille, maintenance can be done, without the installation of a new inspection hole, so construction costs can be reduced.

The air inlet grille can be installed in various directions, so maintenance is easy.

Unique Circular Flow design

This cassette discharges air through 360° through a seamless louvre design.

Comfortable air conditioning by preventing direct blowing of cold air and by providing swinging air flow simultaneously.

Efficient air conditioning based on the room layout

Individual louvre control

Each louvre can be set individually by the Touch Panel Wired Remote Controller, to enjoy the comfort of different directional airflows according to various room layouts.

*Touch Panel Wired RC (UTY-RNRYZ3)only

Human sensor increases more energy saving

Energy saving operation starts automatically by detecting the motion of a person. 2 modes of 'save operation' mode and 'stop mode' can be selected.

Auto Louvre Grille Kit (Option)

Simple flat Auto Louvre will provide comfort airflow and harmonise with luxury interior.

Slim design

The slim design allows installations where ceilings are narrow. Drain hose as standard accessory

STANDARD Medium Static Pressure Duct

Compact & Comfort

ALL
DC

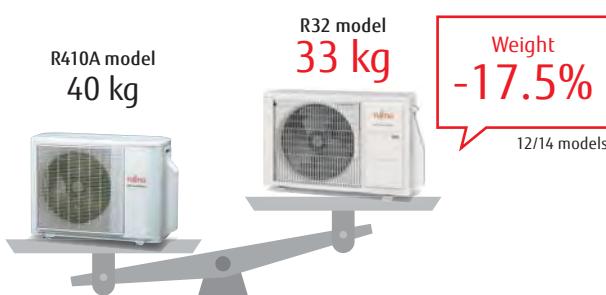

High Efficiency & Quiet operation

The combination of the V-shaped heat exchanger, air stabiliser, and the highly efficient DC fan motor allows high efficiency and quiet operation.

Small and light weight outdoor unit

This model is much more compact than a conventional outdoor unit. It can be installed in a restrictive area.

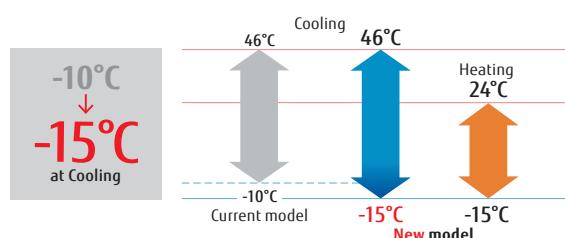

Automatic Airflow adjustment function

This unique and innovative function detects required air flow in each application case and automatically adjust the volume.

Low ambient operation

(Outdoor unit 30/36/45/54)

External Connect Kit:

UTY-XWZXZ3

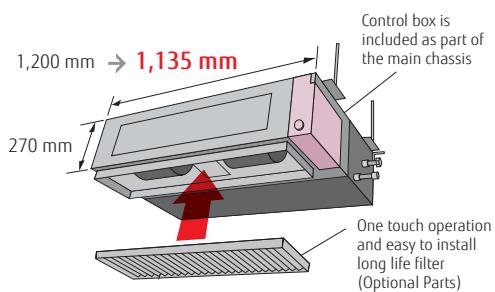

The image shows four different outdoor condenser units side-by-side. From left to right, they are labeled: For ARXG22KMLA, For ARXG24KMLA, For ARXG30/36KMLA, and For ARXG45KMLA. Each unit has a white cabinet with a large fan at the bottom and a metal grille on top.

Slim & Compact design

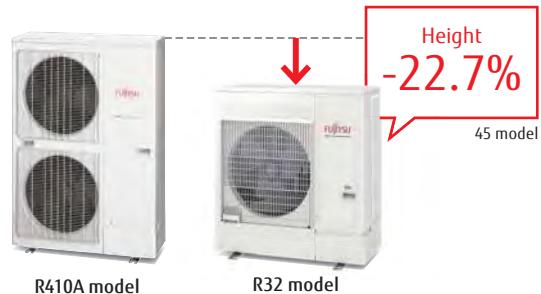

Indoor Unit

The slim and compact design of the indoor unit, with the control box mounted on the side, allows installation in narrow spaces.

New Outdoor Unit

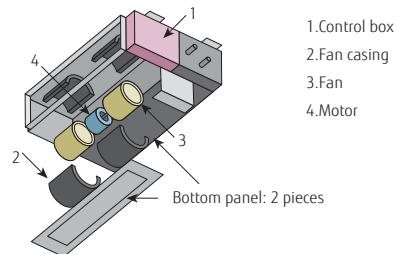

The 45 model outdoor unit was changed completely. Easier installation was achieved by compact and lightweight outdoor unit.

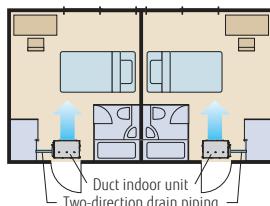

Easy maintenance

Structural improvement is attained by making the bottom panel two pieces, front and rear. The internal fan casing is also manufactured in two pieces, namely upper and lower. The maintenance of the motor and fan can be easily carried out by removing the rear panel and the lower part of the casing while leaving the main chassis installed.

See below for the case of rear suction type

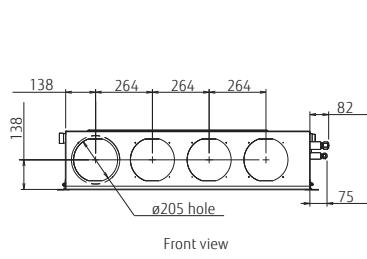

Two-direction drain piping

STANDARD High Static Pressure Duct

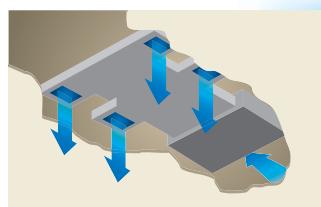

Easy installation (Compact size & Lightweight)

A compact lightweight indoor & outdoor unit has been developed by reducing the basic chassis and the overall material weight.

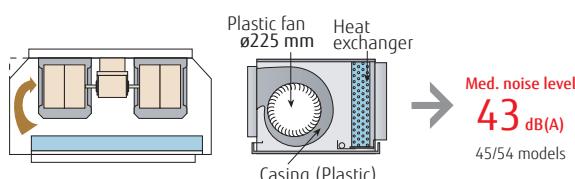

Design also corresponding to high static pressure

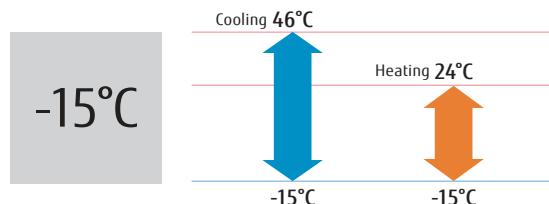

Low noise

Cutting off the corners has enabled less turbulent airflow. Low noise is achieved by adopting a plastic case and a plastic fan.

Low ambient operation

Big Duct

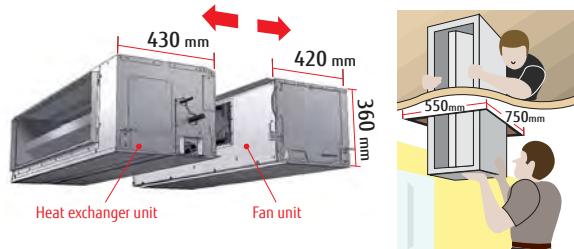

**ALL
DC**

Separation is possible by lightweight compact design

The indoor unit can be separated into a fan unit and heat-exchanger unit to assist the installation.

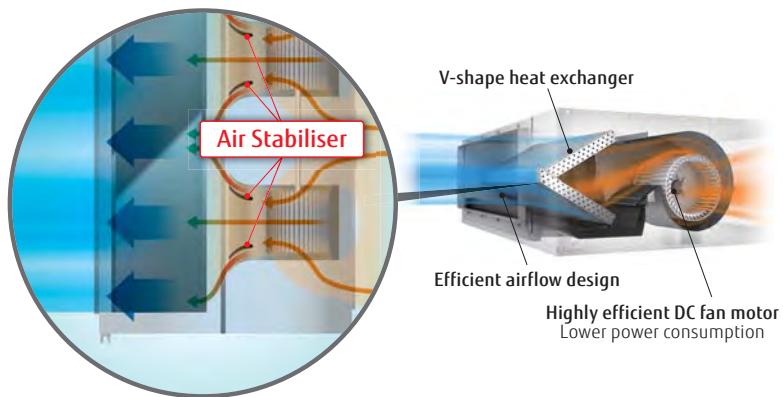

Automatic Airflow adjustment function

This function can set the optimum airflow automatically so, that installation time is shortened drastically.

Quiet operation

The combination of the V-shaped heat exchanger, air stabiliser, and the highly efficient DC fan motor allows quiet operation.

Floor

Compact & Comfort

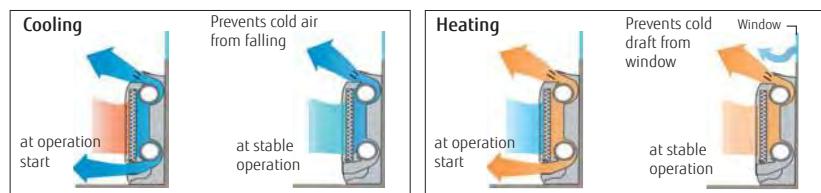

**ALL
DC**

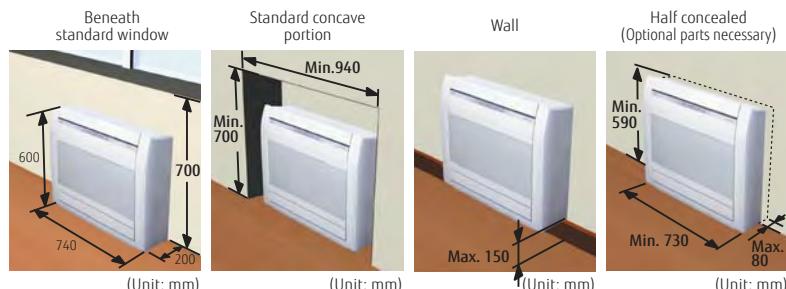

Dual Fan & Wide airflow

Upper and lower air discharge allows the room to reach target temperature quickly and be maintained more comfortably.

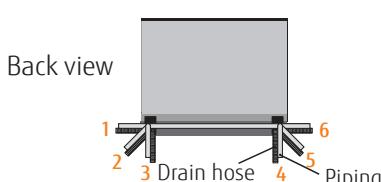

Flexible & easy installation

The forward facing air intake makes it possible to install the unit floor mounted, wall mounted, fully concealed or partially recessed.

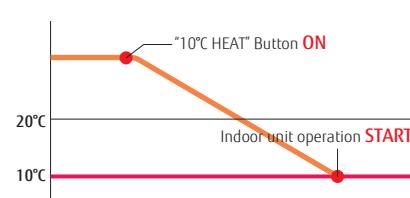

Flexible piping connection - 6 directions of drain & piping

Drain hose and piping can be drawn flexibly from the right or left, side, and down directions.

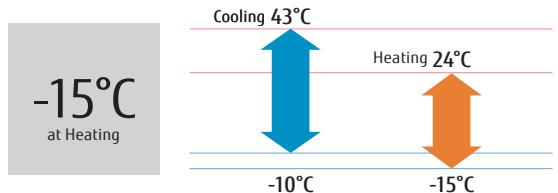

10°C HEAT Operation

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.

Low ambient operation

Control several indoor units with one outdoor unit. Build the system you desire.

If you want to keep a large floor as well as many rooms comfortable, we recommend to use our Multi-split to build a compact system using just one outdoor unit. Choose from a large lineup of indoor units, which match up well to your rooms. You can mix and match them as you like. Build the system that is just right for you.

Outdoor Units Lineup

			Class	14	18

Note: **1. 2-unit Multi-split:** Connectable indoor units are 2 units.

AOYG14KBTA2: Total capacity of indoor units connected must be between 4.0 kW and 6.0 kW.

AOYG18KBTA2: Total capacity of indoor units connected must be between 4.0 kW and 7.5 kW.

AOYG14LAC2: Total capacity of indoor units connected must be between 4.0 kW and 6.0 kW.

AOYG18LAC2: Total capacity of indoor units connected must be between 4.0 kW and 7.0 kW.

2. 3-unit Multi-split: Connectable indoor units are 2 to 3 units.

AOYG18LAT3: Total capacity of indoor units connected must be between 4.0 kW and 8.5 kW.

AOYG24LAT3: Total capacity of indoor units connected must be between 4.0 kW and 10.5 kW.

3. 4-unit Multi-split: Connectable indoor units are 3 to 4 units.

AOYG30LAT4: Total capacity of indoor units connected must be between 7.5 kW and 14.0 kW.

* When connecting 14 model to multi-split type outdoor unit for R410A refrigerant, Adapter H is required for its piping.

2-unit Multi-split

**ALL
DC**

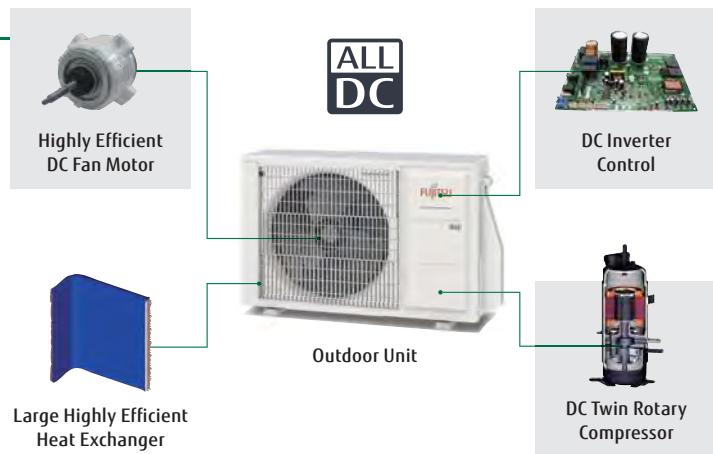

High energy saving

DC technology is used for compressor, indoor / outdoor fan motor and inverter controlling.

**SEER
8.7^{*1}** **SCOP
4.7**

*1: 14 model

Wide range of indoor units with various models

4 types / 16 models are lined up in the capacity range from 2.0 kW to 4.0 kW class. Wide range of requirements can be achieved in private homes, large shops and hotels.

Models equipped with the New R32 Refrigerant

Wall mounted type with sophisticated design

Middle and small capacity models are available. This makes it easier to install at small spaces.

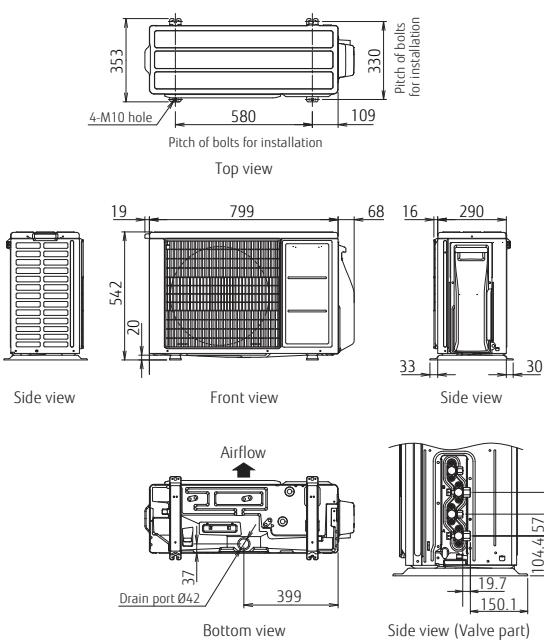

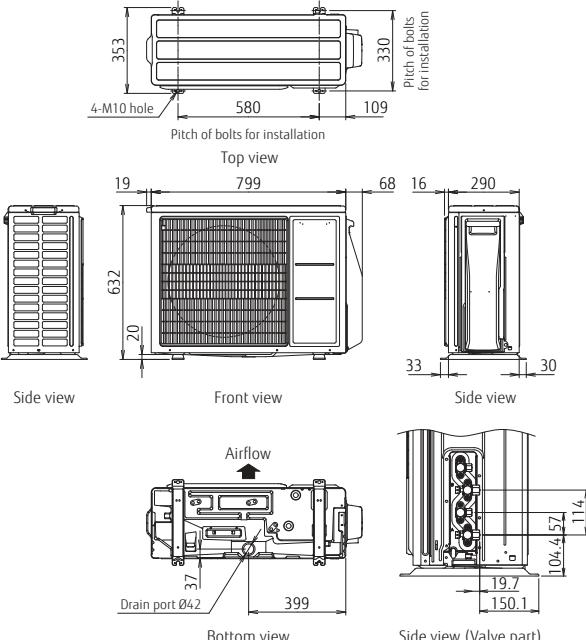

2-unit: AOYG14KBTA2 / AOYG18KBTA2

DC

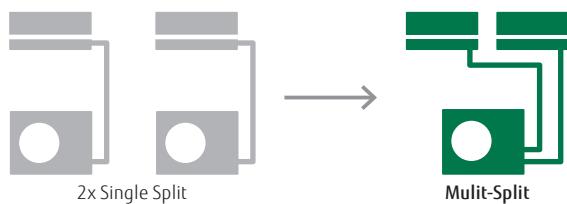

Wide range of indoor units with various models

4 types / 16 models are available in the capacity range from 2.0 kW to 4.0 kW class. Wide range of requirements can be realised from in private homes, large shops and hotels.

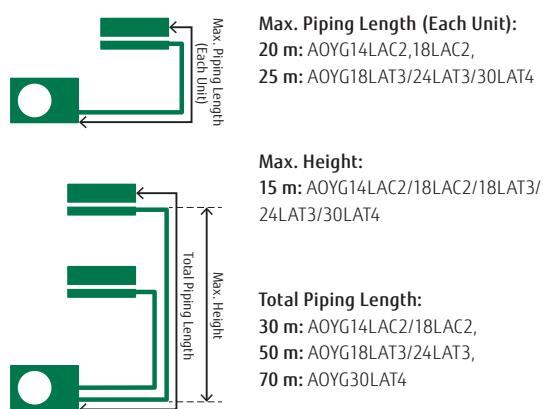

Space-saving installation

Multiple indoor units can be connected to 1 outdoor unit, and long piping connection is also possible. Compared with single type, the outdoor unit can be installed in various places to realise the space-saving installation.

Flexible installation

Up to max. piping length of 70 m (AOYG30LAT4), max. height difference of 15 m can be supported. Multi-split type can be installed in large-size residence or buildings with multiple floors.

Wide range of indoor units with various models

4 types / 16 models are available in the capacity range from 2.0 kW to 4.0 kW class. Wide range of requirements can be realised from in private homes, large shops and hotels.

Compact design

Multiple indoor units can be connected to 1 outdoor unit, and long piping connection is also possible. Compared with single type, the outdoor unit can be installed in various places to realise the space-saving installation.

Easy installation

All connected pipes and indoor units can be evacuated quickly via our centralised valve method. Requires evacuation only once

Central & Individual Control

- Batched control of up to 6 indoor units. The temperature, airflow volume, and remote control prohibition settings of all indoor units can be batched.
- Corresponds to 9 different languages (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)
- Large backlight LED screen
- Large easy-to-see operation panel

Max. Controllable
1 multi system

Max. Controllable

Note: •7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h models

- The above is the value for connecting with Wall Mounted type.
- 2 or more indoor units should be connected.
- Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).
- Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)
- The Total ability of connected indoor unit is up to 21000Btu from 14000Btu.

Note: •7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h models

•The above is the value for connecting with Wall Mounted type.

•2 or more indoor units should be connected.

•Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

•Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

•The Total ability of connected indoor unit is up to 36000Btu from 14000Btu.

*1: When ASYG18L is connected, connect at least 1 wall mounted type for 9000Btu.

Note: •7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h / 24:24000Btu/h models

•The above is the value for connecting with Wall Mounted type.

•3 or more indoor units should be connected.

•Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

•Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

•The Total ability of connected indoor unit is up to 49000Btu from 27000Btu.

*1: Connection of ASYG18L + ARYG09L + ARYG09L + ARYG09L is not available. All types other than this combination can be connected.

*2: Connection of ASYG18L + ARYG12L + ARYG09L + ARYG09L is not available. All types other than this combination can be connected.

*3: Connection of ASYG18L + AUYG14L + ARYG09L + ASYG07K is not available. All types other than this combination can be connected.

Note: • 7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h / 24:24000Btu/h models

• The above is the value for connecting with Wall Mounted type.

• 2 or more indoor units should be connected.

• Cooling capacity is based on 27°CDB/19°CWB (indoor temperature), 35°CDB (outdoor temperature).

• Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

• The Total ability of connected indoor unit is up to 54000Btu from 27000Btu.

Note: • 7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h / 24:24000Btu/h models

•The above is the value for connecting with Wall Mounted type.

•2 or more indoor units should be connected.

•Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

•Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

•The Total ability of connected indoor unit is up to 54000Btu from 27000Btu.

Note: • 7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h / 24:24000Btu/h models

• The above is the value for connecting with Wall Mounted type.

• 2 or more indoor units should be connected.

• Cooling capacity is based on 27°CDB/19°CWB (indoor temperature), 35°CDB (outdoor temperature).

• Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

• The Total ability of connected indoor unit is up to 62000Btu from 34000Btu.

Note: •7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h / 24:24000Btu/h models

The above is the value for connecting with Wall Mounted type.

•2 or more indoor units should be connected.

•Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

•Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

•The Total ability of connected indoor unit is up to 54000Btu from 27000Btu.

Note: • 7:7000Btu/h / 9:9000Btu/h / 12:12000Btu/h / 14:14000Btu/h / 18:18000Btu/h / 24:24000Btu/h models

The above is the value for connecting with Wall Mounted type.

2 or more indoor units should be connected.

Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

Pipe Length: 5 m, Height difference: 0 m (Outdoor unit to Indoor unit)

The Total ability of connected indoor unit is up to 54000Btu from 27000Btu.

Simultaneous Multi-split

Twin/Triple

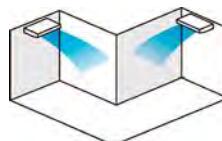

**ALL
DC**

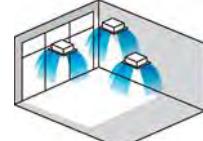

Supports various installation scenes from office to commercial space, inside the same room and multi connection of up to 3 indoor units.

Selection of indoor units according to the room shape and heat load, like number of people and lighting conditions.
Most comfortable air flow distribution can be realized.

Installation according to floor layout

Installation according to lighting conditions

Design flexibility

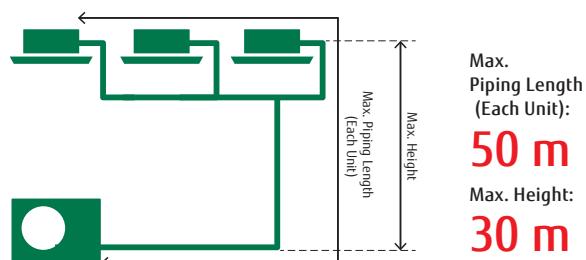

Slim & Compact design

This model is much more compact than a conventional outdoor unit. Significant reduced height of the product supports installations in narrow spaces.

Flexible installation

Up to max. piping length of 50 m, max. height difference of 30 m can be supported. Multi-split type can be installed in large-size residence or buildings with multiple floors.

Dimensions

(Unit : mm)

AOYG36KBTB / AOGY36KRTA

AOYG45KBTB / AOGY54KBTB AOYG45KRTA / AOGY54KRTA

Simultaneous Multi-split

Twin/Triple/Quad

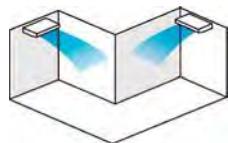

**ALL
DC**

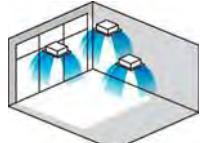

Can support various applications from large open plan offices to retail stores with up to 4 indoor units.

Indoor units distributed layout according to the shape and number of people and lighting conditions of the room.
Ideal comfortable air flow distribution can be achieved.

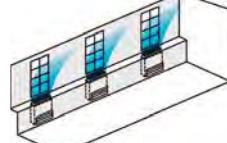

Installation according to floor layout

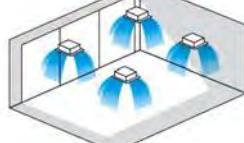

Installation according to lighting conditions

Installation according to layout and lighting conditions

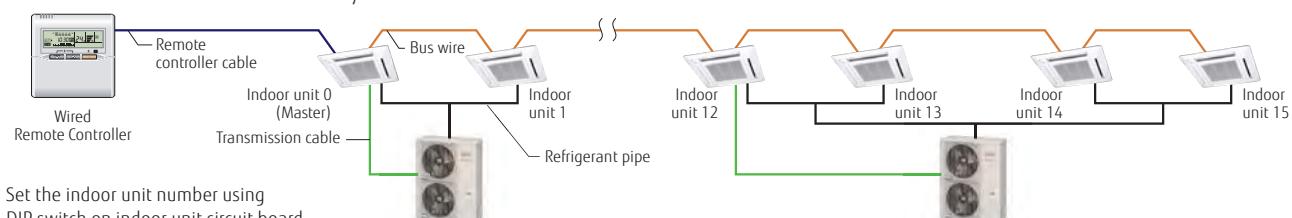

Installation according to large space

Simultaneous control

Max 16 indoor units are simultaneously controlled with a wired remote controller.

Set the indoor unit number using DIP switch on indoor unit circuit board.

*When using a wireless remote controller, the following functions cannot be used: Timer operation, Sleep Timer operation, 10°C Heat operation

Feature Explanation & Summary

Type	Wall Mounted				
Series	Designer Series		Standard Series	Designer Series	Standard Series
Model No.	ASYG 07/09/12/14 KGTB	ASYG 07/09/12/14 KETA, ASYG 07/09/12/14 KETA-B	ASYG 07/09/12/14 KMCC	ASYG 07/09/12/14 LUCA	ASYG 07/09/12/14 LMCE
Refrigerant					
Energy Saving Function	Save human sensor	Human sensor detects the movement of people in the room and judges whether the energy saving operation.	●		
	Economy mode	Thermostat setting automatically changes according to the temperature to avoid unnecessary cooling and heating.	●	●	●
	Room temperature set point limitation	The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.	○	○	○
	Set temperature auto return	The setting temperature automatically returns to the previously set temperature.	○	○	○
Comfortable Function	Power diffuser	An additional louvre that opens based on monitoring sensors to quickly enhance immediate comfort needs			●
	Powerful mode	Operation at maximum air flow and compressor speed, and quickly makes the room comfortable.	●	●	●
	10°C HEAT operation	The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.	●	●	●
	Low noise mode	Sound noise level of outdoor unit can be selected.	●	●	●
	Auto-changeover	The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.	●	●	●
	Up/down swing flaps	The up/down flaps automatically swing up and down.	●	●	●
	Double swing automatic	Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.			
	Automatic fan speed	The micro-computer automatically adjusts the airflow effectively to follow the changes of room temperature.	●	●	●
	Auto restart	In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once power supply is restored.	●	●	●
	Connectable fresh air duct	Outside air can be introduced by attaching Locally purchased duct to fresh air knockout and optional part.			
	Fresh air intake	Fresh air can be taken in by a fan which can be connected using external control unit.			
	Connectable distributing duct	Systems are capable of attaching Locally purchased branch ducts distributing the airflow.			
	Auto off timer	Automatically stops operation when a fixed time has elapsed from the start of operation.	○	○	○
	Sleep timer	The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.	●	●	●
Convenient Function	Program timer	This digital timer allows selection of one of four options: ON, OFF, ON + OFF or OFF + ON.	●	●	●
	Weekly timer	Different ON-OFF times can be set for each day.	●	●	○
	Weekly + setback timer	Weekly + Setback timer can set temperature for two times spans and for each day of the week.	○	○	○
	Filter sign	Indicates the filter cleaning period by lamp.	●	●	●
	External error output		○	○	○
	External ON/OFF input		○	○	○
	Wireless LAN control	The exclusive Wireless LAN adaptor enables to operate the air conditioner by smartphone or tablet PC from outside.	○	○	○
	Ion deodorisation filter	The filter deodorises by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.	○	○	●
Clean Function	Apple-catechin filter	The Apple-catechin filter uses static electricity to clean fine particles and dust in the air.	○	○	●
	Long life filter				
	Washable panel	Since the front panel is easy to remove, maintenance is also easy.			●
Installation	Drain pump as standard				
	Blue fin				

○ : Optional function

Control System Overview

For Split & Multi-split

We have wireless or wired remote controllers as standard equipment. Other options, such as individual and central remote controllers, are also available. The easy-to-operate central remote controller makes it simple to control the operation mode, temperature, airflow volume, timer, and other functions of each indoor unit from a single location.

Air Conditioning Individual Control

Wired Remote Controller

The room temperature can be controlled by detecting the temperature accurately from the built-in sensor

Wireless Remote Controller

Simple and sophisticated operations with a choice of 4 daily timers

Simple Remote Controller

Compact remote controller provides access to basic functions

For Ceiling type

For Duct type

For Cassette type

IR Receiver Unit

Necessary to control for all duct type by Wireless Remote Controller

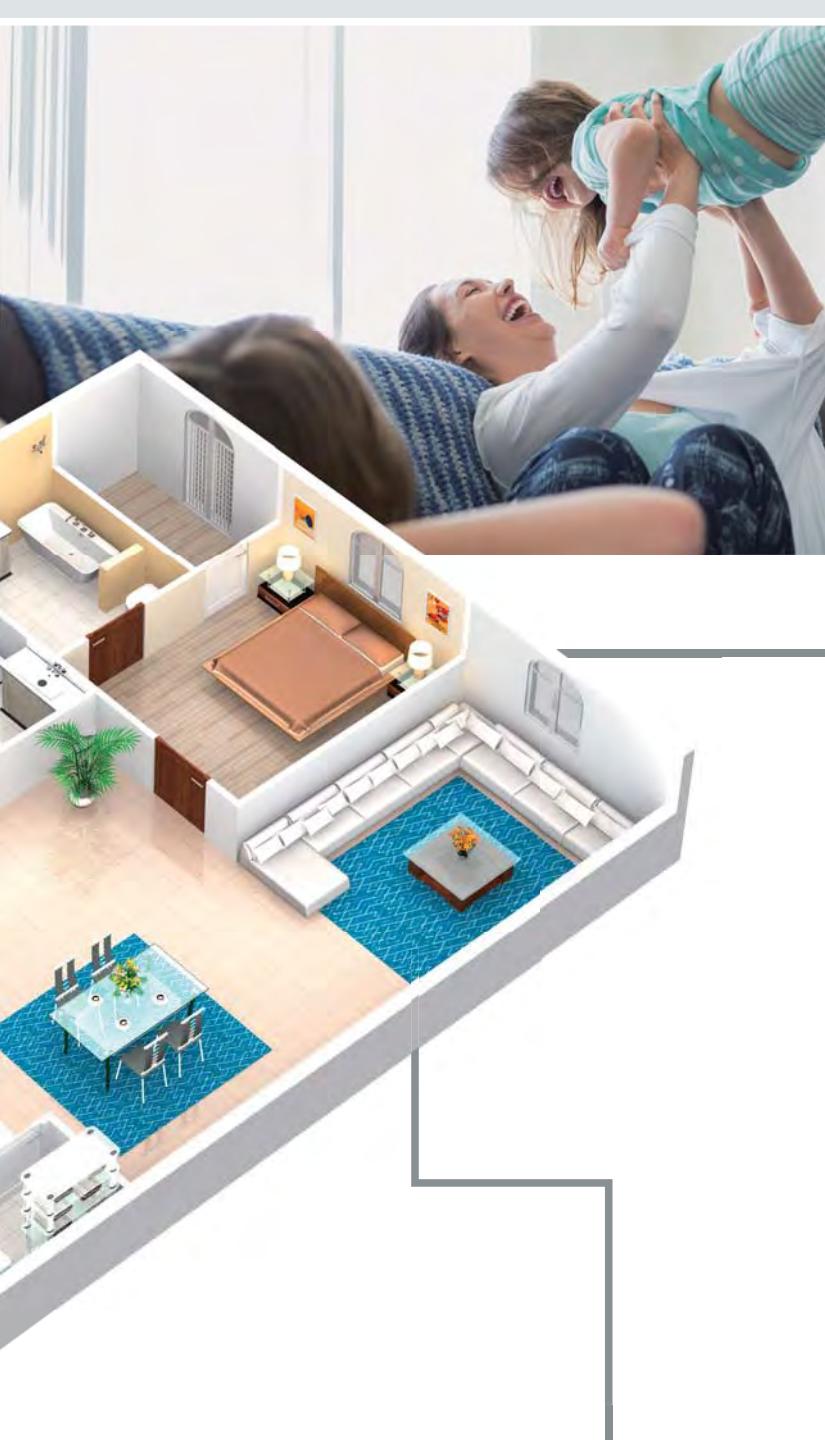

Air Conditioning Centralised Control

Central Remote Controller For 5-6 Rooms Multi

Central Remote Controller allows individual and central control

Convertor/Adaptor

For external control via BMS/Home Automation Systems

MODBUS® Convertor
For indoor unit
UTY-VMSX

MODBUS® Interface
For indoor unit
FJ-RC-MBS-1

KNX® Convertor
For indoor unit
UTY-VKSX

KNX® Interface
For indoor unit
FJ-RC-KNX-1i

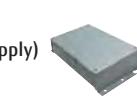

Wireless LAN Interface
FJ-RC-WIFI-2
FJ-AC-WIFI-1

Network Convertor
(DC power supply)
UTY-VTGX

(AC power supply)
UTY-VTGXV

Online Control (Wireless Control via Smart Phone/Tablet)

By using our Wireless LAN Interface and FGLair app, you can control your home's cooling and heating anytime and anywhere.

Wireless LAN Interface

The exclusive Wireless LAN adaptor enables to operate the air conditioner by smartphone or tablet PC from outside.

Optional Parts Overview

For Split & Multi-split

Various optional parts are provided to install the selected indoor unit properly according to the environment.

Optional Parts For Cassette

Human Sensor Kit
The room temperature can be controlled by detecting the temperature accurately from the built-in sensor

Cassette Grille
Cassette grille lineup including grid ceiling type cassette grille is also added to the lineup.

Fresh Air Intake Kit
Fresh air can be taken in by a fan which can be connected using external control unit.

Linwood Plenums

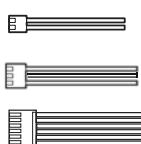

Linwood now offer an extensive range of plenum boxes to suit the Fujitsu General Air Conditioning UK range of ducted air conditioning indoor units

Installing air conditioning ducted fan coil units (FCU's) just got easier with these purpose made plenum boxes designed to save you time and money when fitting VRF or split air conditioning systems

Easy to use online ordering & live order processing via
www.airconplenums.com/fujitsu-plenum

filter not supplied with plenum

External Connect Kit & Set

These wires can connect between the product PCB and external device.

Connection Units

Connection units are provided to separate the pipes at the connection of multiple indoor units in multi-split type or VRF system.

Optional Parts For Duct & Ceiling

Auto Louvre Grille Kit

Simple flat Auto louvre will provide comfort airflow and harmonise with luxury interior

Remote Sensor Unit

New amenity space can be offered by installing the Remote sensor.

Long Life Filter

Grit and dust can be caught sufficiently. In consideration of running cost, long-life design is achieved.

Flange

Flange is used for Medium Static Pressure Duct type and Ceiling type to connect between pipes.

Drain Pump Unit

This device can drain the collected water during operation.

Connection Parts

For Wall Mounted type

Communication Kit

For wall mounted type, this kit is required when External Connect kit & Set or wired remote controller is connected to indoor unit.

For Wall Mounted type

For Duct and Cassette type

External Input and Output PCB

For Wall mounted, Duct, or Cassette type, these parts are required when external input and output function is used.

External Input and Output PCB Box & Bracket

These are the box and bracket for installing the External input and output PCB

FUJITSU GENERAL LIMITED

Small Offices

For Light Commercial

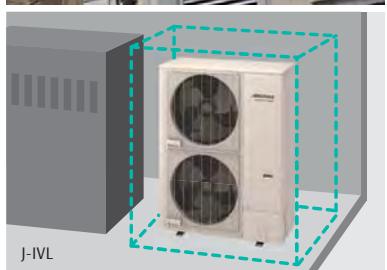

Fujitsu General provides perfect ideal air conditioning systems that take into account energy saving, low noise, comfortable airflow, small room application and centralised control for small-sized office buildings with many small rooms.

J-IV

J-IVL

J-IVL
High capacity model

Compact and low noise outdoor unit

This compact outdoor unit does not take up much space even if installed in a machine room or on the rooftop. This unit provides enough static pressure even if there are louvres. Low noise operation is possible at nighttime by a low noise mode.

AIRSTAGE™ J Series Up to 18 HP with a compact outdoor unit

This small VRF system is suitable for a building with many small rooms. Max. 42* indoor units can be connected.

*Only J-IVL 18 HP model

Central Remote Controller UTY-DCGYZ1

Centralised remote controller with improved operability

Each individual room can have its own schedule setting. This controller makes energy saving management possible with upper/lower temperature limit settings and operation prohibited settings.

Various indoor units lineup for low capacity class

Various range of low capacity 1.1 kW indoor units to suit small rooms or spaces.

Wall Mounted

Compact Floor

Compact Cassette Grid Type

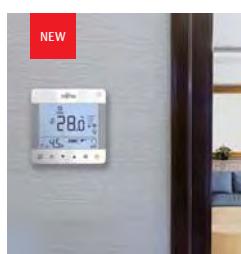

Fixed IP, IP forwarding and open Port required
INTERNET

*Wireless LAN support : Future release

Control and monitoring

The same level of management that is possible from the centralised controller is possible even if you are at your desk. Non-administrators can also operate the air conditioners with a PC, Smartphone or tablet.

New Compact wired remote controller

A compact controller with a large screen making operation easy. A stylish design to suit any interior..

Large Building

For Commercial

Fujitsu General provides modular type VRF systems that seek high efficiency, comfort, design freedom, easy installation and reliability for large commercial buildings.

Abundant lineup suitable to match the operating environment

VRF Series lineup to meet various needs such as energy saving-orientated models.

NEW

AIRSTAGE™ VR-IV

Cutting-edge design. Extensive lineup from 8 HP to 48 HP in 2 HP increment. Connectable indoor unit capacity ratio up to 150%

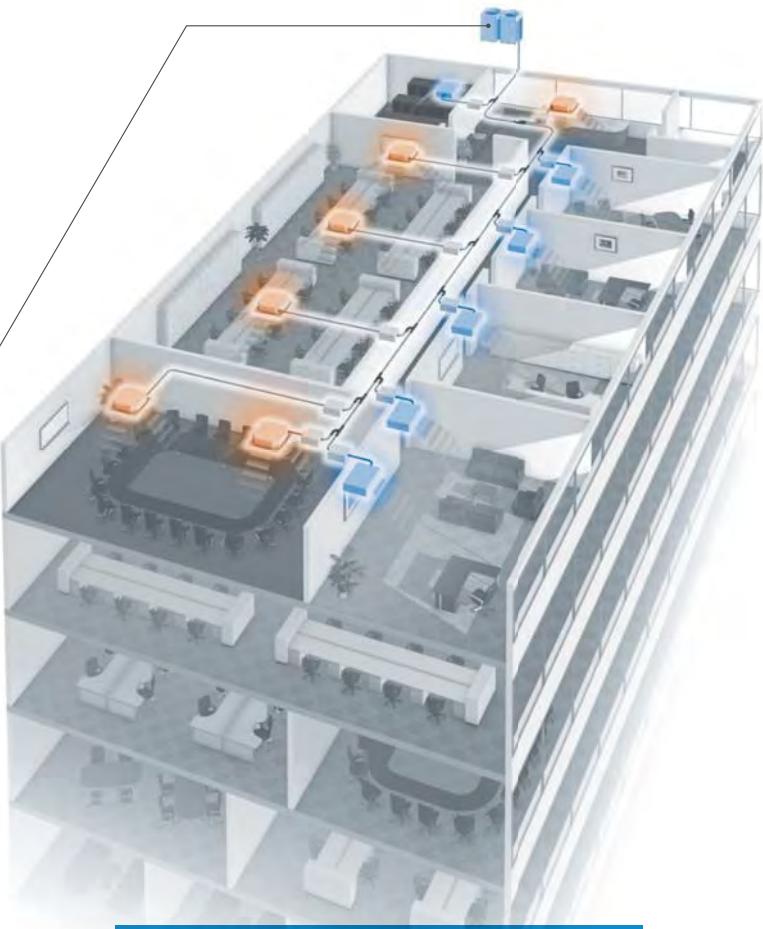

8 HP - 48 HP 34 Models

- Space saving combination: 8 HP to 48 HP/21 models
- Energy efficiency combination: 16 HP to 44 HP/13 models

AIRSTAGE™ V-III

8 HP - 54 HP 39 Models

- Space saving combination: 8 HP to 54 HP/24 models
- Energy efficiency combination: 16 HP to 46 HP/ 15 models

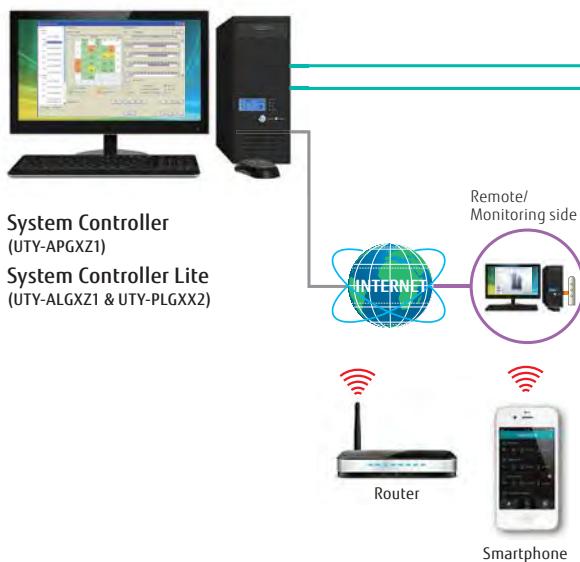

Individual air conditioning system for large buildings

AIRSTAGE VR IV outdoor units provide simultaneous heating and cooling up to 48HP.

Centralised control

Not only indoor units in the building but also facilities such as ventilation can be controlled easily by anyone.

Link up with a variety of BMS

It is possible to link up MODBUS, BACnet, KNX and other interfaces via Fujitsu BMS interfaces.

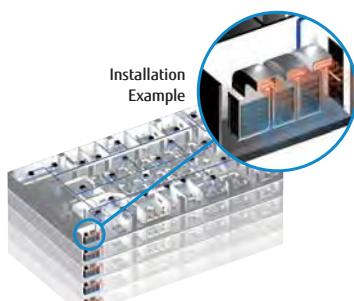

High system flexibility

Flexible installation on each floor and installation of a variety of indoor unit styles. Outdoor units provides high static pressure, long piping design and connection capacity.

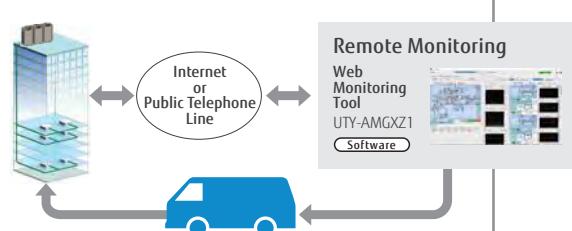

82^{*} Pa

*: V-III, 80Pa for VR-IV

Rapid service support

The air conditioning of the entire building can be monitored remotely with Web Monitoring Tool and System Controller.

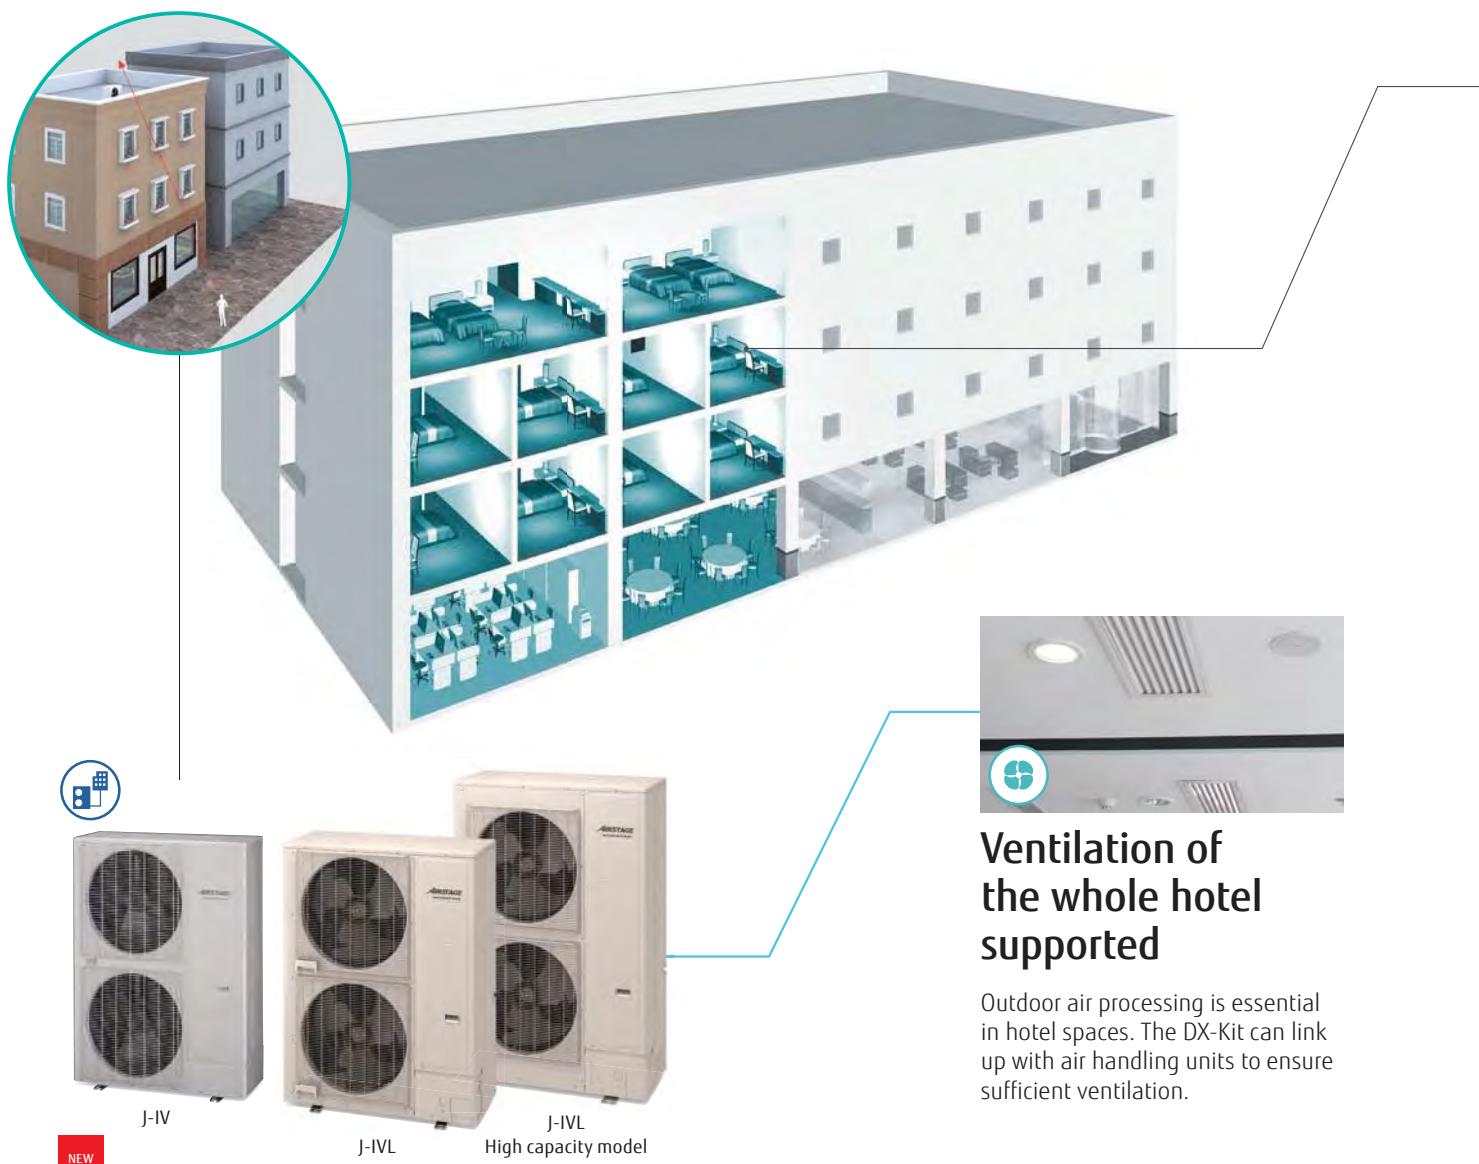

Hotels

For Light Commercial

Fujitsu General provides total air conditioning systems that take into account comfort, energy saving, external appearance, safety and easy installation for small hotels.

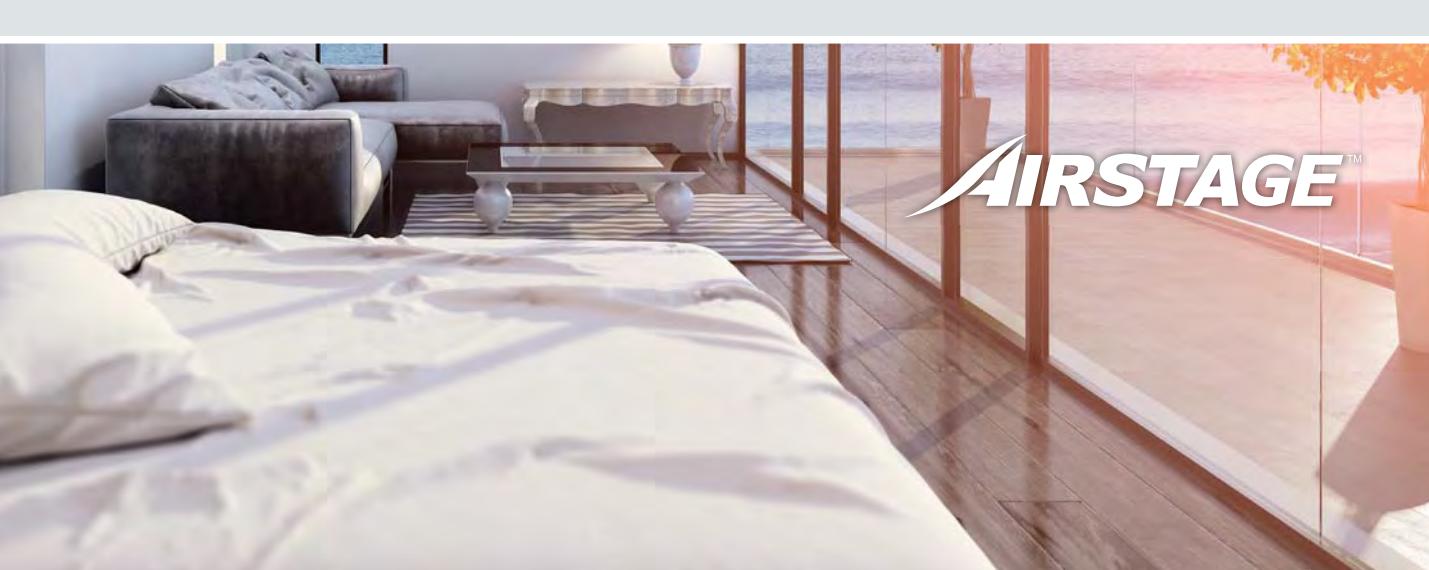

Ventilation of the whole hotel supported

Outdoor air processing is essential in hotel spaces. The DX-Kit can link up with air handling units to ensure sufficient ventilation.

AIRSTAGE™ J Series appearance-oriented compact outdoor unit

Due to the lowest and most compact design in the industry, the outdoor units can be positioned to minimize the impact on the buildings appearance.

Guest room air conditioning with excellent comfort, energy saving and easy installation

Space saving

Mini duct type with 198 mm height and 450 mm depth. This can be installed in narrow ceiling space easily.

Mini Duct

Card key switch available

Using the card key prevents you from forgetting to switch off the air conditioner.

Use of an external connect switch

Comfortable airflow from vertical louvre movement

The Auto Louvre Grille Kit achieves comfortable airflow by adjusting the air direction.

Auto Louvre Grille Kit

Centralised control of air conditioning in shared spaces

Air conditioning in shared spaces such as lobbies and hallways is controlled centrally. Temperature and operating conditions can be managed without the adjustment by guests.

Simple Remote Controller with sophisticated design

Suitable for hotels or offices as it is easily operated with no complex functions.

Large LCD screen & simple operation buttons White coloured backlight on monitor enable easy operation in dark.

Large space air conditioning in the reception and lobby

Ultra-large duct type single split system suitable for large spaces with high ceilings

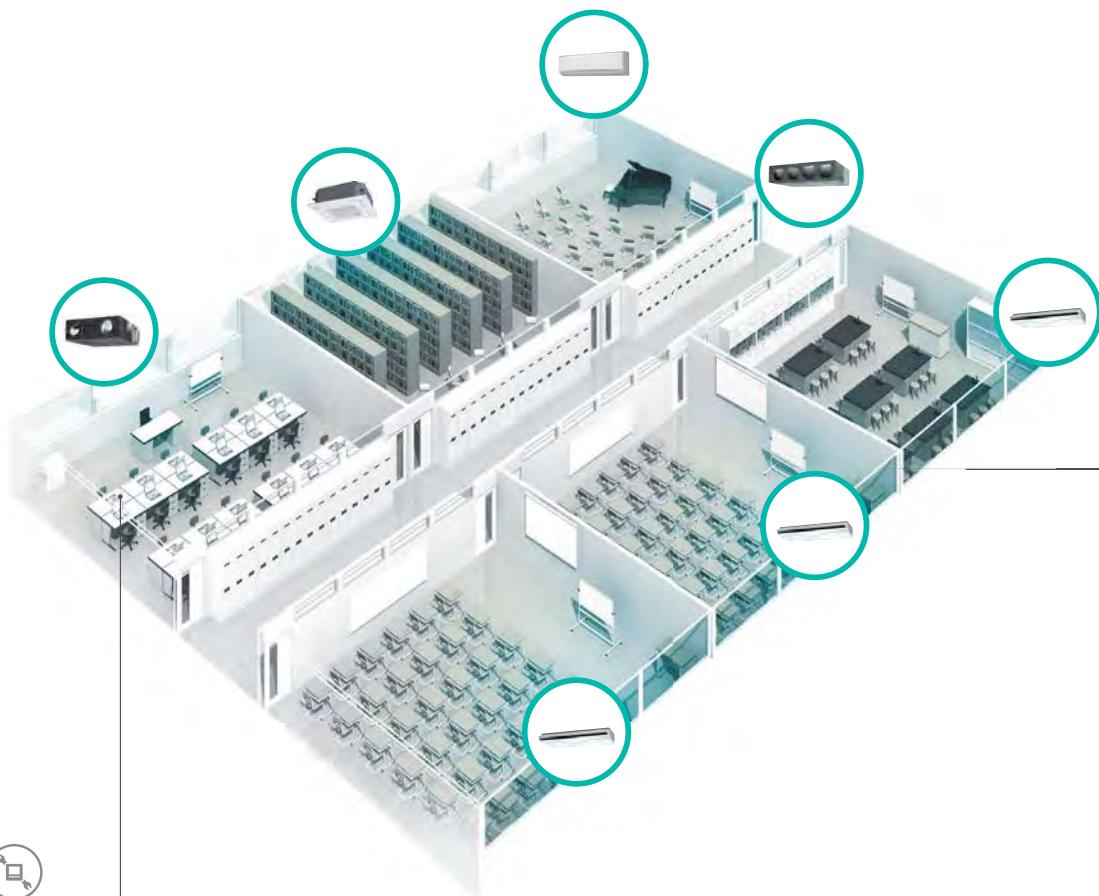

School

For Light Commercial

Fujitsu General provides the optimal number of connected indoor units for mid-sized educational institutions. The degree of freedom of the installation location is improved with a compact design that minimises the installation area.

Centralised control of both air conditioning and ventilation equipment

It is possible to perform centralised control including the operation of lighting and ventilation equipment in addition to air conditioners. This is useful in energy saving management over the whole building.

Mini Duct

Medium Static Pressure Duct

Ceiling

Wall Mounted

Circular Flow Cassette

Comfortable room air conditioning to all areas of the room

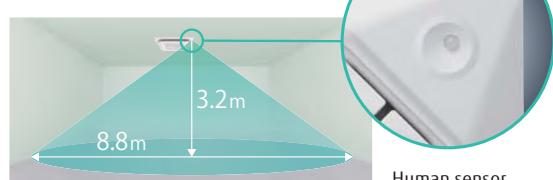

Circular Flow Cassette blows out in all directions without temperature unevenness

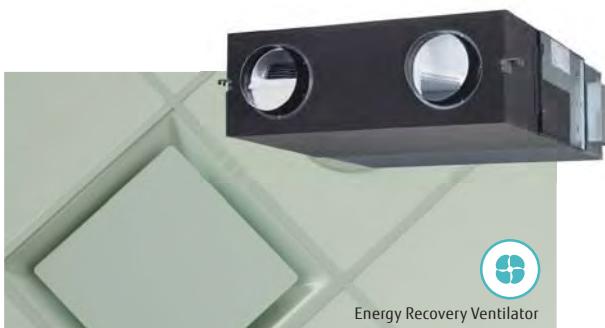

Individual airflow direction control to prevent people from being exposed to airflow

The optional human sensor reduces running costs by controlling the indoor unit based on the occupancy of the room.

Human sensor (Option)

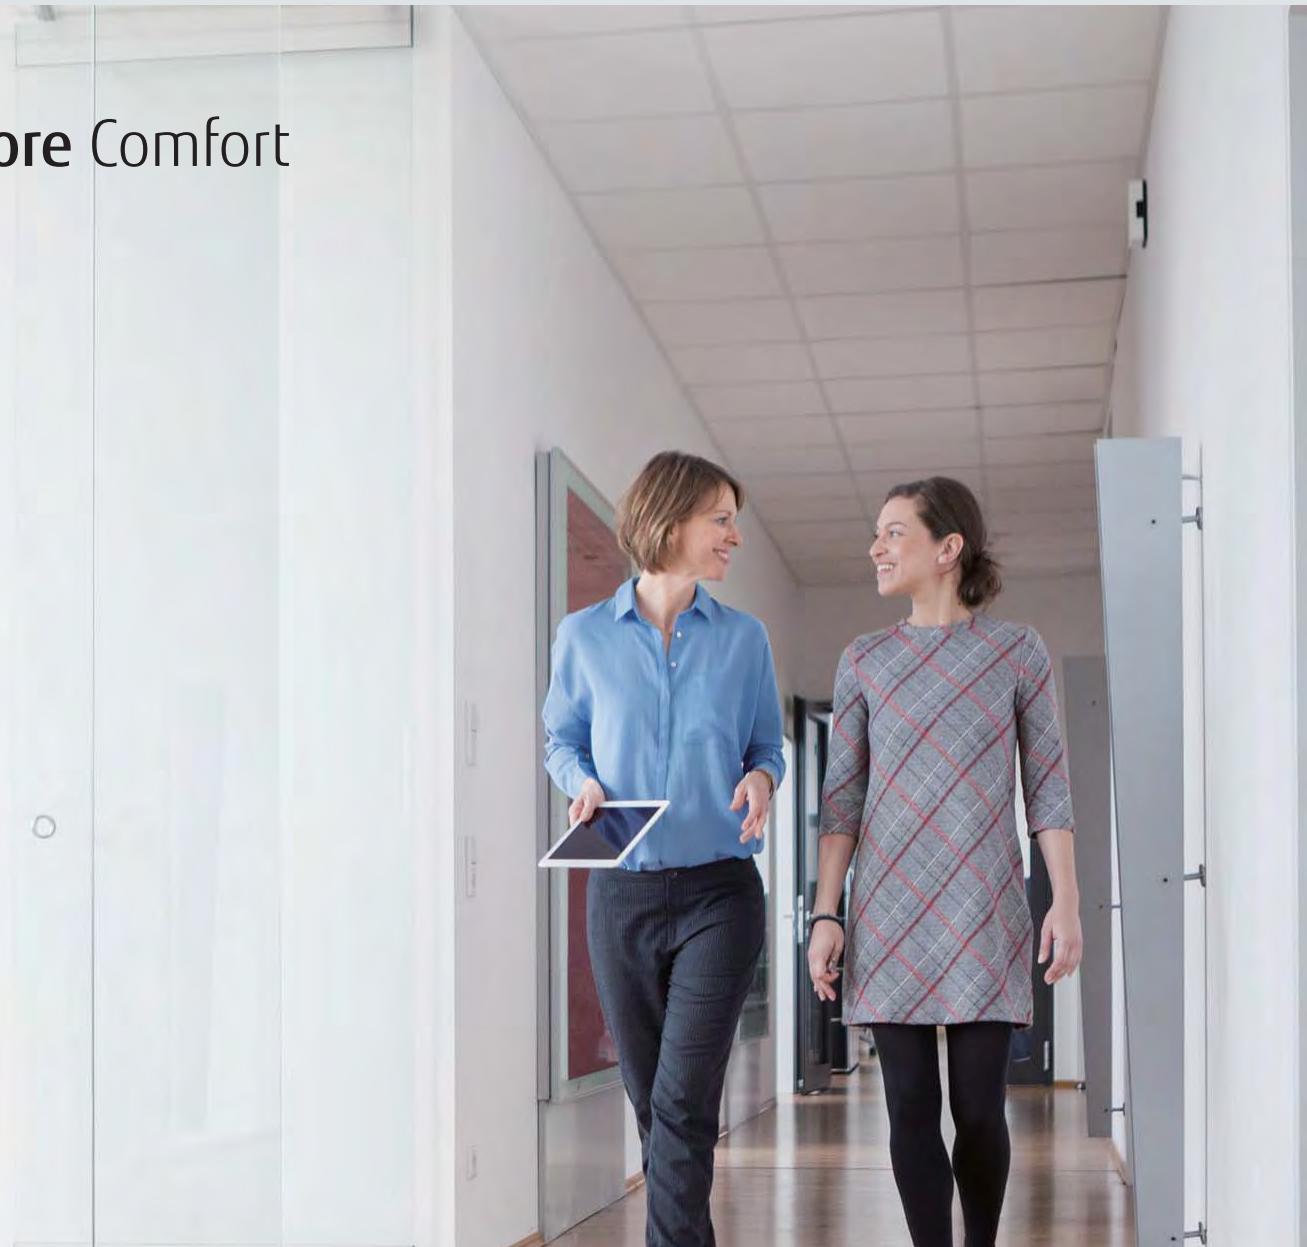

Energy Recovery Ventilator

Various indoor units

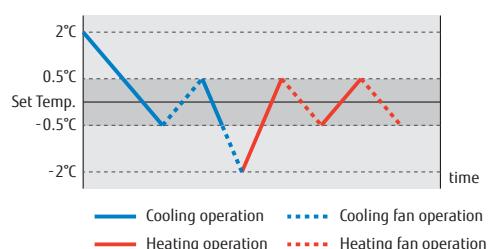

We have a lineup of indoor units suitable for even the most complex applications – from normal classrooms to special classrooms and auditoriums. .

More Comfort

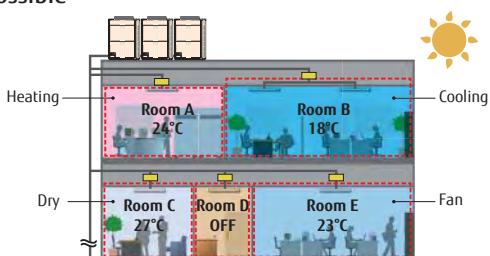

Auto changeover function

The cooling/heating mode is automatically switched according to the set temperature and room temperature.

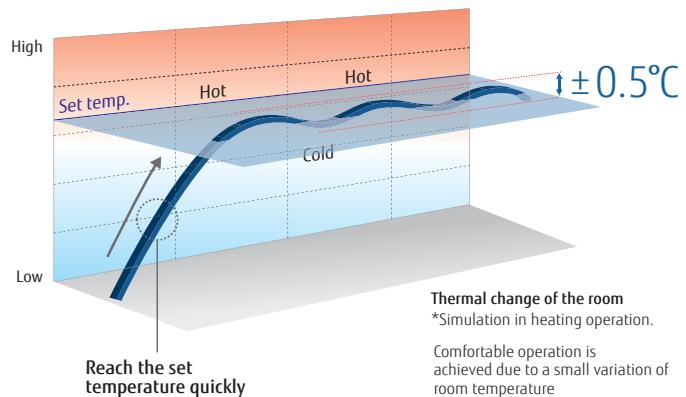

Auto changeover setting allows for the product to easily switch between cooling and heating modes regardless of the operation mode of other indoor units. This can be done via specific indoor unit with wired remote controller. This ensures comfortable operation all year round.

Automatic cooling/heating operation for each room is possible

Precision refrigerant flow control

Precise and smooth refrigerant flow control is achieved by using a DC Inverter control in conjunction with individual indoor unit electronic expansion valve control. This allows high precision comfortable temperature control of $\pm 0.5^{\circ}\text{C}$.

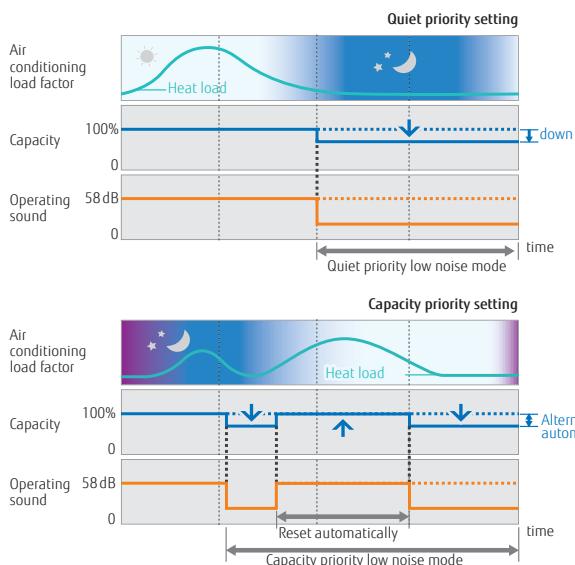

Quiet operation

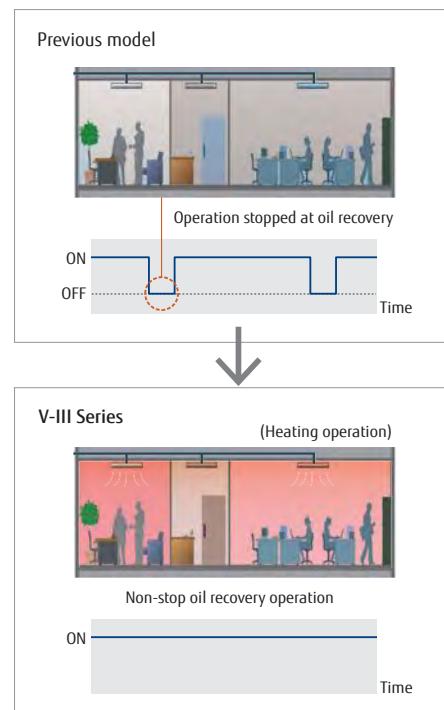

Quiet operation

Two low noise modes can be selected automatically by quiet priority setting and capacity priority setting depending on the indoor environment and outside temperature load. This feature can be controlled via outdoor unit external input and/or system controller.

Non-stop oil recovery operation

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

Low sound level design

Small capacity indoor units respond to the demand of several applications.

These models will be able to offer comfortable environment by operating at super low sound levels. Especially, Wall mounted (EEV external) type is 19dB(A) when low mode heating operation.

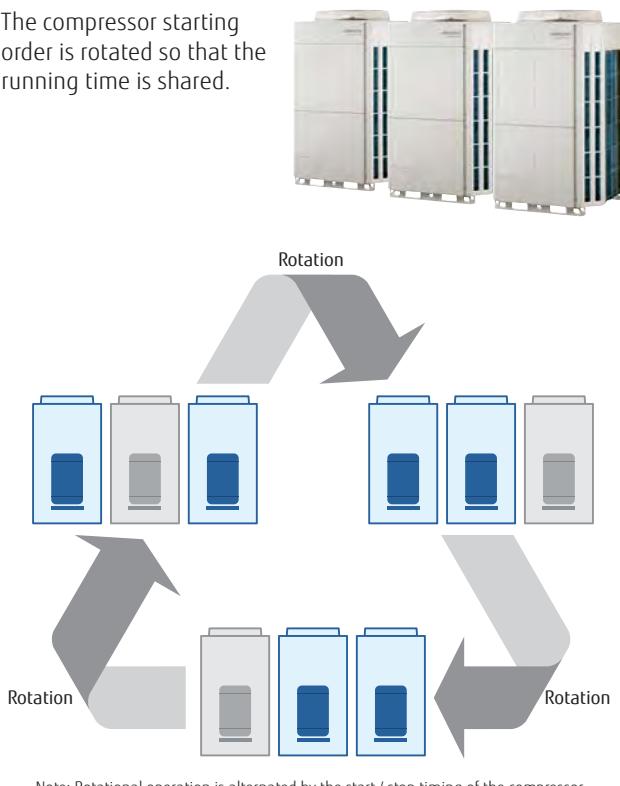

Small capacity indoor unit

19 dB(A)
At low mode
heating operation

High Reliability

Outdoor unit rotational operation

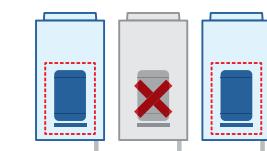

The compressor starting order is rotated so that the running time is shared.

Backup operation

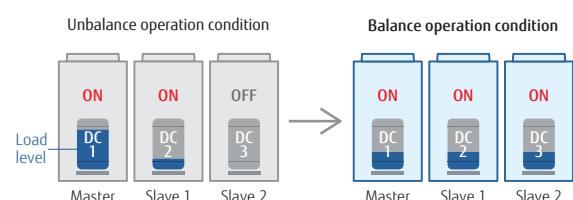

If one compressor fails, backup operation will be performed by the remaining compressors*.

*: Note: Backup operation may not be possible depending on the trouble state.

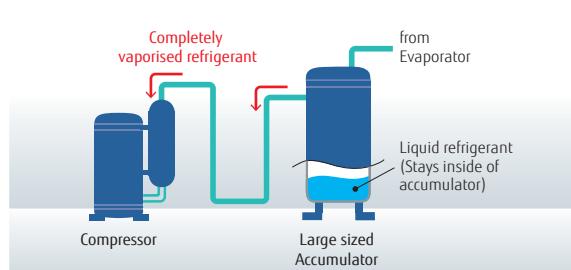

Advanced refrigerant control

Innovative compressor control logic has been introduced in order to balance the refrigerant mass flow rate of each outdoor unit by controlling the inverter speed.

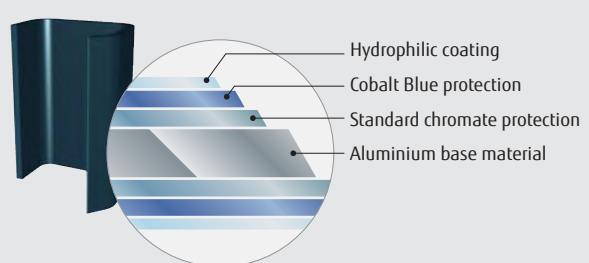

Liquid flow back protection

By adopting a large sized accumulator, any liquid refrigerant stays inside of the accumulator to ensure no liquid refrigerant is being fed into the compressor.

Adoption of blue fin heat exchanger

Corrosion resistance of the heat exchanger has been improved by the introduction of blue fin treatment to the outdoor unit's heat exchanger.

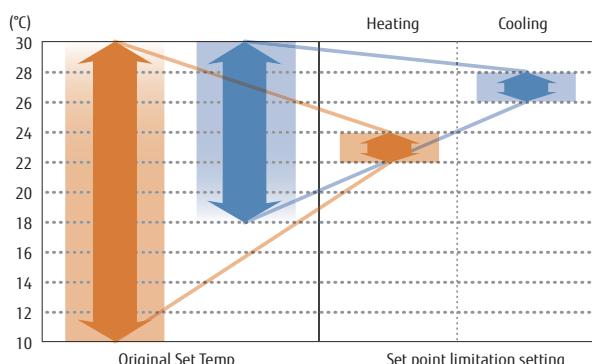

Operation Performance is Efficiently Controlled.

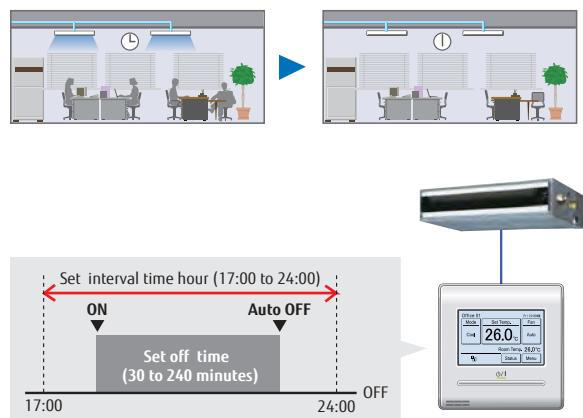

Room temperature set point limitation

The minimum and maximum temperature ranges can be limited, which provide energy saving while maintaining the comfort of the occupants.

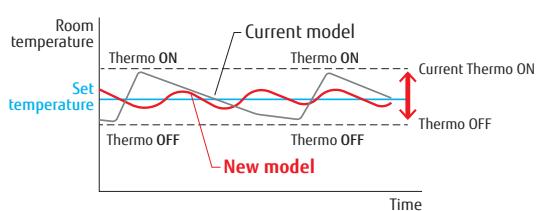

Auto-off timer

New wired remote controller is equipped with an OFF timer function that automatically stops operation when a fixed time has elapsed from the start of operation. This prevents wasted of energy.

New intelligent refrigerant control

New refrigerant control can be operated with suitable control corresponding to heat load of the room and can offer a more comfortable space. New refrigerant control can also provide more energy savings.

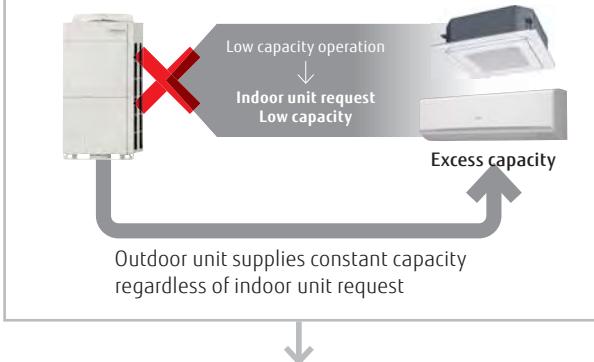

Current refrigerant control

Thermostat-ON/OFF occurs frequently.
→ The comfort is not good since room temperature often changes. Energy saving is not good since compressor is repeatedly starting and stopping frequently.

New refrigerant control

Room target temperature is maintained as thermostat-ON/OFF occurs less than Current control. Energy saving is also improved.

Current model

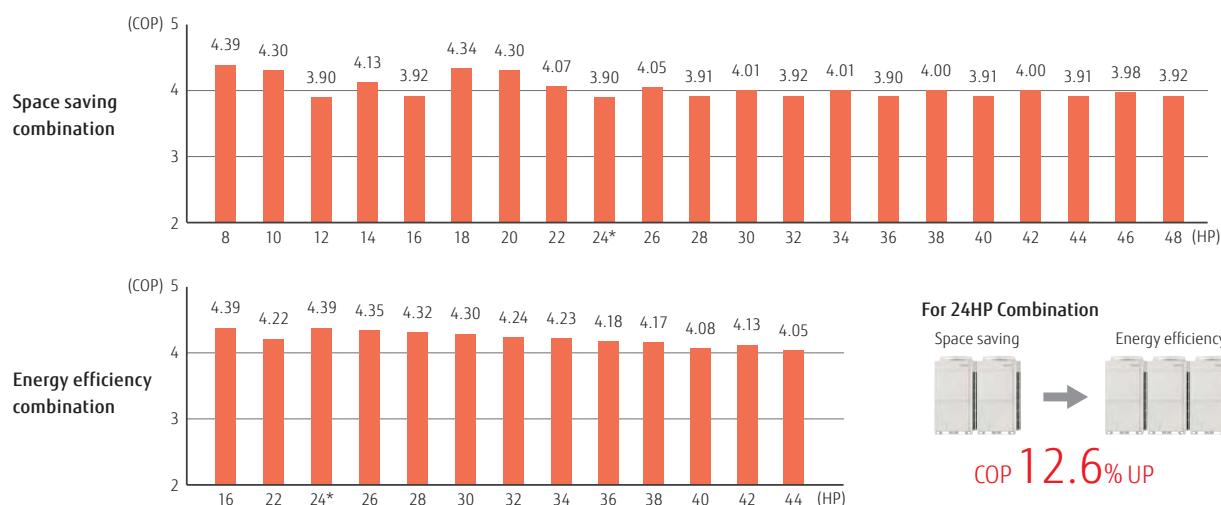

New model

Efficiency in actual operation

Top class high COP (Max. Heating) is achieved for all combinations by our unique heat exchanger structure, and highly efficient DC twin compressor.

All inverter compressor

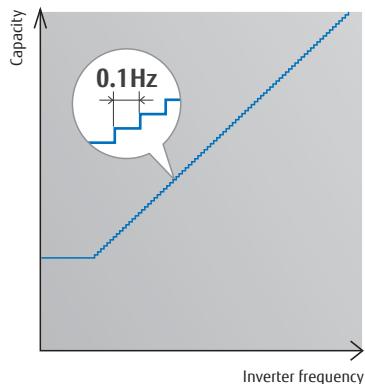

Large capacity DC inverter compressor

Large capacity highly efficient DC twin rotary compressor with excellent intermediate capability.

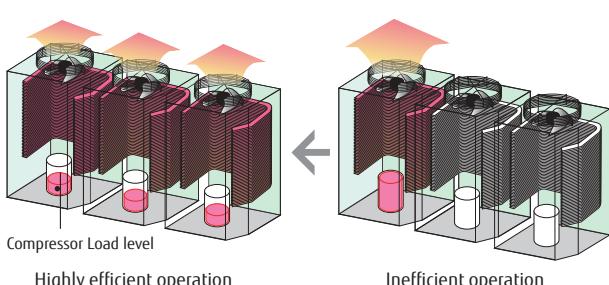

Highly efficient compressor speed control

Comfortable space with small room temperature changes energy efficiency is maximized by 0.1Hz steps compressor speed control.

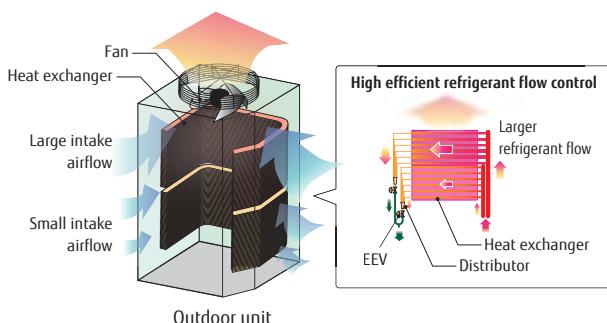

Multiple outdoor operation control

When multiple outdoor units are connected a sophisticated operation is performed by each compressor. Rather than running one compressor at full load and distributing refrigerant to one heat exchanger, this control method operates all compressors at part load and distributes refrigerant to all of the heat exchangers which allows for the overall system efficiency to be improved.

Heat exchanger refrigerant control

The heat exchanger in the outdoor unit is split into two parts (Top and Bottom). The efficiency of the heat exchanger has been improved by adopting an optimum refrigerant path control where the refrigerant is distributed more into the top heat exchanger as this is where there is a greater air flow intake.

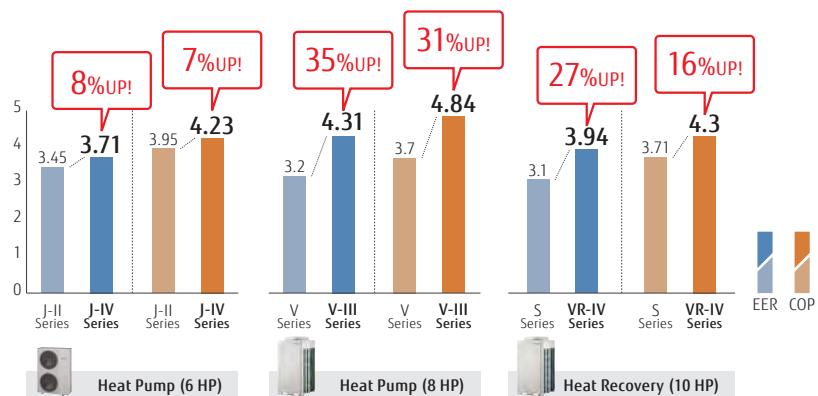

High Efficiency

Efficiency is improved significantly by using DC twin rotary compressor, inverter technology, and large heat exchanger

DC twin rotary compressor

[ALL DC] High efficiency design with top class SEER/SCOP

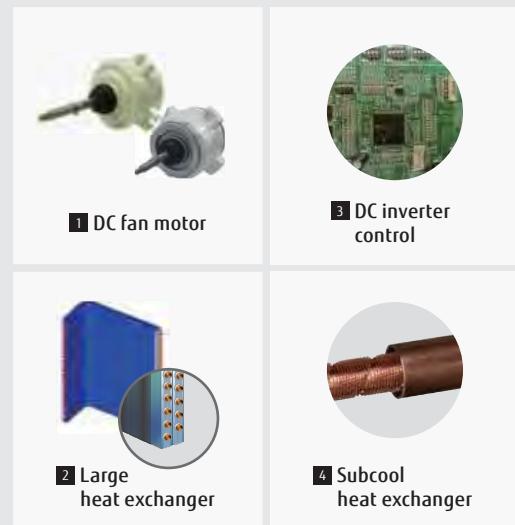

All VRF Series including J-IVL Series have DC technology to realise the high efficiency operation. This enhances the durability and reliability of VRF Series.

Design Flexibility

Top class Compact design

Compact outdoor units are at the top of the class in the industry with a optimal compact design. (Up to 18 HP)

AIRSTAGE™ J Series Compact Outdoor Unit

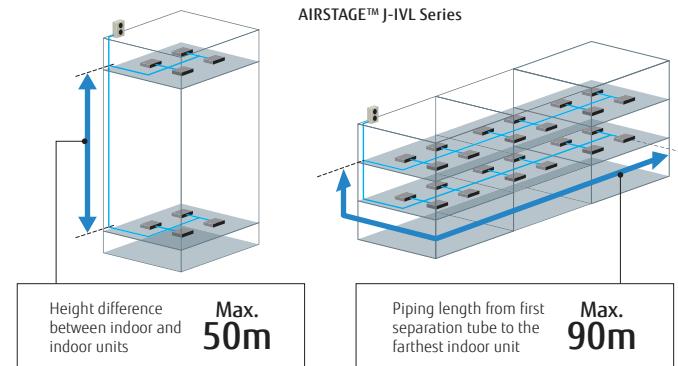

Long piping design

Piping design suitable for long, narrow office buildings with a large elevation difference are also possible.

(AIRSTAGE™ J-IVL Series)

AIRSTAGE™ J-IVL Series

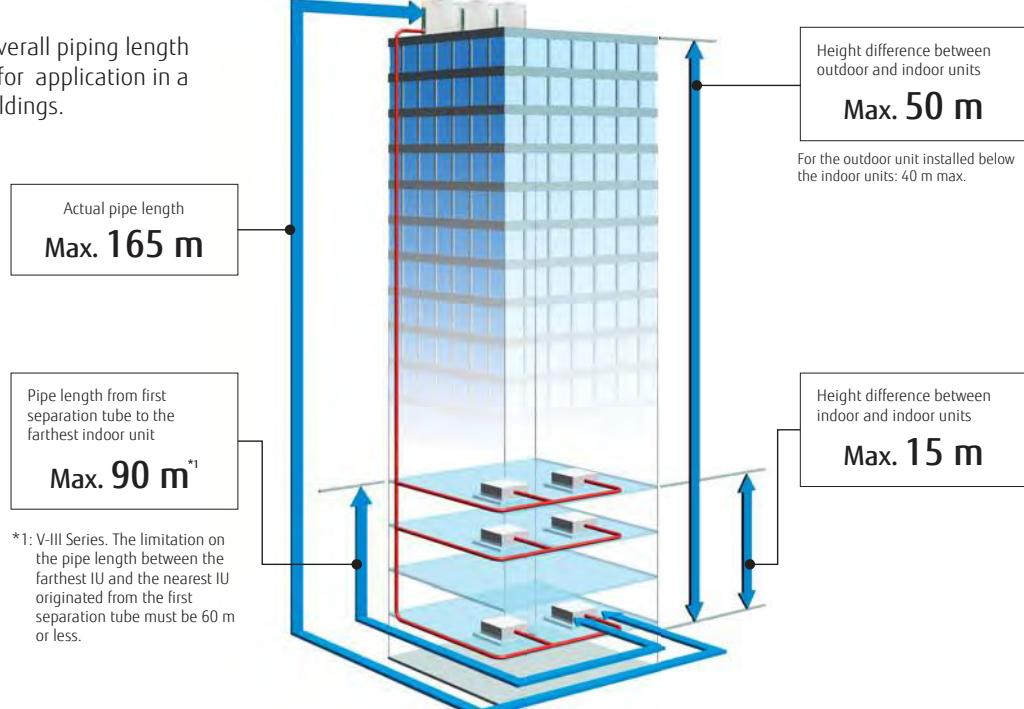

Overall piping length Max. 1,000 m

World's top class overall piping length of 1,000 m allows for application in a wide variety of buildings.

AIRSTAGE™ VR-IV Series & V-III Series

High capacity connection

Series	Connectable indoor unit capacity range	Connectable indoor unit number
AIRSTAGE™ J-I VL Series 14/16/18 HP Heat Pump type	50% to 150%* ²	up to 42* ⁴
AIRSTAGE™ J-I VL Series 8/10/12 HP Heat Pump type	50% to 150%* ²	up to 30* ⁵
AIRSTAGE™ J-I VS Series Heat Pump type	50% to 150%* ²	up to 14* ⁶

AIRSTAGE™ VR-IV Series Heat Recovery Modular type	25%* ⁷ to 150%* ²	up to 64
AIRSTAGE™ V-III Series Heat Pump Modular type	50% to 150%* ³	up to 64

*2: Conditions of maximum connectable indoor unit capacity ratio is as the chart.

*3: Max. capacities in the combinations including the 18 HP outdoor unit fall below 150%.

*4: J-I VL Series 18 HP model only.

*5: J-I VL Series 12 HP model only.

*6: J-I VS Series 6 HP model only.

*7: For modular type, 25% to 49.9% operation in the entire system is available. (by one unit operation)

Designed for low refrigerant charge

Optimal design of indoor unit and outdoor unit reduces the refrigerant volume and special detection is not required even when installing in a small room of about 15 m².

Various optional parts

- Intake fresh air with our Fresh Air Intake kit
- Comfortable temperature control with a remote sensor
- Operation by linking up to ventilation equipment and air handling unit with the DX-Kit

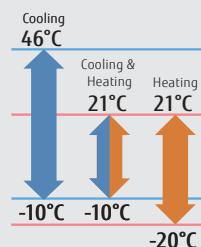

Low ambient operation

Refrigeration cycle technology allows cooling operation even at -15°C.

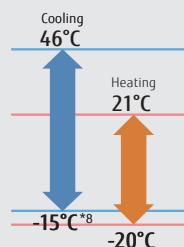

Wide operating range

Installation in extreme temperature conditions is possible due to an increase in operational range.

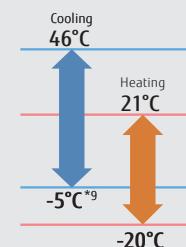

AIRSTAGE™ VR-IV Series
Heat Recovery

AIRSTAGE™ J-I VL Series
Heat Pump type

AIRSTAGE™ J-I VS Series
Heat Pump type

*8: Note: When a multiple outdoor unit connection is used, operating range is from -5°C to 46°C in cooling.

*9: Only when all indoor units are 5.6 kW or more in the system, the operation range is -15°C to 46°C.

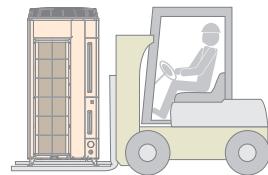

Easy Installation

Easily transported

Easily craned using lifting belt hooks
Design of outdoor unit allows for lifting straps to be used

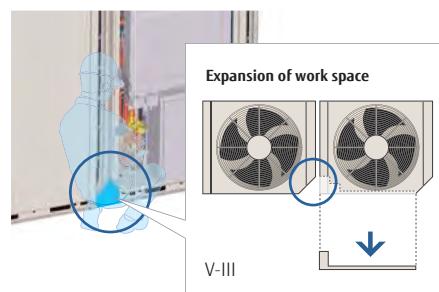

Transporting by forklift
Transport with forklift is possible.

Can be transported in a small elevator

Easy access

By adopting a L-Shape front panel that can be removed, the workspace for installation and service has been significantly expanded by this new design. For multiple installations, work is performed easily and efficiently even in a narrow space.

J-IVL

Reduced installation intervals by front access

Flexible piping connection

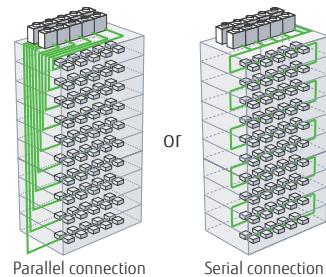

Piping and wiring are available to the front, left and right, and bottom.

Simple wiring work

Installation of the wiring systems is made easier as the communication wiring can be installed in parallel or in series between the indoor, outdoor and RB units.

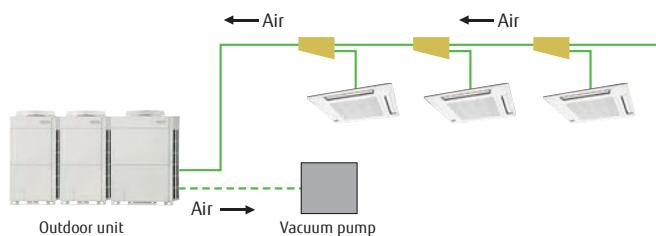

Up to maximum length
3,600 m

Note: Serial connection can't use the automatic address setting in a multiple refrigerant system.

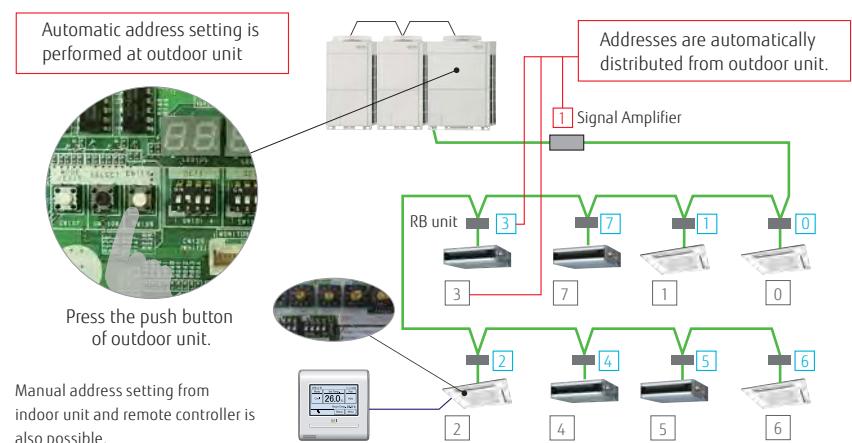

Easy evacuation - using vacuum mode function

The vacuum mode function enables all expansion valves of indoor units to be fully opened, making it easy to evacuate all the air inside pipe lines and indoor units.

Automatic address setting

The address of the indoor unit, RB unit and signal amplifier through the automatic function setting on the outdoor unit PCB.

Easy commissioning by Service Tool

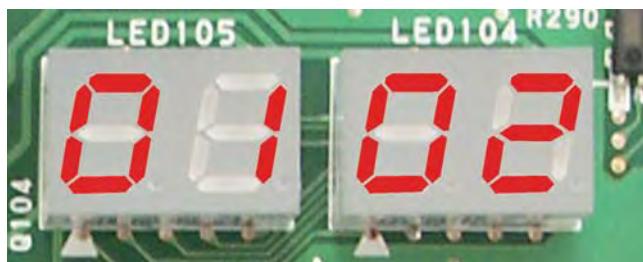

Service tools can be used to check the refrigerant temperature, pressure, and the operating status of the electronic expansion valve, making it easy to determine whether the units are connected properly.

Easy Service & Maintenance

Design for Easy Maintenance

7 segment LED is used to make it easy to check the details about the function setting status, refrigerant temperature, pressure, compressor operation time, and other factors for each model to make it easy to perform self-diagnostics.

Easy to read 7-segment LED :

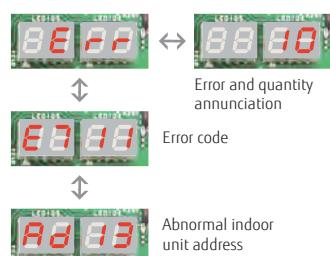

Confirm detailed operational and error status without using any specific equipment.

Error status can be checked easily by outdoor unit display

- Operation mode status
- Discharge temperature/Pressure status
- Compressor operation indication
- Address/type/number of outdoor unit

Movable PCB panel

Easier for maintenance work behind the PCB

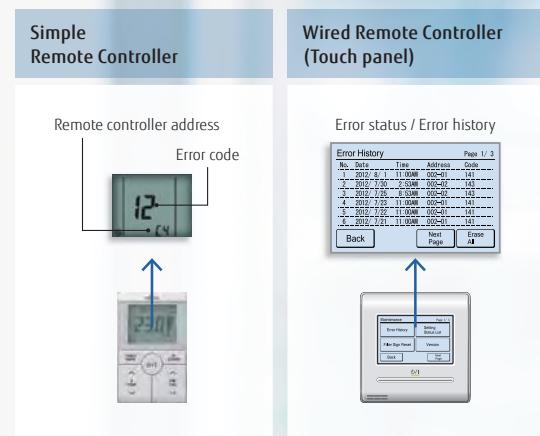

- Error status can be checked easily by outdoor unit display

Error status can be checked easily via the indoor unit wired controller

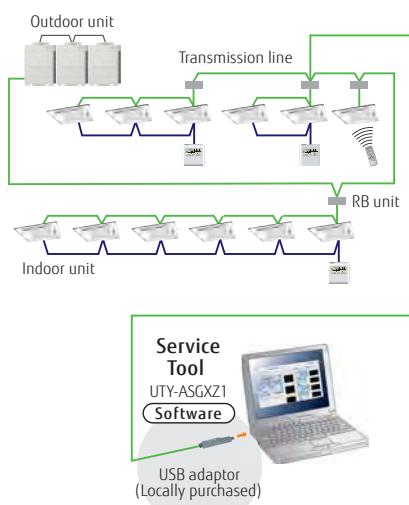

An error code is displayed on a liquid crystal screen.

Error diagnosis by Service Tool

Connection to Service Tool

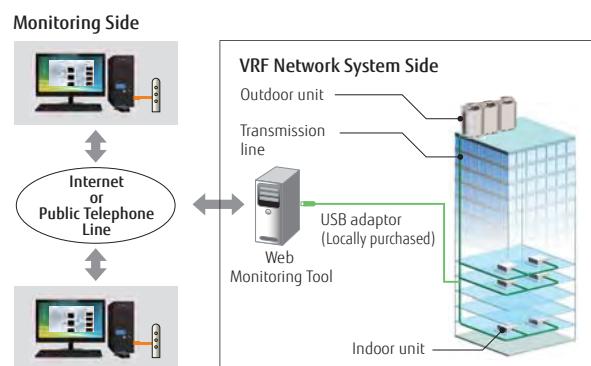

- Detailed operation status and recent error history can be checked and analysed by using the Service Tool.
- Last 5 min. operation memory can also be recorded.

Remote monitoring

The Web Monitoring system allows you to view system operation anytime over the internet, ensuring issue free operation.

The operating VRF network system in the building can be monitored real time over the Internet.

AIRSTAGE™ J Series Overview

Fujitsu General provides air conditioning systems for a wide range of applications from small office buildings and hotels to large stores, houses.

NEW

Max. 18 HP Heat Pump

AIRSTAGE™ J-IVL

J-IVL is an outdoor unit with a slim design offering a high degree of freedom of installation that is recommended for mid-size office buildings and hotels. Furthermore, you can connect up to 42* indoor units with the newly added 14/16/18 HP models. 14/16/18 HP models are also ideal for hospitals and educational facilities with many rooms.

*: 18 HP model

Slim Outdoor Unit

Although this is a 14/16/18 HP model that can handle slightly larger requirements, it has a slim depth of 480 mm. This model can be installed even in limited spaces.

Small room application

Up to 30-42 indoor units can be connected by the optimum heat exchanger structure. Available to various small rooms.

Top Class Low Operating Sound

Low operating sound levels are achieved making the unit suitable for densely populated areas.

NEW

Max. 6 HP Heat Pump

AIRSTAGE™ J-IV

J-IV allows the system to connect up to 13 indoor units. This model is suitable for small buildings and residential applications.

High Energy Efficiency

Heat pump inverter control is used to achieve an efficient cooling and heating operation with any indoor unit combination.

Flexible systems for small- and medium-size buildings air conditioning

Space saving design and long piping design allow flexible installations on the roofs or balconies of small and medium-size buildings. Multiple indoor units of various capacities and types can be connected.

NEW

Max. 6 HP Heat Pump, Compact Design

AIRSTAGE™ J-IVS

J-IVS has a compact design with a height of 998 mm that does not obstruct visibility even when installed near waist-high windows. This model is also ideal for large houses, retail stores and other properties.

Space saving and low sound level design

Economical individual air conditioning is realised by ALL-DC technology, large capacity DC twin rotary compressor, and the compact 3-row heat exchanger.

Flexible systems for homes, shops, small-size buildings air conditioning

Due to compact size design and flexible piping design, the J-IVS Series can be installed easily at the place where the installation space is limited such as homes, shops, and small offices. Multiple indoor units of various capacities and types can be connected.

8-12 HP models

14/16/18 HP models

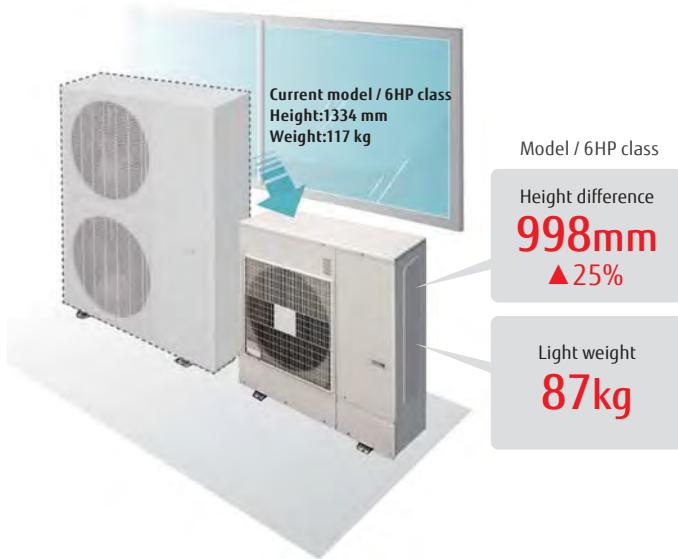

Heat Pump

for Small Capacity Type

AIRSTAGE™ J-IVS

It Can be Easily Positioned and Installed

Small and light weight outdoor unit

This model is much more compact than conventional 6HP comparable outdoor units. Even when installed on the balcony it fits within the height of the fence. The compact size with a height of less than 1 m allows it to be installed under windows and in tight spaces

Low sound level design

Significantly low sound level is realised by using DC twin rotary compressor, inverter technology, and advanced airflow structure design.

Long piping length

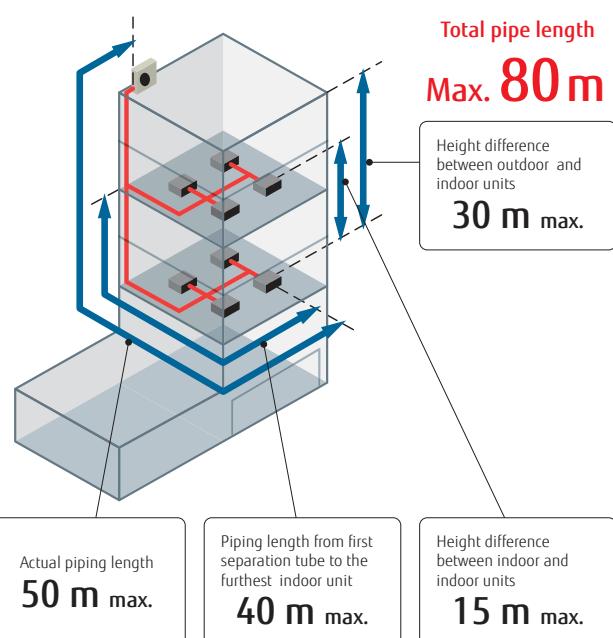

Our advanced refrigerant control technology allows us to achieve a total refrigerant piping length of 80 m. This opens up possibilities in system design.

Up to 13 units* can be connected

Improvements in the design of the outdoor heat exchanger combined with our new 1.1kW indoor units mean that up to 13 indoor units can be connected.

(Unit : mm)

Heat Pump for Small Capacity Type

Long Piping Length

Our advanced refrigerant control technology allows us to achieve a total refrigerant piping length of 400 m. This opens up new possibilities in system design.

Up to 40 units* can be connected

Improvements in the design of the outdoor heat exchanger combined with our new 1.1kW indoor units mean that up to 40 indoor units can be connected.

*: 16 HP model.

*: Only when new indoor units and J-III L series are combined

High Static Pressure

External static pressure is available up to 60Pa for 14/16HP. (20Pa for 8/10HP, 30Pa for 12HP)

Top Class Low Operating Sound

Low operating noise level make the units suitable for locations where sound levels are important.

Sound Power Level

AIRSTAGE™ V Series Overview

AIRSTAGE™ V Series Systems can be designed to effectively provide an air conditioning solution from a large domestic residence through to a large scale commercial building.

NEW

Max. 48 HP Heat Recovery AIRSTAGE™ VR-IV

Smart and cutting-edge design.
Extensive lineup from 8 HP to 48 HP in 2 HP increment.
Connectable indoor unit capacity ratio up to 150%

Simultaneous cooling and heating operation using 1 refrigerant system

Cooling and heating can be freely selected for each indoor unit to provide simultaneous cooling and heating in rooms with different temperature requirements.

Annual cooling operation

Use annual cooling operation for the rooms and other spaces that require constant temperature control throughout the year.

Handles changes in the temperature difference

The operation mode can be freely changed when there are large temperature differences during the day, such as between seasons.

VRF

Max. 54 HP Heat Pump

AIRSTAGE™ V-III

Smart and cutting-edge design.
Extensive lineup from 8 HP to 54 HP in 2 HP increment.
Connectable indoor unit capacity ratio up to 150%

Excellent energy saving

Heat pump inverter type achieves high energy savings for individual cooling and heating operation by all inverter technology for seasonal efficiency.

High design flexibility for various building air conditioning

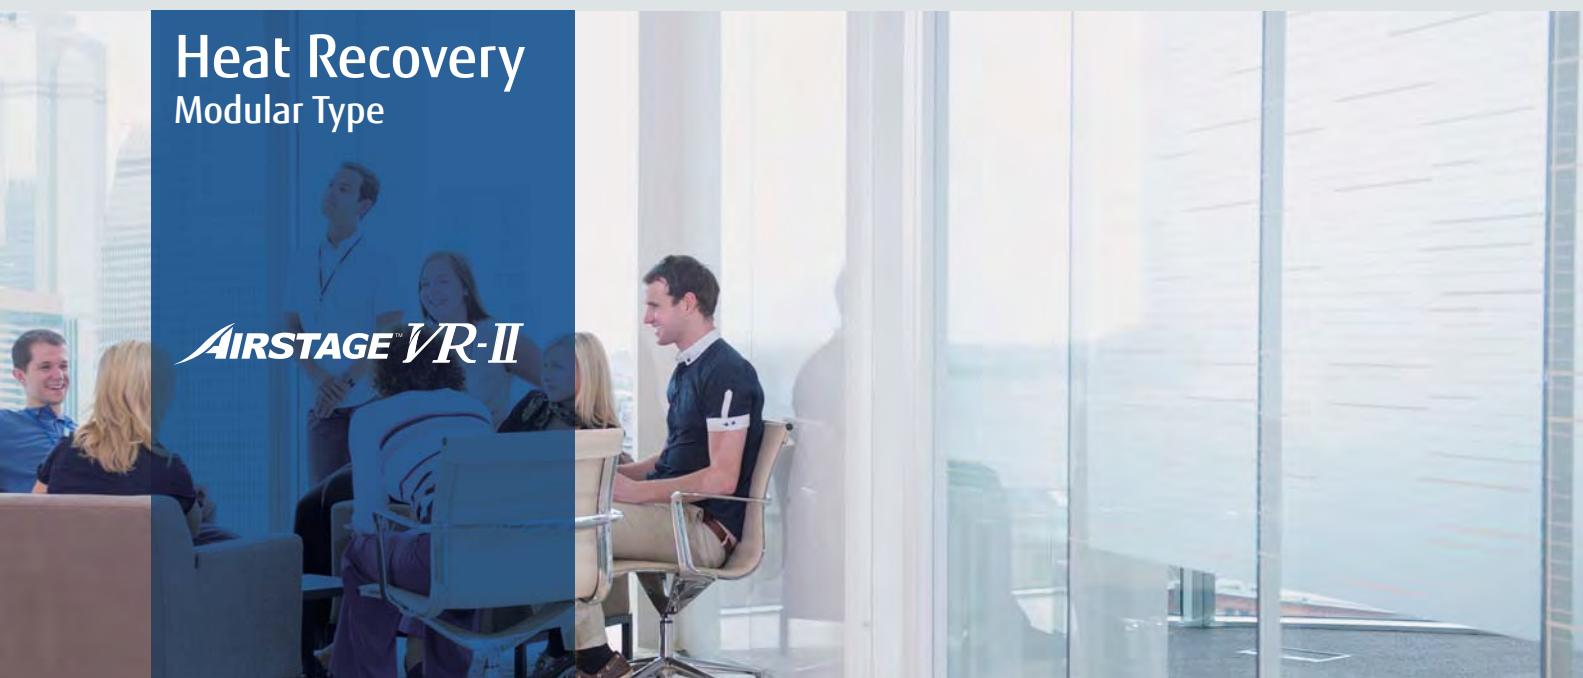

High design flexibly meets the various needs of high-rise building air conditioning such as outdoor unit roof top concentrated installation and each floor installation by large capacity combination, sufficient connection capacity, and high static pressure design.

Easy installation and maintenance

The flexible communication method and piping connections make installation and maintenance easy even for large systems.

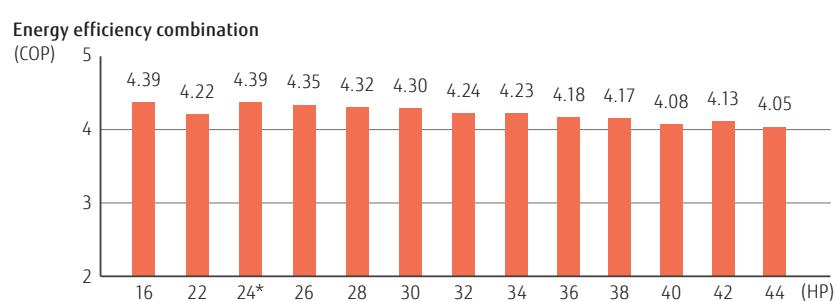

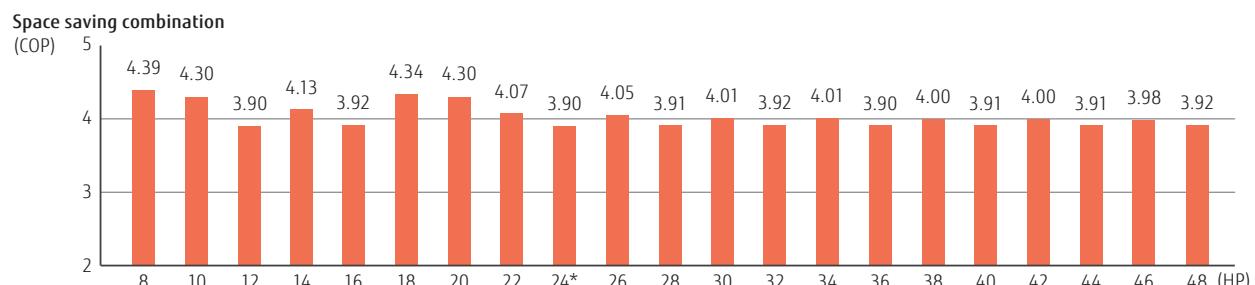

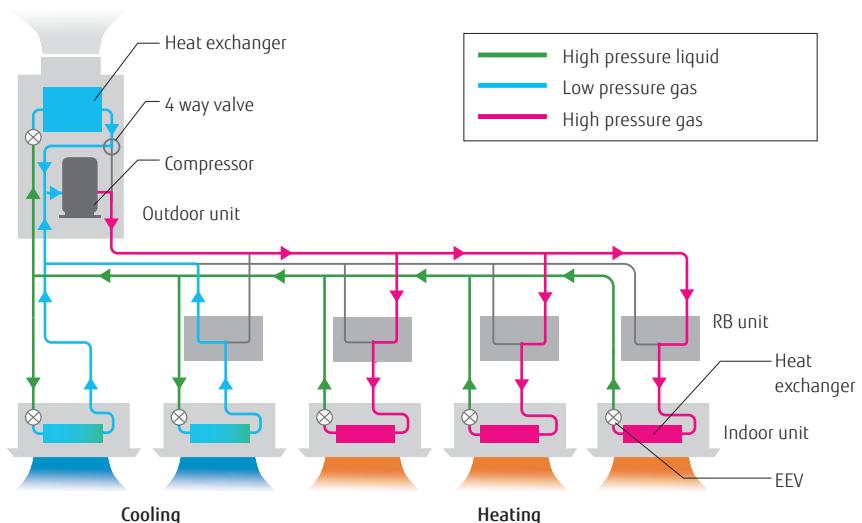

Heat Recovery Modular Type

AIRSTAGE™ VR-II

High Operating Energy Efficiency

Our Heat recovery systems achieve high operating energy efficiency by drawing heat from the room to be cooled and transferring it as energy for rooms that are to be heated.

For 24HP Combination

Space saving → Energy efficiency

*1: Minimum connectable indoor unit number is 2.

*2: The noise value is the value when measured in an anechoic room. When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

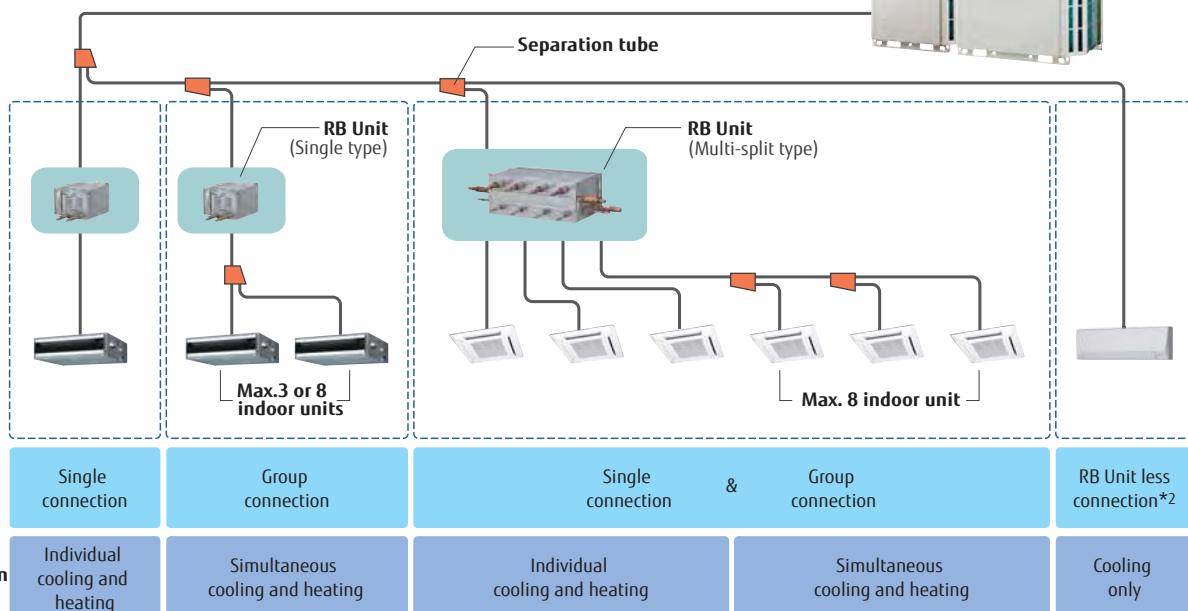

Heat Recovery

Modular Type

AIRSTAGE™ VR-IV

Flexible piping connection

Flexible refrigerant piping work is possible by the use of various piping and RB Unit connections, allowing for adjustments to the floor layout and building structure.

* The RB unit can be freely positioned between the first branch and the indoor unit.

* The maximum height difference between RB units is 15 m.

*2. RB Unit is not necessary for cooling only use.

Note: Specifications are based on the following conditions.

Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating: Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length: 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C,

the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

*1: Minimum connectable indoor unit number is 2.

*2: The noise value is the value when measured in an anechoic room. When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

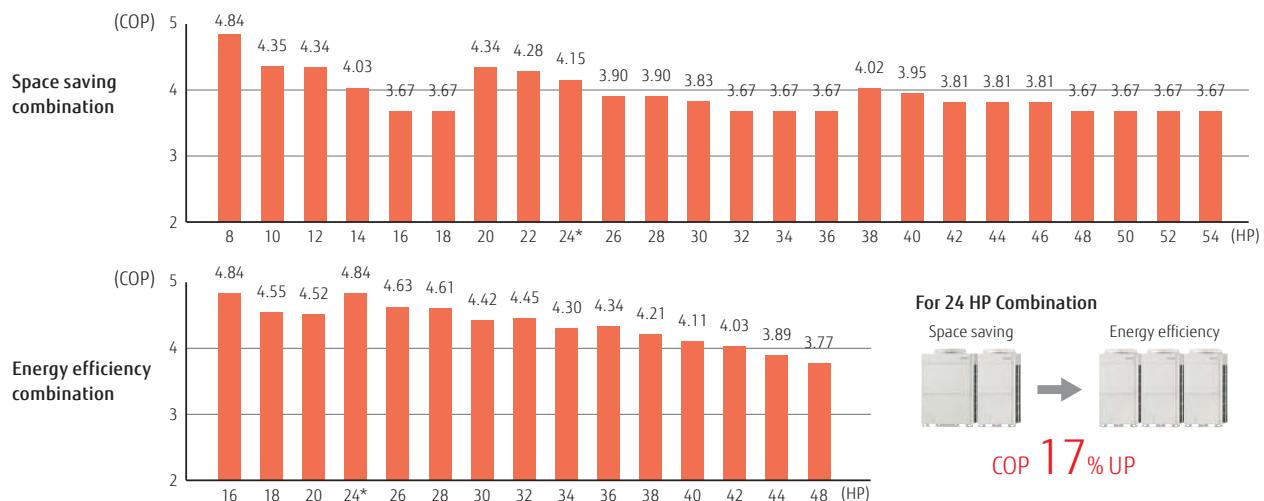

*3: When the connectable indoor unit capacity range is 25% to 49.9%, do not open the three-way valve except for the operating one unit. In addition, do not connect the power line.

Heat Pump Modular Type

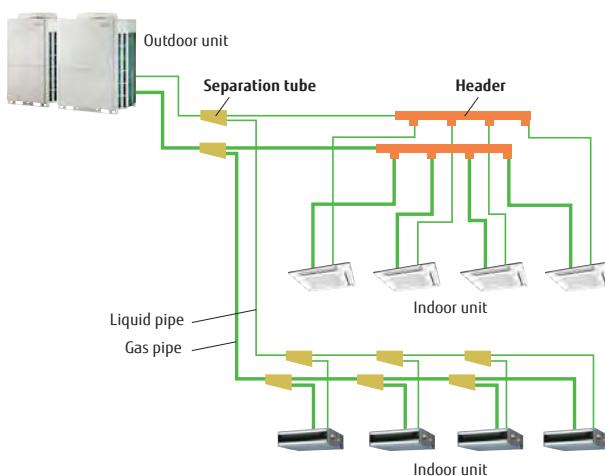

Efficiency in actual operation

Top class high COP is achieved for all combinations by our unique heat exchanger structure, highly efficient DC twin compressor.

System configuration example

- This system is used for medium-sized and large buildings. Connecting each outdoor unit makes it possible to create a high capacity system.
- Connection of multiple indoor units using separation tubes and headers.

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

When cooling operation will be conducted at outdoor air temperature below -5°C,

the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

*1 Minimum connectable indoor unit number is 2.
However, ARXC72 and ARXC90 can be used single connection.

*2 The noise value is the value when measured in an anechoic room.
When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

Wired Remote Controller (Touch Panel)

UTY-RNRYZ3

SPLITS/MULTI/VRF

Max. Controllable
16 indoor units

Max. Controllable
1 Group

Easy operation by high-definition large STN-LCD touch panel screen

- Easy finger touch operation with LCD panel
- Built-in weekly/daily timer (ON/OFF, Temp., Mode)
- Backlight enables easy operation in a darkened room
- Room temperature display
- Control up to 16 indoor units
- Corresponds to 12 different languages (English, Chinese, French, German, Spanish, Russian, Polish, Italian, Greek, Portuguese, Turkish and Dutch)
- 2-wire type

Specifications

Model name	UTY-RNRYZ3
Power Source	DC 12 V
Dimensions (H × W × D) (mm)	120 × 120 × 20.4
Weight (g)	220

DC 12 V is supplied by the indoor unit.

High performance and compact size

In addition to the individual control, weekly timer, and various energy saving controls can be realised using one remote controller only.

Compact Wired Remote Controller

UTY-RCRYZ1

SPLITS/MULTI/VRF

NEW

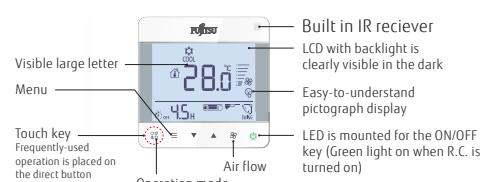

Max. Controllable
1 single indoor unit

Max. Controllable
1 Group

- Simple design to match the stylish interior
- Easy to install : Body of controller is designed to fit in European standard junction box
- Can be operated both by wireless and wired remote controller.
- 2-wire type

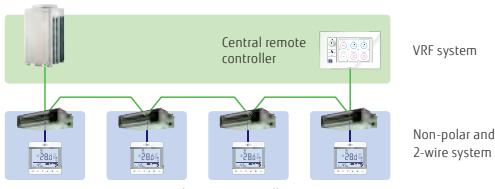

Large screen and simple display

- Although the size is compact, the screen is large
- Large letters makes it easy to see
- Operation is simple and easy-to-understand

System overview

VRF connection

RAC connection

Specifications

Power Source	DC 12 V	DC12V
Dimensions (H × W × D) (mm)	120 × 120 × 17	86 × 86 × 44
Weight (g)	170	135

DC 12 V is supplied by the indoor unit.

Simple Remote Controller

UTY-RSRY / UTY-RHRY (Without operation mode)

SPLITS/MULTI/VRF

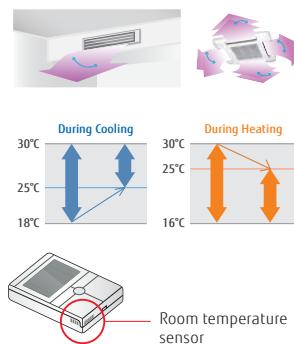

Max. Controllable
16 indoor units
Max. Controllable
1 Group

Compact remote controller provides access to basic functions

- Up to 16 indoor units can be controlled with one remote controller.
- Suitable for hotels or offices as it is easily operated with no complex functions.
- Stylish design: Simple design to match the stylish interior.
- Large LCD screen & simple operation buttons
- Backlight: White coloured backlight on monitor enable easy operation in dark.
- 2-wire type

Corresponding to various applications

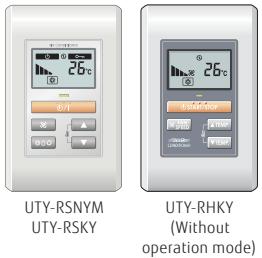

- Vertical louvre control:** Vertical air flow direction can be adjusted for Duct types with auto louvre and Cassette types, which are installed in hotels and conference rooms, can be adjusted.
- Room temperature set point limitation:** The Simple Remote Controller can manage to energy saving operation in small buildings without the central control unit.
- Built in room temperature sensor:** The Simple Remote Controller detects actual room temperature and controls room climate accuracy.

Simple Remote Controller

UTY-RSNYM, UTY-RSKY/UTY-RHKY (Without operation mode)

SPLITS/MULTI/VRF

Max. Controllable
16 indoor units
Max. Controllable
1 Group

Compact remote controller provides access to basic functions

- Up to 16 indoor units can be controlled with one remote controller.
- Suitable for hotels or offices as it is easily operated with no complex functions.
- Backlight enables easy operation in a darkened room.
- 3-wire type

Easy-to-use operation

- Provides access to basic operations, such as Start / Stop, Fan control, Operation mode switching, and Room temperature setting.
- A large On / Off button is provided in the centre of the remote controller for easy operation.
- Can be used jointly with another individual control unit.
- Following an error display, diagnostics can be carried out on the controller.

Specifications

Model name	UTY-RSRY	UTY-RHRY	UTY-RSNYM, UTY-RSKY	UTY-RHKY
Power Source	DC 12 V	DC 12 V	DC 12 V	DC 12 V
Dimensions (H × W × D) (mm)	120 × 75 × 19.4	120 × 75 × 19.4	120 × 75 × 19.4	120 × 75 × 14
Weight (g)	120	120	120	90

DC 12 V is supplied by the indoor unit.

MODBUS® Convertor for Indoor Unit

UTY-VMSX

SPLITS/MULTI/VRF

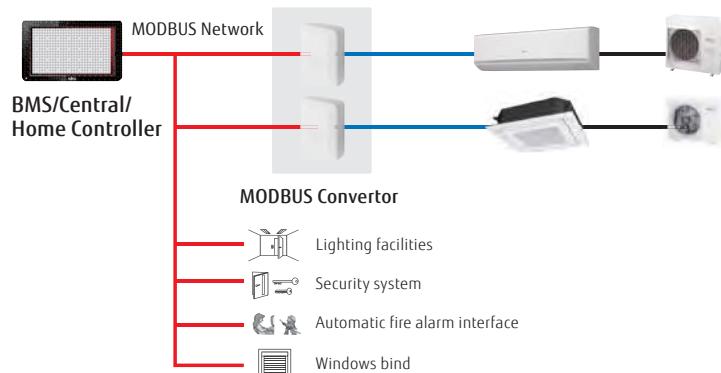

Max. Connectable

1 Single indoor unit

The MODBUS Convertor allows a complete integration of air conditioners into MODBUS Networks.

- Simple installation due to small and compact size.
- No separate external power supply required.
- The MODBUS Convertor must be connected one by one within the indoor unit.
- The MODBUS Controller permits central monitoring and control of air conditioners from BMS/Central/Home Controller.

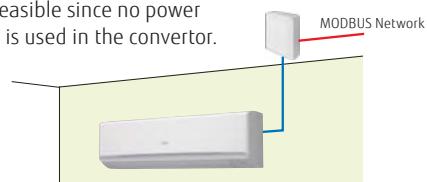

Basic control

- Turning the units on and off
- Mode control (Heat, Cool, Dry, Auto, Fan)
- Fan speed setting
- Louvre position (Airflow direction setting)
- Room temperature setting and display
- Economy mode setting
- Error status

Easy Installation

Flexible installation locations with neat wirings are feasible since no power supply cable is used in the convertor.

KNX® Convertor for Indoor Unit

UTY-VKSX

SPLITS/MULTI/VRF

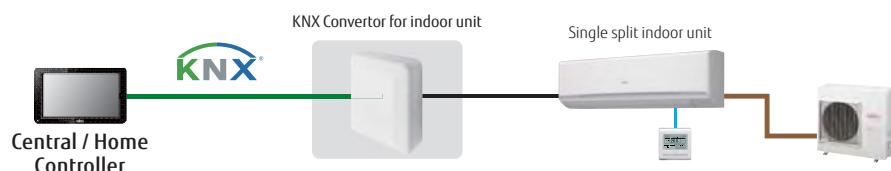

Max. Connectable

1 Single indoor unit

KNX Convertor is useful for individual control of indoor.

- New KNX Convertor enables to connect central/home controller and Fujitsu General indoor unit.
- Compact and light weight design

Specifications

Model name	UTY-VMSX
Power supply	DC 12 V
Input Power (W)	Max. 1.2
Dimensions (H×W×D)(mm)	140 × 117 × 43
Weight (g)	200
Maximum Connectable indoor unit number per 1 MODBUS Convertor	1

Modbus communication specifications

Transfer mode	RTU mode
Communication speed	9600/19200bps
Data bit	8
Parity	even/odd/none
Stop bit	1/2 (no parity)
Network	RS485
Maximum cable length	1000m (3280 ft)

Model name	UTY-VKSX
Power supply	DC 12 V
Power consumption (W)	0.6
Dimensions (H×W×D)(mm)	140 × 117 × 43
Weight (g)	215

Wireless LAN Interface

UTY-TFNXZ1 / UTY-TFSXZ1, UTY-TFSXW1, UTY-TFSXF2

SPLITS/MULTI/VRF

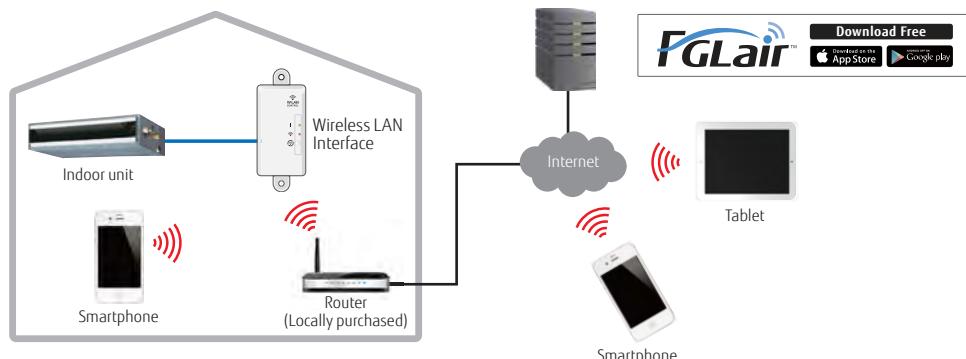

USB type for single split models
UTY-TFSXF2

Max. Connectable

1 Single indoor unit

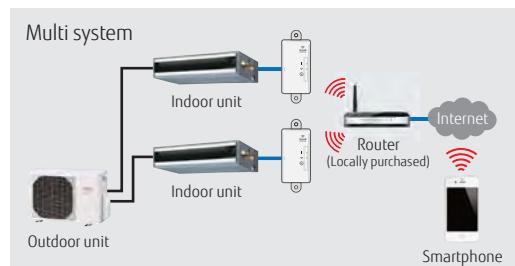

- Allows users to remotely manage an Air Conditioning system using all sort of mobile devices such as Smartphones, and tablets.
- No separate external power supply required
- Can be used for single indoor units and multi system indoor units

FG Lair Download Free
Available on the App Store Google play

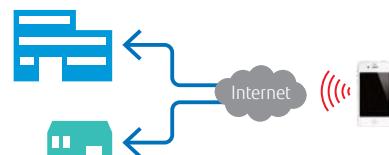

Basic control

- Turning the units on and off
- Mode control (Heat, Cool, Dry, Auto, Fan)
- Fan speed setting
- Louvre position (Airflow direction setting)
- Timer operation setting (Weekly timer)
- Economy mode setting

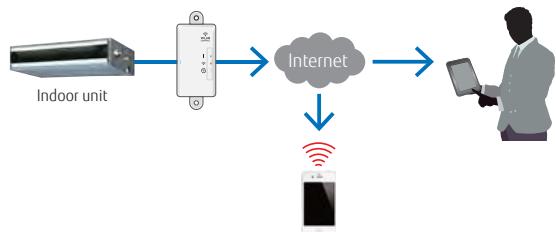

Multiple air conditioning management

- Multiple air conditioning management at difference locations.

Error display & E-mail notification

- Alerts e-mail notification
- Air conditioning malfunction display
- It enables rapid service response when error occurs.

Wireless LAN Interface (USB type)

UTY-TFSXF2

New compact USB type is available. Specialised installation work is not required and it can be installed to indoor unit easily.

Specifications

Model name	UTY-TFNXZ1 / UTY-TFSXZ1	UTY-TFSXW1	UTY-TFSXF2
Dimensions (H × W × D) (mm)	71 × 38 × 15	71 × 38 × 15	56.7 × 34 × 9.72
Weight (g)	35	35	30

Wired Remote Controller

UTY-RVNYM

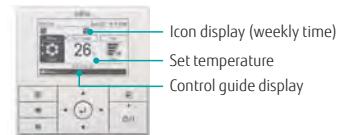

SPLITS/MULTI

Max. Controllable
16 indoor units
Max. Controllable
1 Group

Hi-grade individual control using various functions.

- 3.7-inch LCD backlight screen.
- Supporting various Energy Saving functions with simple operation.
- Multiple Language Support.
(English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)

High visibility and Easy operation

- Icon display of effectual functions.
- Main functions in large icons: "Mode", "Set Temp", and "Fan".
- Easy to operate by Control guide display.
- Simple operation with easy 4-way navigation pad.

High performance and compact size

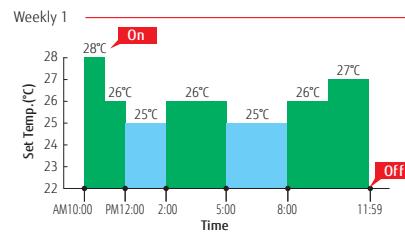

- In addition to the individual control, various energy saving controls can be realised using only one remote controller.

Various energy saving control

Weekly Timer function

- Can be set up to 8 times per day (On/Off, mode, Temp)
- 2 pattern settings(i.e. Summer/Winter setting) are available.

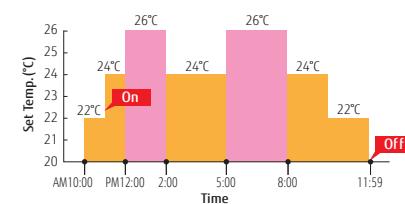

Setting menu in remote controller

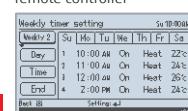

Auto OFF Timer

- Set Temperature Auto Return
- Set Temperature Upper and Lower Limit Setting

Setting menu in remote controller

Specifications

Model name	UTY-RVNYM
Power Source	DC 12 V
Dimensions (H × W × D) (mm)	120 × 120 × 21.3
Weight (g)	220

DC 12 V is supplied by the indoor unit.

External Switch Controller

UTY-TERX

Max. Controllable
1 group

Air conditioner switching can be controlled by connecting other sensor switches

- In combination with a field supply Card-Key Switch or other sensor, the External Switch Controller allows control of the ON / OFF, Room temperature, Fan speed and Master control functions. This makes this product suitable for installations such as hotel rooms.
- Card-key or other sensor switches are available as a locally purchased parts.
- The set temperature can be specified at two points for cooling and heating individually (4 points).

Specifications

Model name	UTY-TERX
Power Supply	DC 6.5-16 V
Dimensions (H × W × D) (mm)	140 × 117 × 43
Weight (g)	250

DC 12 V is supplied by the indoor unit.

Wireless Remote Controller

UTY-LNTY

Max. Controllable
16 indoor units

Max. Controllable
1 Group
Selectable
4 daily timers

Simple and sophisticated operations with a choice of 4 daily timers

- A single controller controls up to 16 indoor units.

Built-in timers

4 timer programs: On / Off / Program / Sleep
Program timer: Operates ON/OFF timer once within 24 hours
Sleep timer: Corrects the set temperature automatically during sleep time

Easy installation and operation

Code selector switch prevents indoor unit mix-up (up to 4 codes)
Wide and precise transmitting range

Specifications

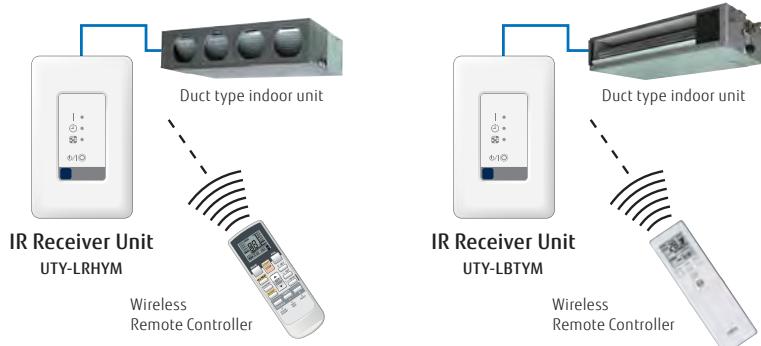

Model name	UTY-RNNYM	UTY-LNTY
Power Source	DC 12 V	DC5V
Dimensions (H × W × D) (mm)	120 × 120 × 18	145 × 90 × 30
Weight (g)	160	150

DC 12 V is supplied by the indoor unit.

SPLITS/MULTI/VRF

IR Receiver Unit for Duct

UTY-LRHYM, UTY-LBTYM

**SPLITS/MULTI**

UTY-DMMYM

MULTI

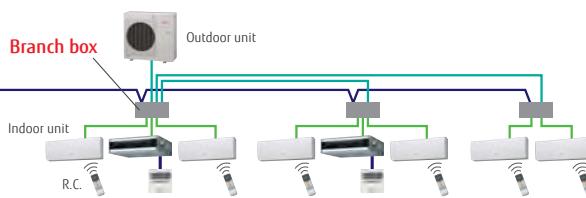

Max. Controllable
1 multi system

Max. Controllable
6 indoor units

For 5-unit, 6-unit, multi-split type

- Batched control of up to 8 indoor units. The temperature, airflow volume, and remote control prohibition settings of all indoor units can be batched.
- Corresponds to 9 different languages (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)
- Large backlight LED screen
- Large easy-to-see operation panel

System configuration

Branch Box: Address setting is not required*

When the indoor units are connected to a branch box, the address for each indoor unit is set automatically.

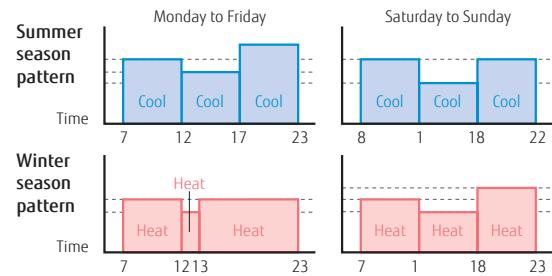

*Note: Cross-over connections are not allowed in the refrigerant system. Group settings are not allowed.

- Power & Transmission line
- Transmission line
- Remote controller cable

Central Remote Controller Functions

Weekly schedule timer

The ON/OFF setting can be set for 4 times a day. Two weekly patterns can be set to match the cooling and heating seasons.

Low noise operation

Users can choose from 4 low noise levels, depending on the installation environment. The operation time can be set using the timer.

10°C heat operation

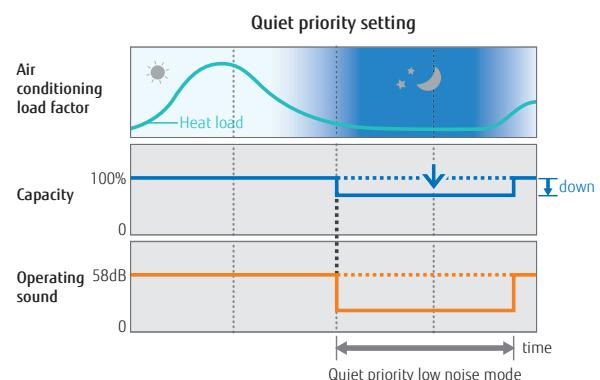

When you leave, minimum heating operation is performed to maintain the room temperature (maintain at 10°C).

Economy operation

Economy operation is energy saving, as the set temperature of indoor unit is shifted by 1°C and the maximum electric value of the outdoor unit is suppressed.

Prohibited Settings

The remote controller operation of all indoor units comes with a lock function to prevent unapproved operations in the various rooms. The central remote controller also has a key lock function to prevent children from playing with it, etc.

Specifications

Model name		UTY-DMMYM
Power Source		DC 12 V
Dimensions (H × W × D) (mm)		120 × 120 × 21.3
Weight (g)		220

DC 12 V is supplied by the indoor unit.

MODBUS® Interface

FJ-RC-MBS-1

SPLITS/MULTI

Max. Connectable

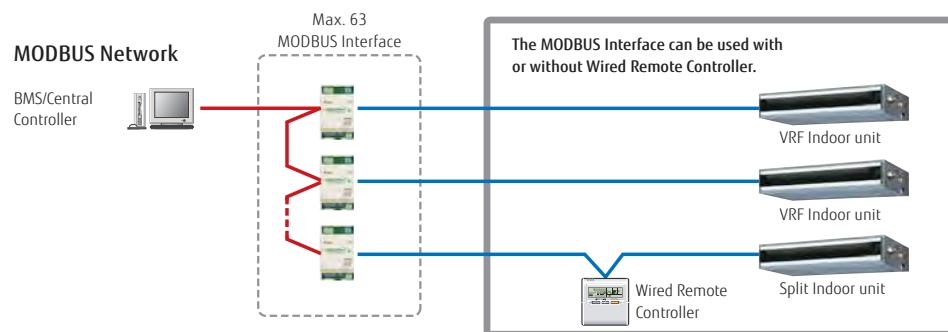

1 Single indoor unit

Max. Controllable

1 Group

The MODBUS Interface allows a complete integration of air conditioners into MODBUS Networks.

- Simple installation due to small and compact size.
- No separate external power supply required.
- The MODBUS Interface permits central monitoring and control of air conditioners from BMS.

KNX® Interface

FJ-RC-KNX-1i

SPLITS/MULTI

Max. Connectable

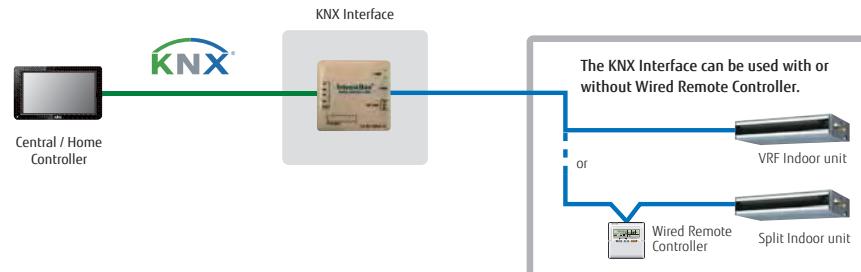

1 Single indoor unit

Max. Controllable

1 Group

The KNX Interface allows a complete integration of air conditioners with KNX Network systems.

- Simple installation due to small and compact size.
- No separate external power supply required (just KNX bus power).
- Can be used for single indoor unit and group controlled (up to 16) indoor units.

Specifications

Model name		FJ-RC-MBS-1	FJ-RC-KNX-1i
Dimensions (H × W × D) (mm)		93 × 53 × 58	70 × 70 × 28
Weight (g)		85	70

Wireless LAN Interface

FJ-RC-WIFI-2, FJ-IR-WIFI-1, FJ-AC-WIFI-1

SPLITS/MULTI

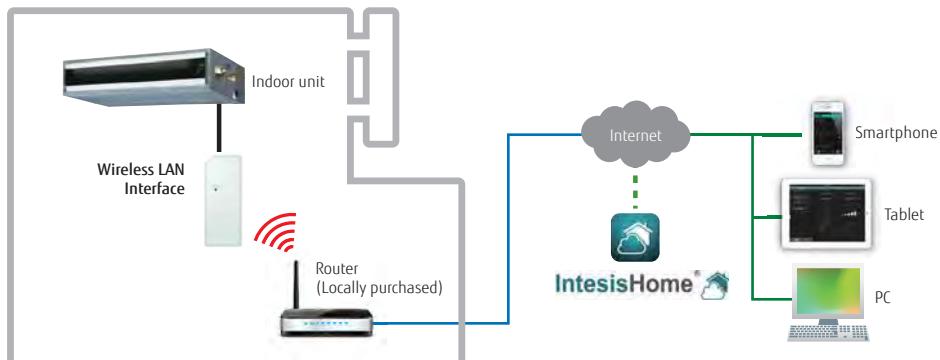

1 Single indoor unit

Max. Controllable
1 Group

IntesisHome®

- It is the most advanced solution to remotely manage an Air Conditioning system using all sort of mobile devices such as Smartphones, Tablets and PC
- No separate external power supply required
- Can be used for single indoor unit and group controlled (up to 16) indoor units

- **FJ-IR-WIFI-1** - IR version compatible with most AC units with an IR wireless remote controller
- **FJ-RC-WIFI-2** - Compatible with most 3-wire remote controller models
- **FJ-AC-WIFI-1** - Compatible with CN6 / CN65 R410A and R32 models

Basic control

- Alexa, Google, IFTTT Compatible
- Turning the units on and off
- Mode control (Heat, Cool, Dry, Auto, Fan)
- Fan speed setting
- Louvre position (Airflow direction setting)
- Room temperature display
- Set temperature control
- Multi Language
- One Scene and Timer

(Application screen image)

Advanced control (Optional functions)

- Climate working modes (ECO, Comfort, Powerful) (future release)
- Schedule functions (ON/OFF, Modes, Set point temperature, Fan Speed, Louvre position)
- Set temperature limitation (future release)
- Multiple Scenes & Timers and Calendar function

Specifications

Model name	FJ-RC-WIFI-1	FJ-IR-WIFI-1	FJ-AC-WIFI-1
Dimensions (H × W × D) (mm)	108 × 70 × 28		
Weight (g)	80		

Network Convertor for Single Split

UTY-VTGX / UTY-VTGXV

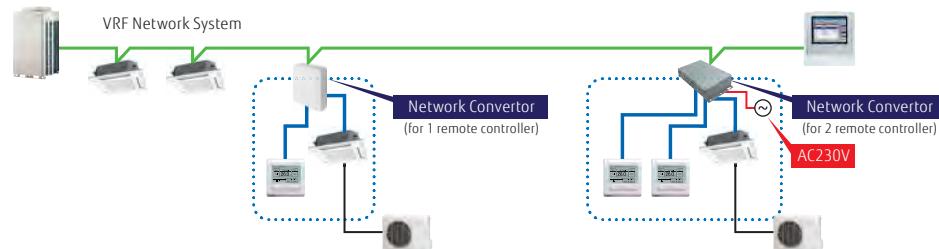

SPLITS/MULTI

UTY-VTGX
DC power supply typeUTY-VTGXV
AC power supply type

- The network convertors are required when connecting single split system to VRF network system.
- Compact and light weight design
- Connectable to both types of 2-wire and 3-wire remote controllers

Installation example.

- 2 types of 1 remote controller type and 2 remote controllers type are available.
- Power supply (AC220-240V, 50/60 Hz) is required for 2 remote controllers type.

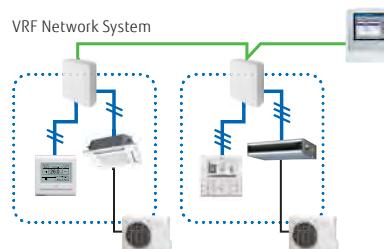

Max. Controllable
16
single indoor units

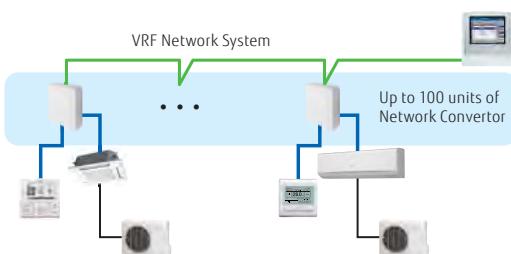

Max. Controllable
1 Group

Max. Controllable
100
Network Convertors

- 2-wire and 3-wire type of the wired remote controller can be connectable.

- A central control can be provided for the single split systems. (Up to 100 units of Network Convertor is connectable in one VRF network system)

Specifications

Model name	UTY-VTGX		UTY-VTGXV
Power Supply	polar 3-wire DC 12 V	non-polar 2-wire DC 12 V	220-240 V 50/60 Hz
Input power (W)	Max. 1.2		Max. 3
Dimensions (H × W × D) (mm)	140 × 117 × 43		54 × 260 × 150
Weight (g)	250		1,100

Wireless Remote Controller

UTY-LNHY

VRF

Max. Controllable
16 indoor units

Max. Controllable
1 Group
Selectable
4 daily timers

Simple and sophisticated operations with a choice of 4 daily timers

- A single controller controls up to 16 indoor units.

Built-in timers

4 timer programs: On / Off / Program / Sleep
Program timer: Operates ON/OFF timer once within 24 hours
Sleep timer: Corrects the set temperature automatically during sleep time

Easy installation and operation

Code selector switch prevents indoor unit mix-up (up to 4 codes)
Wide and precise transmitting range

IR Receiver Unit for Duct

UTB-YWC, UTY-TRHX

VRF

Duct type indoor units can be controlled with Wireless Remote Controller

*The wireless remote controller (Model: UTY-LNHY) is necessary separately

IR Receiver Unit for Cassette

UTY-LRHXB1, UTY-LBHxD, UTY-TRHX

VRF

Cassette type indoor unit can be controlled with Wireless Remote Controller

*The wireless remote controller (Model: UTY-LNHY) is necessary separately

Specifications

Model name	UTY-LNHY	UTB-YWC	UTY-LRHXB1	UTY-LBHxD	UTY-TRHX
Battery	1.5 V (R03 / LR03 / AAA)×2	DC 5 V	DC5V	DC5V	DC 5 V
Dimensions (H × W × D) (mm)	170 × 56 × 19	145 × 90 × 30	193.9 × 193.9 × 31.2	193.9 × 193.9 × 31.2	145 × 90 × 30
Weight (g)	85	150	140	140	150

DC 12 V is supplied by the indoor unit.

Central Remote Controller

UTY-DCGYZ1

VRF

For small- and medium-sized buildings and tenants

- Individual control and monitor of 100 indoor units
- 7.0inch TFT colour screen
- High visibility and easy operation
- Supports 12 different languages (English, Spanish, German, French, Italian, Russian, Portuguese, Turkish, Polish, Greek, Dutch, Chinese)

Max. Controllable
100 indoor units

Max. Controllable
50 groups

Easy operation

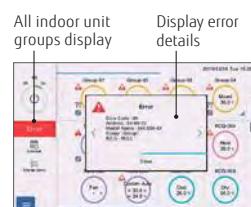

- The new central remote controller realised an intuitive operation feeling by touch panel operation.
- All functions can be accessed from the top display and the following operations are displayed at pop-up window.

Trouble support function

Display error details

Display descriptive explanation when an error occurs

Sensor value monitoring function

Monitor sensor data of indoor unit / outdoor unit, send mail

Notify room temperature by email*

Notify by e-mail when the temperature around the air conditioner is too high or too low

*:This function is available only when using wired remote controller.

Remote monitoring / Remote operation

New central remote controller can control your tenant's air conditioner anytime and anywhere.

Example

- Control / Monitoring Fujitsu air conditioner
- Error notification by E-mail

Specifications

Model name		UTY-DCGYZ1
Power Supply		100-240 V 50/60 Hz
Dimensions (H × W × D) (mm)		134.6 × 216.2 × 37.9
Weight (g)		800

Touch Panel Controller

UTY-DTGYZ1

VRF

- Large-sized 7.5-inch TFT colour
- LCD Easy finger touch operation
- Stylish shape and design to suit all applications
- Up to 400 indoor units can be controlled
- Selectable 2 display types (Icon / List) in monitoring mode
- Supports 7 different-languages ,English, Chinese, French, German, Spanish, Russian, Polish.
- Mounted with LAN interface for remote control & operation, external input / output with emergency stop and batch ON / OFF

Max. Controllable
400 indoor units

Max. Controllable
100 outdoor units

Max. Controllable
400 groups

Easy Operation

- Wide range of simple-to-understand icons
- Operation can be selected using your finger or the dedicated touch pen by pressing the appropriate on-screen icon.
- Back colour identifies current control operation blue for monitoring, green for operational control.

Easy maintenance

- Flat touch screen is easily cleaned
- Non-glare coating on touch panel controller minimises fingerprint marking
- Easy-to-remove front cover

Easy installation

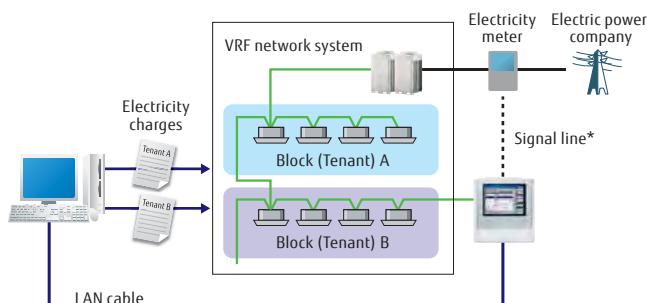

- Touch Panel Controller is easily mounted to the wall.
- Flat back surface allows to be installed wherever it is needed.
- No additional component is required for installation

Electricity charge apportionment

(Option: UTYPTGXA only compatible with UTYDTGYZ1)

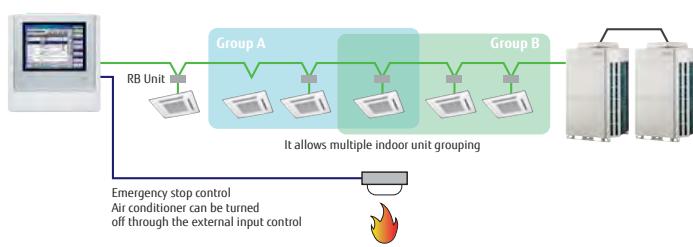

- Electricity charge apportionment can be performed easily for the power consumed when billing users for air conditioning power charges.

- Apportionment charge/bill calculation
- Tenant (block) setting
- Common facilities apportionment setting
- Rated power consumption allotment setting
- Individual calculation at cooling and heating
- Electricity meter supported

*: Electricity meter (1unit) can be connected to external input connector of the TPC unit.
In this case, electricity meter cannot be connected to outdoor unit simultaneously.

Up to 400 indoor units can be controlled

Specifications

Model name	UTYDTGYZ1
Power Supply	100-240 V 50/60 Hz, Single phase
Dimensions (H × W × D) (mm)	260 × 246 × 54
Weight (g)	2,150
Interface	Transmission/LAN/USB/EXT IN/EXT OUT/Reset SW

System Controller

UTY-APGXZ1 Software

Max. Controllable

4 VRF network systems

Max. Controllable

400 outdoor units

Max. Controllable

1,600 indoor units

VRF

System Controller realises the advanced integrated monitoring & control of VRF network system from small scale buildings to large scale buildings.

- Up to a maximum of 4 VRF network systems, 1600 indoor units, and 400 outdoor units can be controlled.
- In addition to air conditioning precision control function, central remote control, electricity charge calculation, schedule management, and energy saving functions are strengthened and building manager and owner needs are met.
- Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

System Controller Lite

UTY-ALGXZ1 Software

VRF

Max. Controllable

1 VRF network systems

Max. Controllable

100 outdoor units

Max. Controllable

400 indoor units

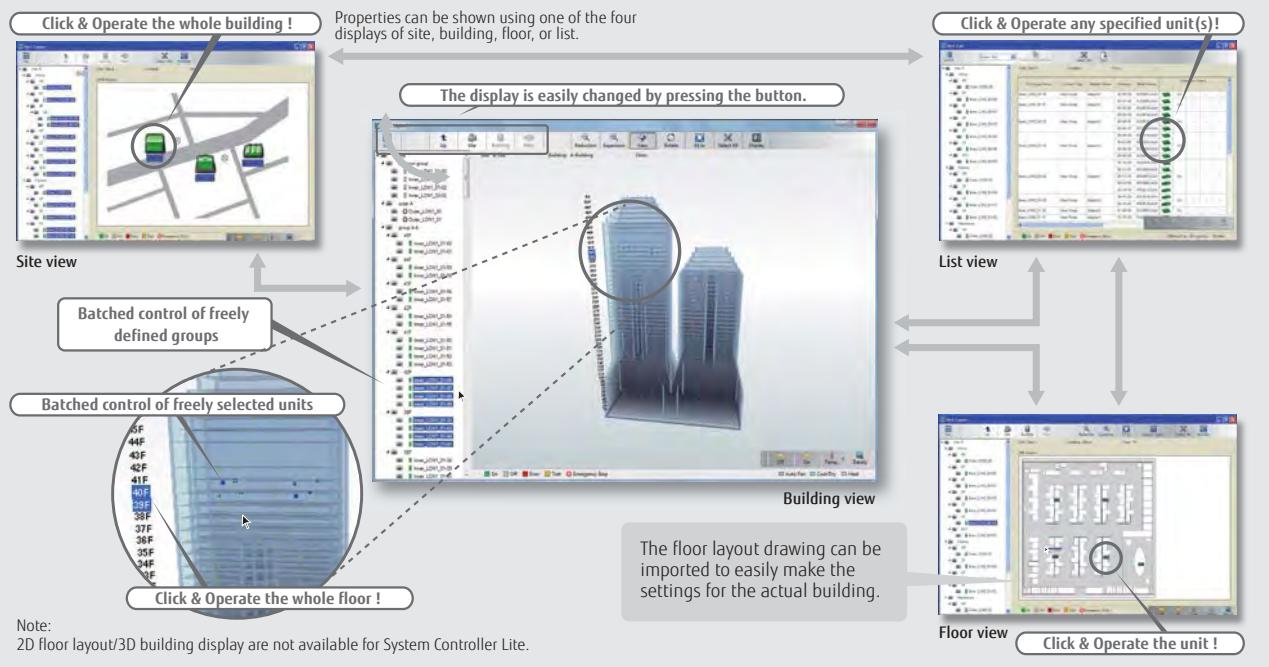

System Controller Lite has standard functions sufficient for air conditioner management in small and medium scale buildings .

- Up to a maximum of 1 VRF network system, 400 indoor units, and 100 outdoor units can be controlled.
- In addition to air conditioning precision control function, a variety of management software is available as an option to give customers a wide range of choice.
- Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

High visibility and Easy operation

Click & Operate: The property is shown visually from the perspective most suitable for operation and operated accordingly (Click & Operate). You can select from among the 4 displays of site, building, floor, or list.

Freely define groups for batched control: Indoor units can be freely grouped for simple batched control from a tree menu. Grouping by hierarchical structure, such as by section, division or department is possible.

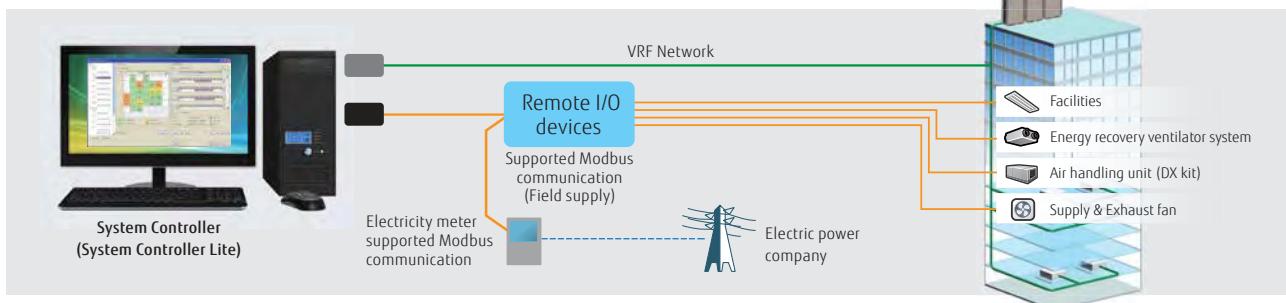

Features: System Controller/System Controller Light

3rd party devices connected by Modbus can be controlled.

Standard for System Controller **Option** for System Controller Lite UTY-PLGXX2

When Modbus Adaptor (locally purchased) is connected to PC, the electric facilities supported by Modbus can be controlled centrally. By using Modbus wasted electricity charge can be reduced in the entire building.

Diverse operation management & Data management

Standard for System Controller and System Controller Lite

Schedule management

- Annual schedules can be set for each remote controller group / user defined group.
- Start / stop, operating mode, remote controller prohibition, and temperature settings can be set up to 143 times per day at 10 minute intervals for up to 101 configurations for each remote controller group.
- Settings can be made for periods straddling midnight.
- Allows programming of special settings for holidays, including public holidays, for a complete year.
- Low noise operation of outdoor unit can be scheduled.

Diverse control of indoor unit and outdoor unit

- Indoor unit operation state, operation mode, etc. are displayed
- Indoor unit start / stop and operation mode switching
- Room temperature set point limitation
- Outdoor unit low noise setting

Remote controller prohibition

This prohibits changes to the operation mode, temperature, start/stop, etc.

Error display & E-mail notification

Error is notified with popup message, audible sound and E-mail real time when error occurs. Errors for the past 1 year are logged and can be reviewed later.

Operating & control record

Displays the history of operation status and control.

Data base import/export

Imports/exports registration data, layout data, and image data. Only the administrator can make this setting.

Automatic clock adjustment

The time setting of each controller can be set in batch automatically.

Electricity charge apportionment

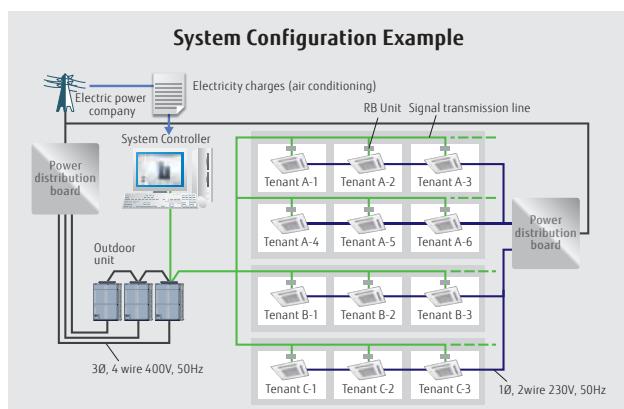

Standard for System Controller

Option for System Controller Lite UTY-PLGXA2

Electricity charge apportionment calculation framework

Suppose you want to find the power consumed by the air conditioners for each tenant. With the electricity charge apportionment function, the used energy ratio will be provided, calculating in detail the energy consumed by the units used by each tenant. This information is then used to calculate the charges for the electricity consumed by air conditioning for each tenant by using the electricity bill provided by the power company (See figure at right)

The detailed calculation takes into consideration such things as unused rooms and nighttime electricity charges and shows them in a charges calculation sheet.

CONTROL SYSTEM – CENTRALISED CONTROL

Features: System Controller/System Controller Light

Remote management

Standard for System Controller

Option for System Controller Lite UTY-PLGXR2

System Controller may be used on site or remotely over various networks for remote central control.

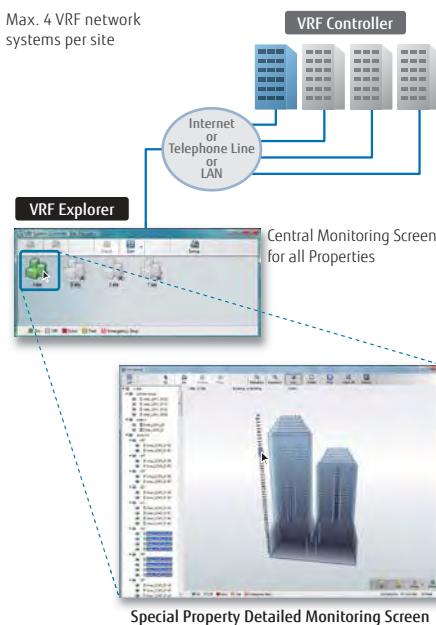

System Controller requires 2 software working together. VRF Controller runs on site and communicate with VRF system.

VRF Explorer runs remotely and provides user interface and communicate with the VRF Controller.

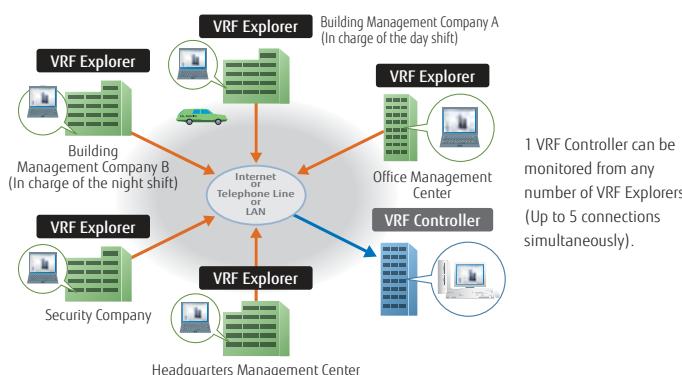

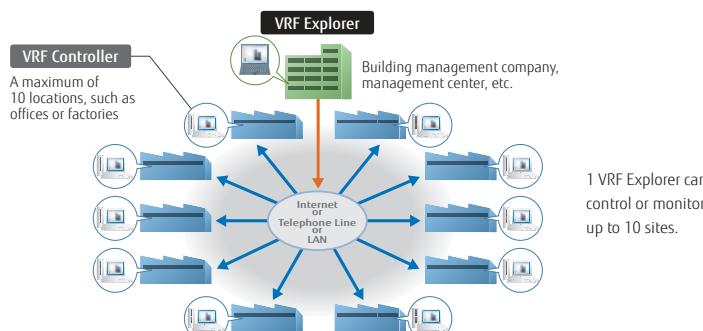

VRF Controller and VRF Explorer program may run in a single PC or in different PCs separated by network.

By using VRF Explorer software, one PC can perform central control of 10 VRF system sites with max. 20 buildings per site.

On site central control

Remote central control

Energy saving management

Option for System Controller UTY-PEGXZ1

Option for System Controller Lite UTY-PLGXE2

A variety of energy saving operations can be set and managed depending on the season, weather, and time period. Excellent energy saving operation is performed while keeping users comfortable.

Energy saving graph data: This graph compares the electricity consumption with the previous month and previous year to make it easy to analyse the energy saving effect.

Indoor unit rotation operation

The operation of indoor units can be automatically rotated within a group in accordance with the set annual schedule to reduce power consumption while maintaining comfort. The indoor unit operation stoppage rate can be selected.

Peak cut operation

A power meter is connected to detect the total power consumption while shifting the indoor unit set temperature, set the indoor unit forced thermostat off, and taking other measures to carefully control the power consumed while maintaining comfort and conducting control to maintain the target power consumption set for each time. The indoor units to be controlled can be freely grouped and the control level can be set.

Outdoor unit capacity save

Outdoor unit capacity save switches the outdoor unit capability upper limit to suppress power consumption during hot summers and cold winters by averaging the power saving effect of each refrigerant system. You can select from 50% or more of the capacity upper limit.

Max. Controllable
4
VRF network systems
Max. Controllable
400 outdoor units
Max. Controllable
1,600 indoor units

- It is possible to connect medium to large sized BMS to VRF network system via BACnet®, a global standard for open networks.
- A maximum of 1600 indoor units with 4 VRF network systems (a maximum of 400 indoor units & 100 outdoor units for one network system) can be connected to one BACnet® Gateway.
- It is possible to control or monitor VRF network system from BMS via BACnet® Gateway.
- Compatible with BACnet® (ANSI / ASHRAE-135-2014) application specific controller (B-ASC).
- Compatible with BACnet®/IP over Ethernet.
- Scheduling function, Alarm & Event functions as well as Electricity Change Apportionment function are provided in BACnet® Gateway.
- Connection between VRF network system to personal computer is possible via small U10 USB interface. However, both U10 USB interface & personal computer are field supplied items.
- Corresponds to 7 different languages, English, Chinese, French, German, Spanish, Russian, Polish.

Installation example

*1: USB adaptor is U10 USB Network Interface of Echelon® Corporation.

Transceiver	FT-X1 (Echelon® Corporation)
Transmission way form	Free topology
Terminal resistor	None (It attaches at the terminal of a network.)

MODBUS® Convertor for VRF

UTY-VMGX

VRF

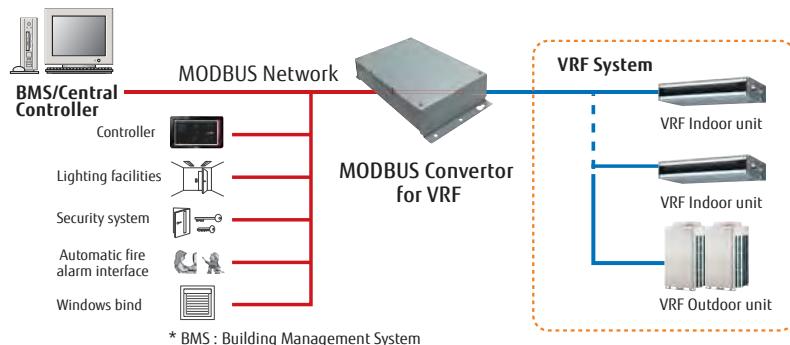

The MODBUS Convertor allows a complete integration of air conditioners into MODBUS Networks.

- Compact and lightweight design
- Direct connection to MODBUS Network
- Up to 128 indoor units can be controlled in one MODBUS Convertor
- The MODBUS Convertor permits central monitoring and control of air conditioners from BMS or Central Controller.
- Up to 9 convertors can be connected to a VRF network. The simultaneous controls such as ON/OFF or temperature settings can be done for each zone.
- It is easy to locate the source of error if any connection errors should occur after completion of installation works.

Max. Controllable
9 units to one VRF

Max. Controllable
100 outdoor units

Selectable
128 indoor units

KNX® Convertor for VRF

UTY-VKGX

VRF

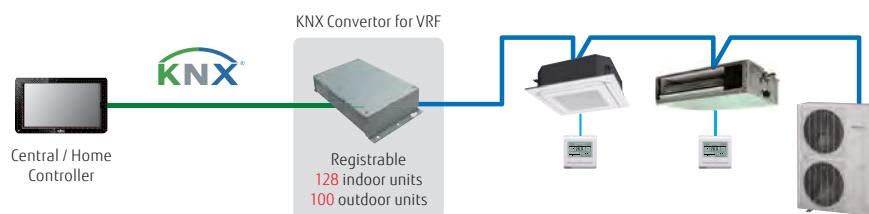

KNX Convertor is useful for centralised control in a system.

- New KNX Convertor enables to connect central/home controller and Fujitsu General VRF system.
- A maximum of 128 indoor units and 100 outdoor units can be connected to single KNX Convertor.

Max. Controllable
100 outdoor units

Selectable
128 indoor units

Specifications

Model name	UTY-VMGX
Power Supply	220-240 V 50/60 Hz
Input power (W)	Max. 2
Dimensions (H × W × D) (mm)	54 × 260 × 150
Weight (g)	1,100

Model name	UTY-VKGX
Power supply	220-240 V 50/60 Hz
Power consumption (W)	1.5
Dimensions (H × W × D) (mm)	54 × 260 × 150
Weight (g)	1,200

Signal Amplifier

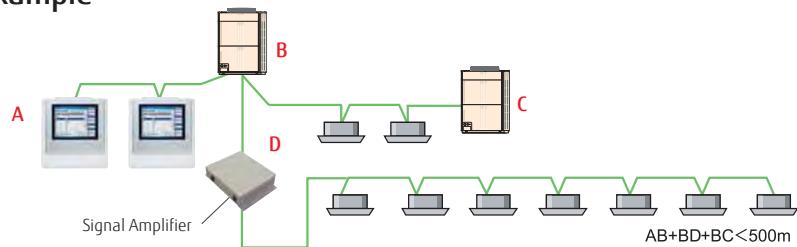

UTY-VSGXZ1

VRF

- Transmission Line length can be extended up to 3,600 m with multiple Signal Amplifiers.
- Up to 8 signal amplifiers can be installed in a VRF network system.
- A signal amplifier is required,
 - (1) When the total wiring length of the transmission line exceeds 500 m.
 - (2) When the total number of units on the transmission line exceeds 64.

Installation example

Specifications

Model name	UTY-VSGXZ1
Power Supply	208-240 V 50/60 Hz, Single phase
Power Consumption (W)	4.5
Dimensions (H × W × D) (mm)	67 × 288 × 211
Weight (g)	1,500

Optional Parts Overview

VRF

Various optional parts are provided to install the selected indoor unit properly according to the environment.

Optional Parts For Cassette

Human Sensor Kit

The room temperature can be controlled by detecting the temperature accurately from the built-in sensor

Cassette Grille

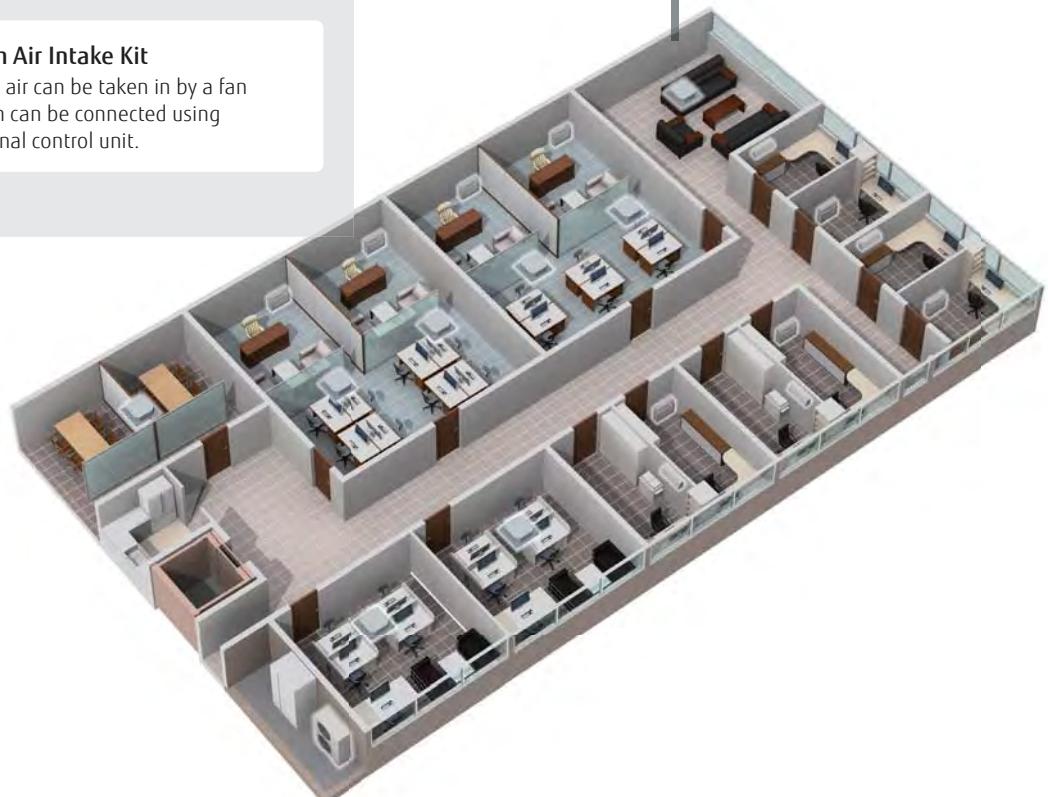

Cassette grille lineup matching the various interior is available. In addition, grid ceiling type cassette grille is also added to the lineup.

For Cassette Circular Flow

Fresh Air Intake Kit

Fresh air can be taken in by a fan which can be connected using external control unit.

Optional Parts For Duct & Ceiling

Auto Louvre Grille Kit

Simple flat Auto louvre will provide comfort airflow and harmonise with luxury Interior

Remote Sensor Unit

New amenity space can be offered by installing the Remote sensor.

Long Life Filter

Grit and dust can be caught sufficiently. In consideration of running cost, long-life design is achieved.

Flange

Flange is used for Medium Static Pressure Duct type and Ceiling type to connect between pipes.

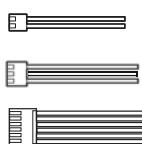

Drain Pump Unit

This device can drain the collected water during operation.

Connection Parts

External Connect Kit & Set

These wires can connect between the product PCB and external device.

Connection Units

Connection units are provided to separate the pipes at the connection of multiple indoor units in multi-split type or VRF system.

External Power Supply Unit

External Power Supply Unit can protect the units in the system even if some powers of indoor units are shut down in the system.

Auto Louvre Grille Kit

UTD-GXSA-W / UTD-GXSB-W / UTD-GXSC-W

SPLITS/MULTI/VRF

Simple flat Auto Louvre will provide comfort airflow and harmonise with luxury interior.

Closed louver Opened louver

Flexible Control

• Operation with indoor unit

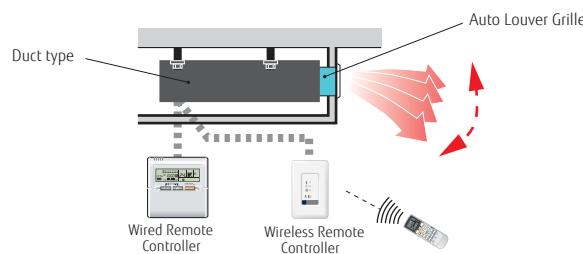

Auto Louvre can be operated by synchronising remote controller of indoor unit.

• UP and Down auto swing

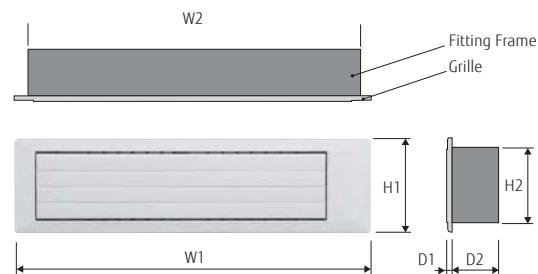

- Auto airflow direction and auto swing
- 4 steps selectable

• Auto-closing louvre

When operation of indoor unit is stopped, the louvre will automatically close.

External Power Supply Unit

UTZ-GXXA

VRF

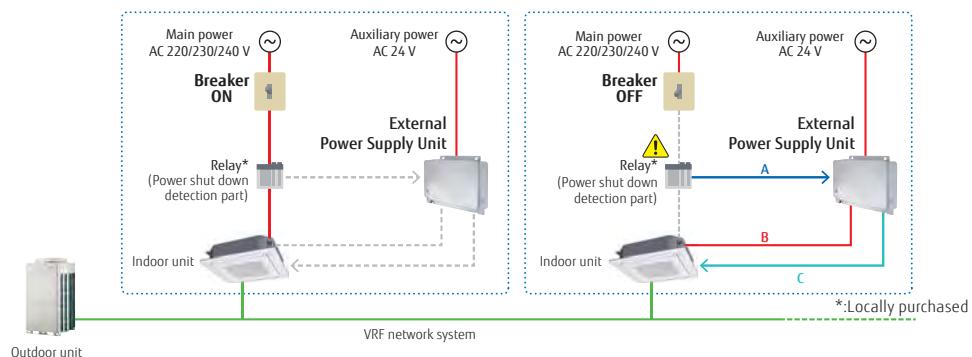

External Power Supply Unit can protect the units in the system even if some powers of indoor units are shut down in the system.

Power is supplied to the indoor unit from auxiliary power by connecting to External Power Supply Unit. This makes it possible to operate continuously without system error.

High Reliability

- A: Main power shut down can be detected at power shut down detection part.
- B: The power for indoor unit expansion valve drive, etc. is supplied. (DC 12V, 5V)
- C: Power supply from External Power Supply Unit is notified.

Note

- When changing the power supply voltage to AC24V, use a power transformer with an insulation structure equivalent to CLASS 2.
- Indoor units that are powered off and driven by an External Power Supply Unit are handled in the same manner as operation off units in the electricity charge apportionment function. Since standby power may be charged to them, the electricity charge apportionment result for them may not be 0.

*Locally purchased

*1: In case of two RB units connected in series (total 8-branches), maximum capacity of connectable indoor units is up to 56.0 kW.

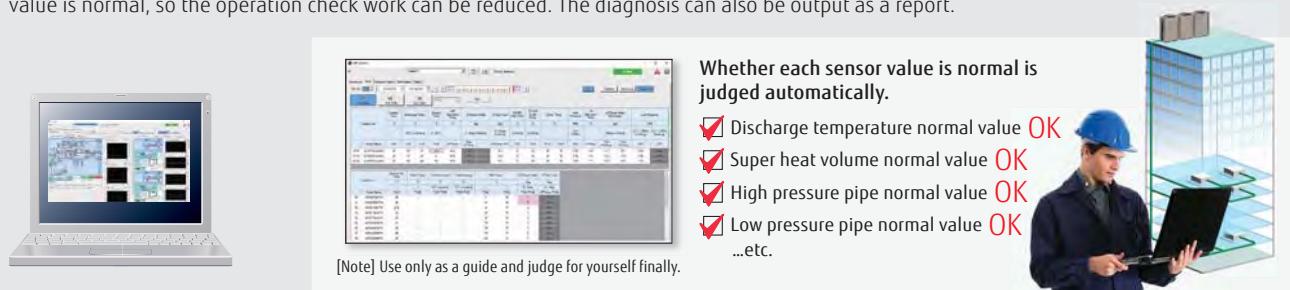

Service Tool

Extensive monitoring and analysis functions for installation and maintenance

- Operation status can be checked and analysed to detect even the smallest abnormalities
 - Storage of data on system operation status on a PC allows access even from off site.
 - Up to 400 indoor units (a single VRF network system) can be controlled and monitored for large scale buildings or hotels
 - This software can be connected to any point of transmission line with USB adaptor (locally purchased)
- * The saved data can be displayed offline. However, the data saved by the following model cannot be displayed.
- UTR-YSTB/UTR-YSTC (Service Tool)
 - UTR-YMSA (Web Monitoring Tool)

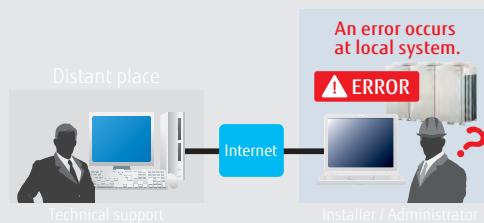

Automatic operation check for refrigeration cycle

After product installation, operation check can be performed automatically. Self-diagnosis function automatically judges whether each sensor value is normal, so the operation check work can be reduced. The diagnosis can also be output as a report.

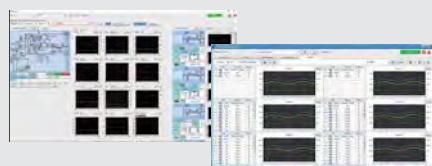

Remote technical support & maintenance

On-site check screen can be shared with the skilled person in a distant place. When visiting for troubleshooting on site, operation status can be shared in real time and get assistance easily. Online chat function helps to support on site staff.

Various trend graph display

Previously, only 3 kinds of each sensor value can be displayed. However, multiple graphs can be displayed in new Service Tool depending on the situation. The refrigeration cycle can be checked in detail.

Personal computer system requirements

		UTY-ASGXZ1
Operating system		<ul style="list-style-type: none"> • Microsoft® Windows® 7 Professional (32-bit or 64-bit) SP1 • Microsoft® Windows® 8.1 Pro (32-bit or 64-bit) • Microsoft® Windows® 10 Pro (32-bit or 64-bit)

Name and shape	Quantity	Application
WHITE-USB-KEY (Software protection key)	1	Software protection key to be connected to USB port on the Service Tool-installed PC. These products run only on a PC with WibuKey.

- Personal computer that satisfies the following system requirements
- Echelon® U10 USB Network Interface – TP/FT-10 Channel (Model number: 75010R) (Required for each VRF Network.)

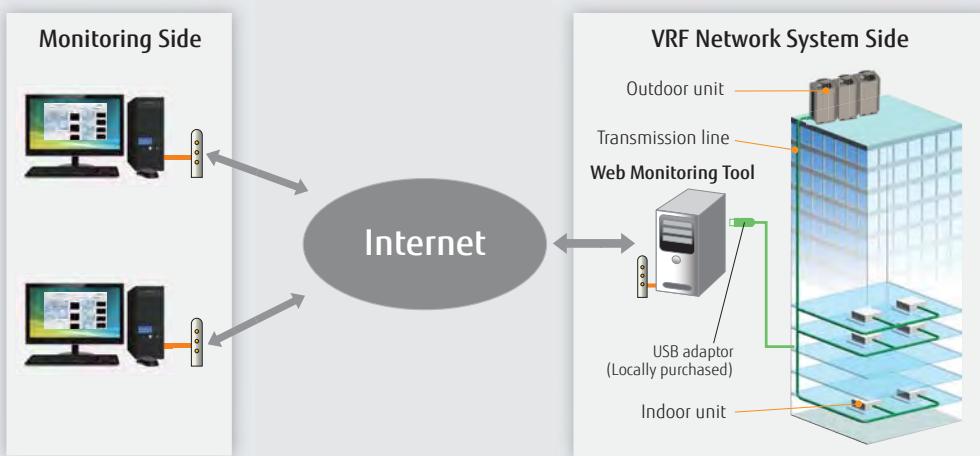

Web Monitoring Tool

Product features

- Troubleshooting is performed by monitoring each air conditioning unit remotely during periodical system checks.
- Error notification can be automatically transmitted to several locations using the internet*1.
- Requires either a dedicated internet connection or public telephone line.
- Determination of an error occurrence can be made through error warnings and equipment status information obtained from a remote location.
- The monitoring data in a remote side can be optionally downloaded. And, this data can be displayed in offline mode of the service tool.
- Monitoring side computer is not required to install special software, requires only general web browser.

*1: Use of internet mail system required.

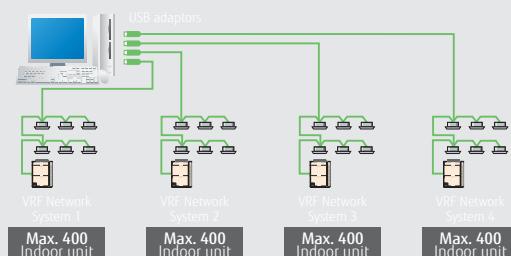

Web Monitoring System

Support 4 VRF network systems

USB adaptor (max. 4 adaptors per PC) permit, monitoring of up to 1,600 indoor units.

Suitable for large-scale buildings or hotels.

Refrigerant Leak Detection

The F-Gas regulations are an EU environmental regulation brought into effect on the 4th July 2007, as part of the European Union's obligations under the Kyoto protocol. F-gasses or HFC's (hydrofluorocarbons) can cause harm to our environment and cause climate change. These regulations are directed at reducing cover both pure HFC's such as R134a and blends like R404a.

Refrigerant Leak Detection

To Meet the requirements of BS-EN378 all split / VRF systems containing refrigerant gasses installed in a Category Class A space (Hotel Bedroom or similar) must meet the limitations regarding maximum system refrigerant volumes that could leak within the space

Fujitsu's Design Simulator program can be used to accurately calculate the actual refrigerant volumes based on the system size and the proposed pipe-work lengths and configuration

If these aforementioned limitations are exceeded there must be an alarm system to alert the occupier through both audible and visual indication, this alarm must also alert the staff such as supervisors, night porters etc.

There is no specific requirement for the alarm system to be linked to the refrigerant system to pump down or stop the operation.

Individual Sensors

TQ31

Monitors all refrigerant gasses typically used in air conditioning systems

Stand alone, single point refrigerant detector and alarm unit ideal for room monitoring.

Resistant to cross sensitivity from hairspray and deodorants so are ideally suited in a hotel / Bedroom environment.

Designed as a single point, self contained unit but can be connected to a TQ32 Area Alarm panel for remote monitoring and group alarms.

Area Alarm Panels & Indicator Panel

TQ32 (32 Channel & 64 Channel)

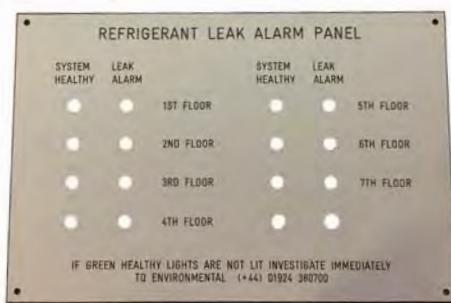

Up to 64 individual sensor inputs gives wide area coverage

The TQ32 Area Alarm Panel combined with the TQ31 sensors enables the group monitoring of individual rooms for common refrigerants used in air conditioning systems

Designed for hotel or office use, a single alarm panel will typically monitor 1 or 2 floors depending on the number of sensors needed.

The 3 digit LED display shows individual room numbers.

Configurable alarm outputs can provide plant trip signals and alert the reception desk, via the optional TQ34 indicator panel or a 3rd party alarm.

TQ34

Up to 8(max) Area Alarm Panel inputs for whole building coverage

The TQ34 Floor Indicator Panel combined with the TQ32 Area Alarm Panels and the TQ31 Individual Sensors enables the monitoring of the entire building

Designed for hotel or office use, a Indicator panel will typically monitor 1-8 floors depending on the number of Area Alarm panels used

Residential, Commercial & Light Commercial VENTILATION

VENTILATION Lineup

- 228 Energy Recovery Ventilator
- 232 DX-Kit for Air Handling Application
 - for VRF Outdoor Unit
- 234 DX-Kit for Air Handling Application
 - for Single Split Outdoor Unit
- 236 AIR HANDLING UNIT

Effective heat exchange and simultaneous fresh air ventilation

High Efficiency and low noise levels are achieved by using a highly efficient heat exchange process. A comfortable air conditioned space is achieved by conveniently selecting whether to use heat exchange or normal ventilation setting, according to the requirements of the conditioned space.

Lineup

Energy Recovery Ventilator

Energy recovery ventilator unit offers maximum comfort and greater energy savings.

Heat exchange ventilation and normal ventilation

Heat exchange ventilation

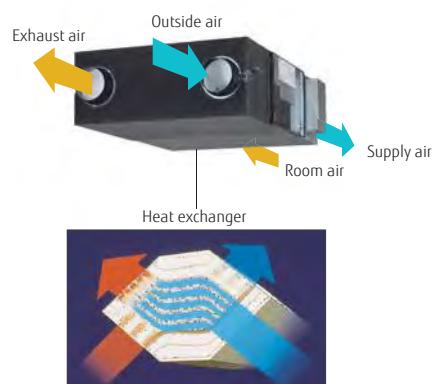

When a room is cooled or heated, the exhausted cooling / heating energy is recovered by heat-exchange ventilation.

Normal ventilation

The operation is used during periods when the room space requires no cooling or heating effect, i.e. when there is minimal temperature difference between the indoor and outdoor environments.

Energy efficiency and ecology

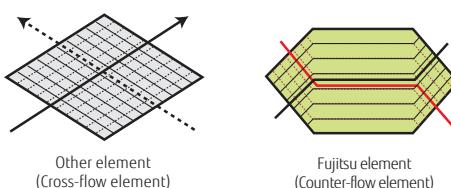

Energy consumption is dramatically reduced by using a counter-flow heat-exchange element. Air conditioning load is reduced by approximately 20%, resulting in significant energy savings. Recovers up to 77% of the heat in the outgoing air.

Adopts a highly efficient counter-flow heat exchange element

Features of heat exchange element

With the cross-flow element, air moves in a straight line across the element. With the counter-flow element, air flows through the element for a longer time (longer distance), so the heat-exchange effect improved.

Other element (Cross-flow element)

Fujitsu element (Counter-flow element)

Quiet operation

Significantly reducing low pressure loss and noise allows low-noise operation.

25.5dB
(UTZ-BD035C)

Extended range of an external static pressure

An external static pressure is improved by adopting a powerful fan motor. This allows for application in a wide variety building.

Slim shape and easier installation

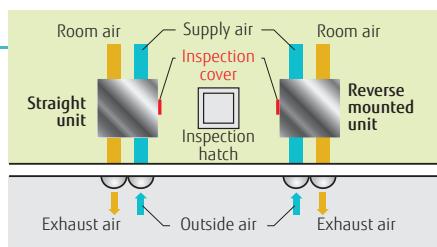

Counter-flow heat exchange element used for reduced noise and slimmer, more compact body shape.

Reverse mountable direct air supply / exhaust system

Adoption of straight air supply / exhaust system: Duct design is simplified because the air supply / exhaust ducts are straight.

Since each unit can be mounted in reverse position, only one inspection hole is needed for two units: Two units can share one inspection hole so duct work is easier and more flexible.

Simple remote operation

Easy operation by connecting a liquid crystal switch

- POWER ON/OFF • Air volume High/Low
- ON/OFF Timer • Heat exchange/Normal Ventilation
- Clean filter display

Energy Recovery Ventilator Options

Energy recovery ventilator unit offers maximum comfort and greater energy savings.

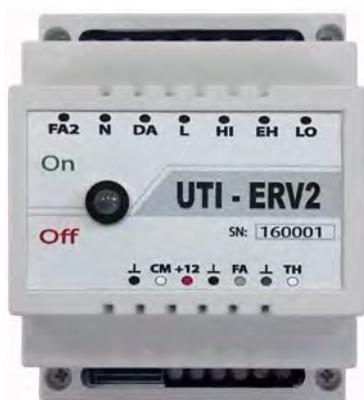

ERV RELAY

This accessory will allow an Energy Recovery Ventilator unit to start & stop in unison with the connected indoor unit
(There will be no control over on / off, fan speed or damper bypass)

Model Name	UTY-ERVRELAY1	
Power source	208 - 240V, 50Hz, Single Phase	
Dimensions (H x W x D)	mm	TBC
Weight	g	

Hard wired Control Interface

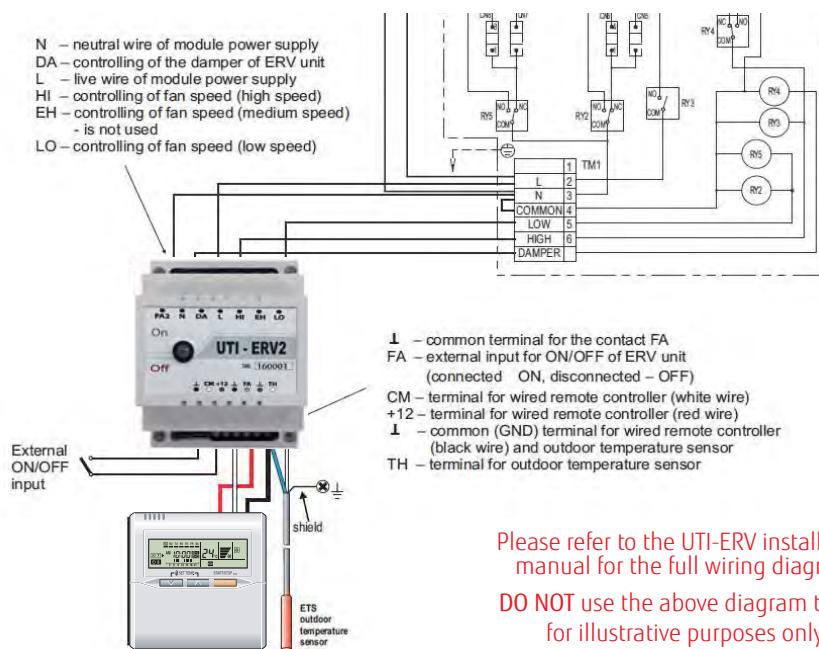

In order to use a Fujitsu hard-wired controller with the ERV units an interface is required

The UTIERV2 interface provides the following features:-

- UTI-ERV2 interface is supplied with an outside air intake duct sensor for control of the ERV bypass damper e.g. heat recovery or "free cooling" bypass mode
- Dry contact terminals for remote on/off e.g. from BMS
- Allows the use of a Fujitsu UTY-RNNYM* hard wired controller which has the following features:
- Allows ERV fan speed selection from the remote controller
- Controller has an integral 7 day programmable time clock
- Controller has temperature selection for auto control of the damper
- Filter clean indicator facility
- Manual or Auto control of the bypass damper

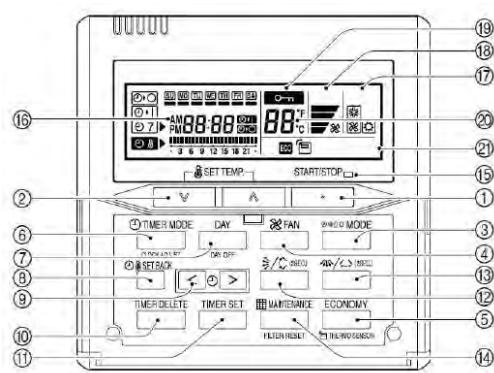

N – neutral wire of module power supply
DA – controlling of the damper of ERV unit
L – live wire of module power supply
HI – controlling of fan speed (high speed)
EH – controlling of fan speed (medium speed)
- is not used
LO – controlling of fan speed (low speed)

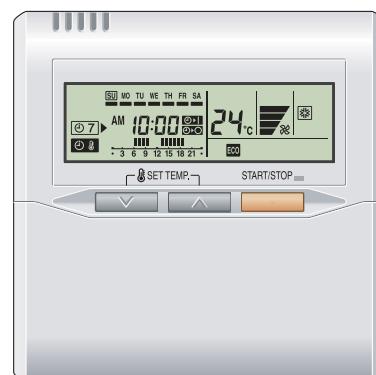

Please refer to the UTI-ERV installation manual for the full wiring diagram

DO NOT use the above diagram this is for illustrative purposes only

DX-Kit

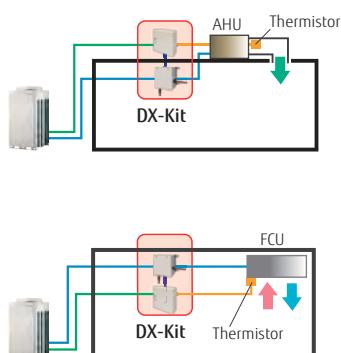

for Air Handling Application

for VRF Outdoor Unit

These kits enable other manufacturers air handling units (AHU) and fan coil units (FCU) to be incorporated into a Fujitsu VRF system or, be connected to a dedicated Fujitsu VRF outdoor unit as a 1:1 system to control outside air ventilation (AHU) or room temperature (FCU).

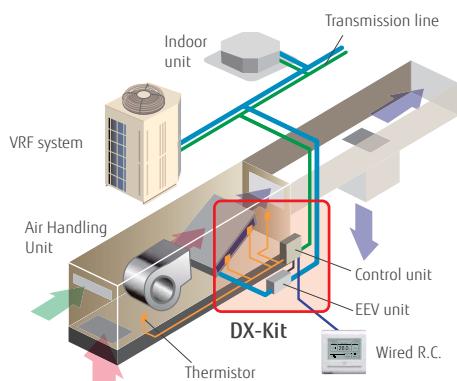

Multiple temperature sensors optimally control the air handling unit and fan coil unit.

When connecting to an air handling unit, the supply air temperature is controlled by the discharge sensor.

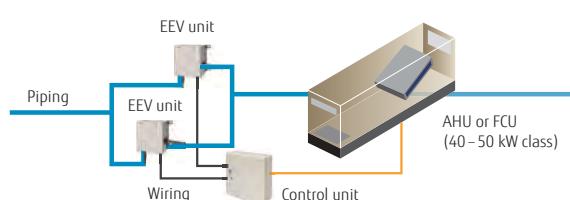

When connecting to a fan coil unit, the room temperature is controlled by the return air temperature sensor.

Arrangement as part of a VRF system

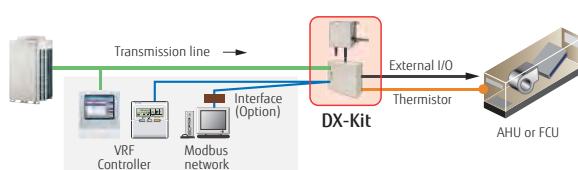

Supports a wide range of capacity classes

- 2 EEV units can be connected in parallel and up to 20 HP (50 kW) large capacity units. (Separation Tube of UTP-LX180A is required.)
- Connectable capacity range: 5 kW to 50 kW

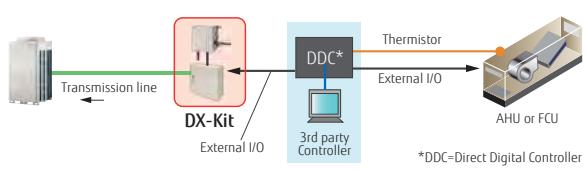

A variety of controls to match the application

Central control using our VRF controllers or central management controllers

Central control from external controllers

Functions Summary

Inputs

- ON/OFF
- Setting temperature
- Capacity demand
- Heating / Cooling operation mode
- Fault information

Outputs

- ON/OFF indication
- Fan ON/OFF indication
- Thermo ON/OFF indication
- Defrost indication
- Fault indication

MODBUS® Control

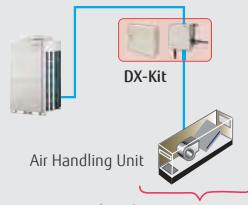

Possible to control via a MODBUS enabled BMS by using optional interface.

Installation Limitation

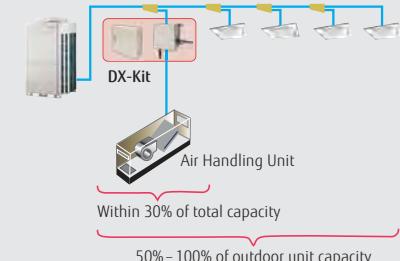

- Connectable VRF Series: All VRF Series
- Connectable DX-Kit system capacity range: 50 to 100% of the outdoor unit capacity
- Connectable DX-Kit system capacity range with indoor units: 30% or less of the outdoor unit capacity
- Max. wiring length from control unit: 10 m
- Max. piping length between EEV unit and indoor unit: 5 m
- Outdoor installation: Control unit (IP54 class) and EEV unit can be installed at an outdoor space.

Connectable capacity

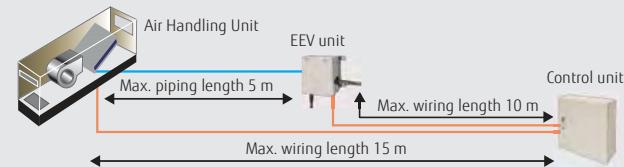

• Single connection

• Mixed connection

Piping and wiring length

For 2 EEV units connection (option) Separation Tube: UTP-LX180A

Control unit: UTY-VDGX

EEV unit: UTP-VX30A / UTP-VX60A / UTP-VX90A

160 × 220 × 90

Note: Specifications are based on the following conditions.
Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.
Heating: Indoor temperature of 20°CDB / 15°CWB, and outdoor temperature of 7°CDB / 6°CWB.
Pipe length: 7.5 m Voltage : 230 [V].

DX-Kit

for Air Handling Application

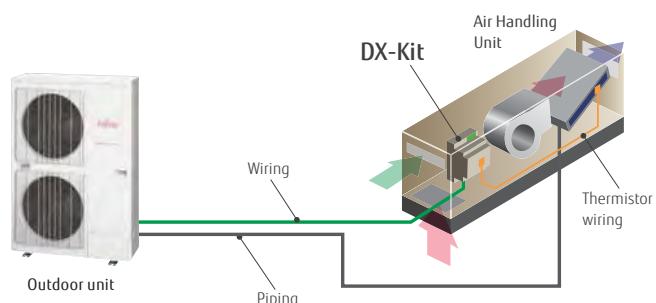

for Single Split Outdoor Unit

This kit enables other manufacturers air handling units (AHU) and fan coil units (FCU) to be incorporated into a Fujitsu General Split outdoor unit.

Flexible connectivity

This kit is a control unit to allow connection to third party manufacturer equipment. Fujitsu General single split outdoor units can be used with this control unit, creating an ideal solution when a unique air handling unit is required.

Supports a wide range of capacity class

Connectable large capacity range: 3.5 kW ~ 22.0 kW
(Nominal)

Operation from anywhere on your mobile device

Available to use operation and management from remote control such as Smartphones and Tablets

Functions Summary

Inputs

- ON/OFF
- Heating/Cooling operation mode
- Capacity demand (analogue 0-10 V)
- Heat exchanger temperature

Outputs

- Status of Compressor, Defrost, Error (Potential free relays)
- LED status indication

Wireless LAN Control

Wireless LAN control with cloud connectivity enables safe remote monitoring and control from anywhere.

Easy installation

- Simple installation through compact DIN rail mountable enclosure
- No need for expansion devise
- No separate external power required

Model: UTY-XDZXUK

System Overview

The Air handling applications for the AIRSTAGE™ system is the Fujitsu general solution to the most demanding installations, where energy efficiency meets with the highest comfort.

The system is composed of AIRSTAGE™ outdoor units from 10 to 54 HP and Air handling unit for civil and industrial buildings for thermo-ventilation and air conditioning purposes, covering air flow ranges from 4,300 to 18,100 m³/h and cooling capacities from 25 to 96 kW.

- For AHU control: AHU controller (Only For AHU)
- For mixed connection control: System controller, or 3rd party controller with Modbus convertor

AHU

AIR HANDLING UNIT

The Advantages of the System

Full comfort

The system offers full comfort and air quality in the buildings providing clean treated air thanks to the advanced filtration and balanced temperature.

Easy design and installation

The system is simple design and installation. No additional external kit is required as the Air Handling Unit includes DX-kit (Expansion valve and control PCB) AHU model selection is easy by using Selection Software.

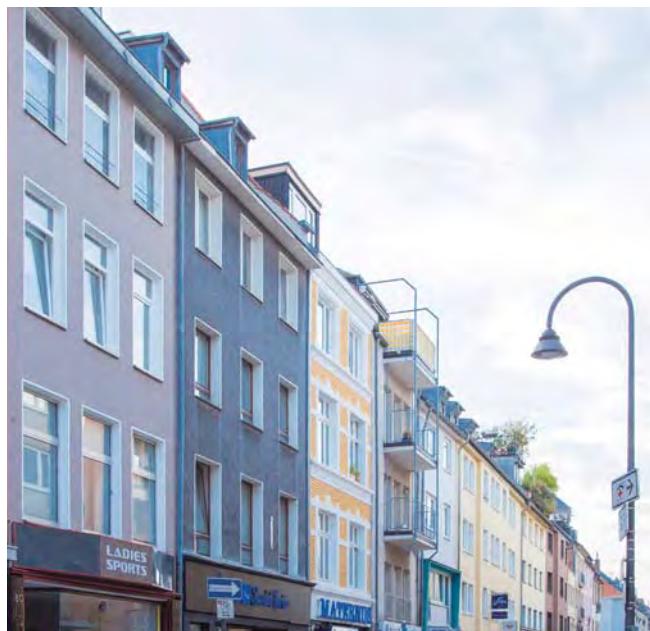

Total solution concept

Integrating an Air Handling Unit into the total building climate system simplifies both design and installation procedures based on a single common technology. From project follow-up to installation, commissioning and maintenance, all procedures are simplified. There is a requirement for not more than one installer.

AIRSTAGE™ Lineup

Fujitsu General provides multi air conditioning systems for buildings AIRSTAGE™ Series matched to the size and application of the property.

AIRSTAGE™ V-III
for Large Office

Smart and cutting edge design. Extensive line-up from 10 HP to 54 HP in 2 HP increments. Connectable indoor unit capacity ratio up to 100%

Air Handling Units Overview

AHU is the range of Air Handling Units for civil and industrial buildings for thermo-ventilation and air conditioning purposes, designed to be connected with AIRSTAGE™ Series Outdoor units.

Units are available in different models and several additional modular sections to meet all installation needs, with air flow ranges varying from 4,300 to 18,100m³/h and covering a cooling capacity from 25 to 96kW.

AHU is made of extruded aluminium profiles and nylon angle bars. The "sandwich-type" double-skin panels (50 mm thick) with galvanised sheets, externally pre-painted, and thermal insulation in high density polyurethane foam are fastened on the units by means of an aluminium snap-in locking system.

AHU fan section is equipped with EC Inverter Plug-Fans and is provided with Automatic Regulation Control Systems for Constant Air Flow and Constant Available Static Pressure. An electronic device with pressure sensors on the system and control sensors on EC Plug-Fans adjust the flow rate and the available static pressure to keep the air flow constant.

5 configurations are Available

Configuration A

In line with Front Damper

For fresh air operation up to 100% external air

Configuration B

In line with Top Inlet Damper

For fresh air operation up to 100% external air

Configuration C

In line with Inlet Mixing Box

For fresh air operation up to 20% external air

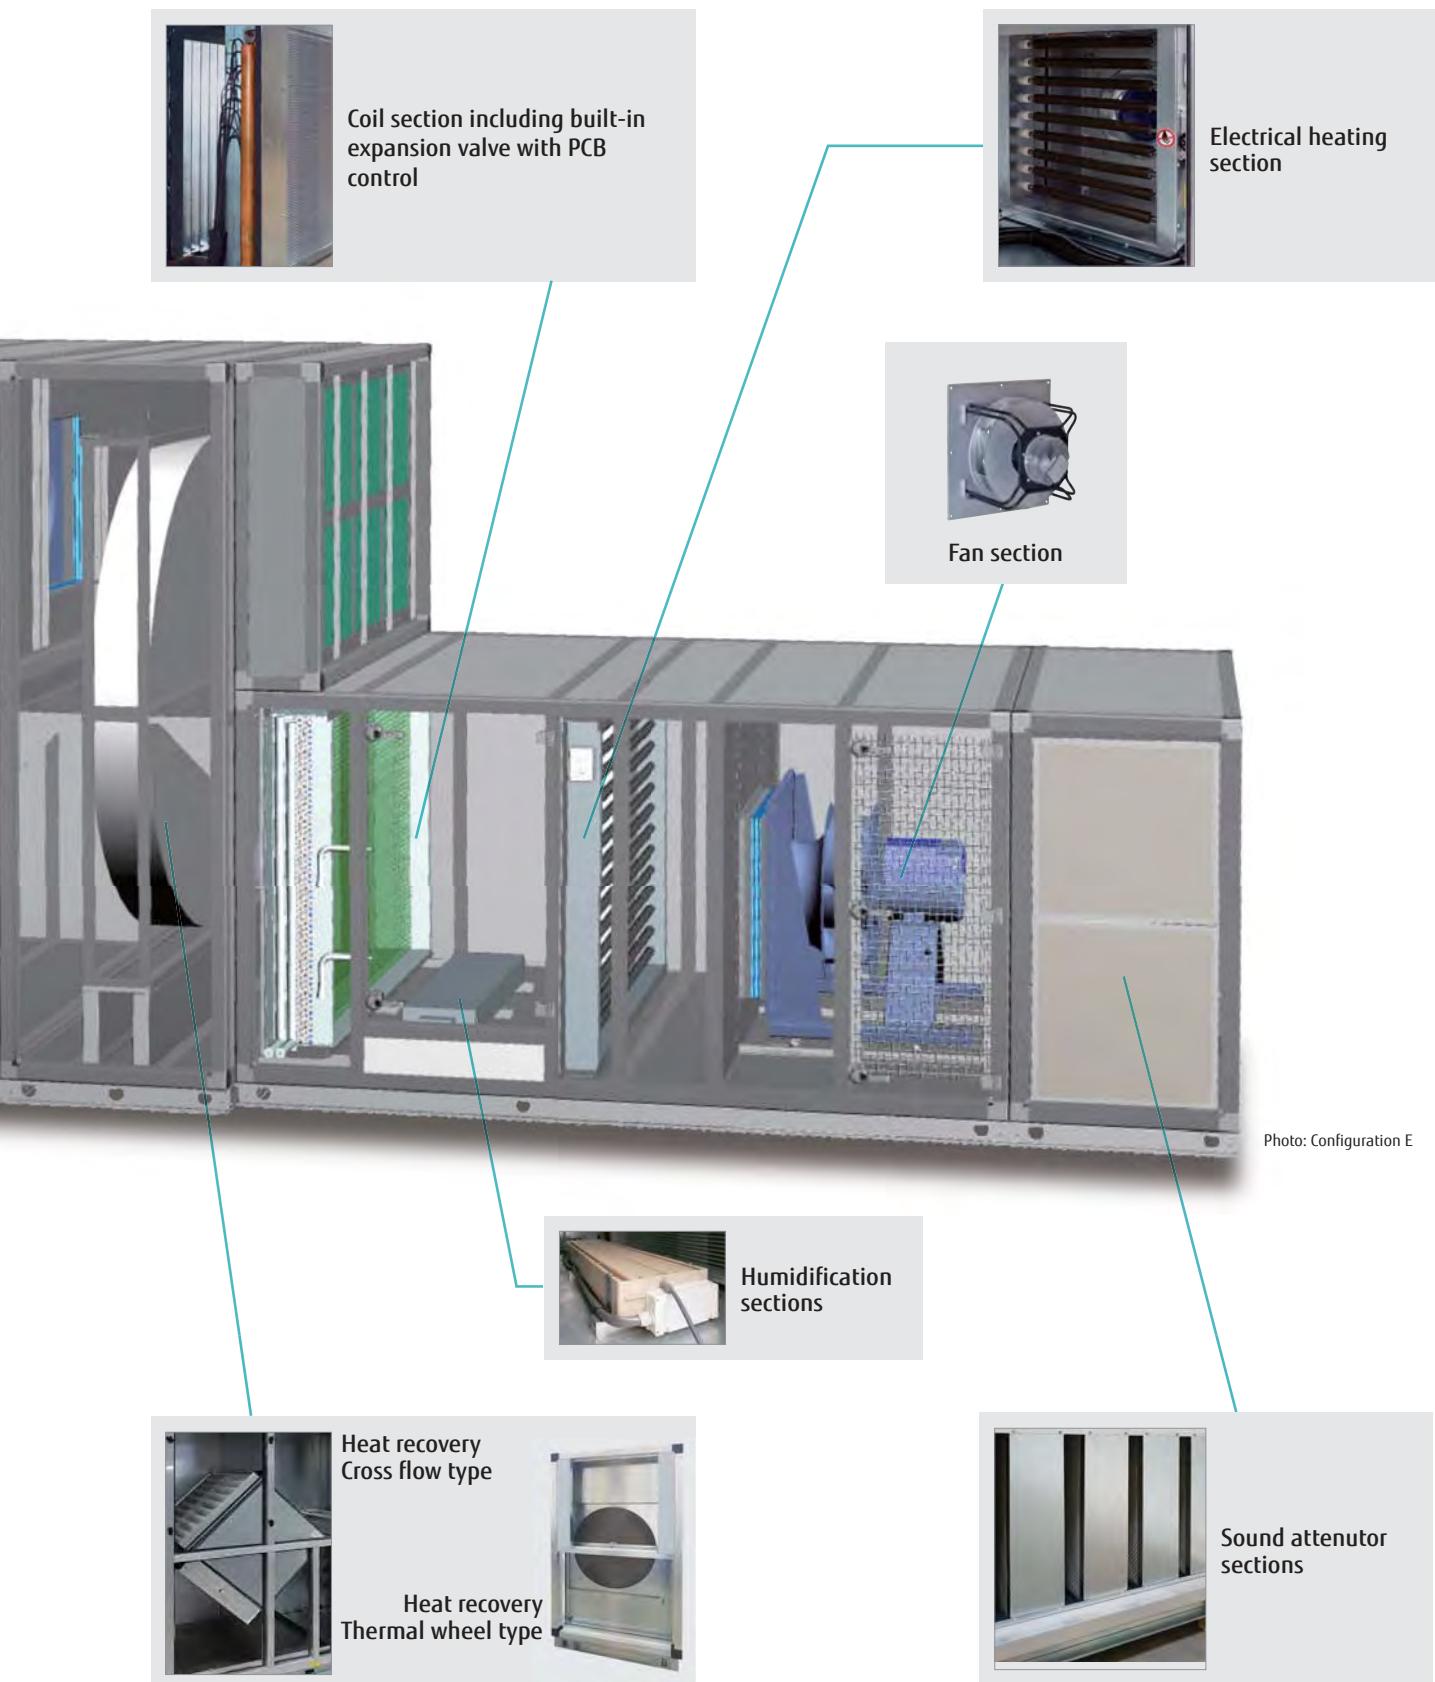

Configuration D

Double Deck with Cross-Flow Heat Exchanger

Configuration E

Double Deck with Thermal Wheel

Feature

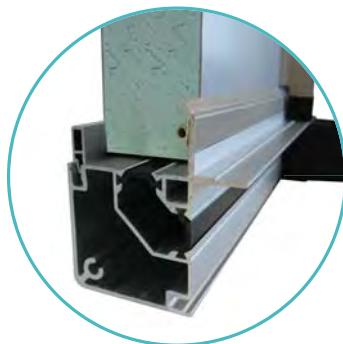

Photo: Configuration C

Structure

Section of extruded profile 62 × 62 mm (SNAP-IN system)

- The Air Handling Units are manufactured with bearing framework and sandwich paneling.
- The frame is made of extruded anticorodal aluminium alloy profiles of AlMgSi 0,5- UNI 9006/1 type.

Mechanical characteristics of extruded aluminium alloy

Denomination	Specific weight (kg/dm ³)	Unitary load of traction break R (kg/mm ²)	Yielding load S (0,2) (kg/mm ²)	Stretch (%)	Brinell hardness (kg/mm ²)
ANTICORODAL 050 UNI 9006/1 EX UNI 3569 (6060) ISO = Al Mg Si 0,5	2,70	20 ÷ 23	16 ÷ 20	12 ÷ 15	60 ÷ 70

Profile

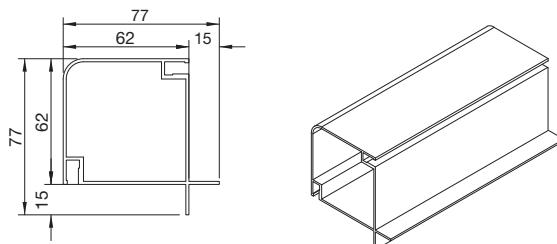

- The exclusive bearing structure made by Fujitsu General, having actual dimension of 62 x 62 mm, uses the lock panel system in aluminium (SNAP-IN system). This system permits to reach paneling tightnesses beyond 2500 Pa (10 in WG), because of the homogeneity of the pressure over the paneling perimeter, not achievable with the traditional system (selfdrilling screw fastening). This profile doesn't require the aid of internal and external screws, providing a more solid and aesthetically pleasing appearance.
- Because of the dimensions of the profile, the used panel has actual dimensions of 50 mm.
- The profile hasn't got external sharp edges, as foreseen by the safety and accident-prevention rules in force.
- Air Handling Units are certified for the highest performance standards.

ErP LOT6 - 2018

- The EUROVENT certification on Fujitsu General units proves the reliability and correctness of declared performance data and features.
- Fujitsu General units and all internal components are compliant to ErP EcoDesign 2018 LOT6 Regulation.
- The compliance of Fujitsu General units to UNI EN 1886 European Regulation about structure thermal and mechanical performance is also certified by Eurovent.

(Unit : mm)

Panelling

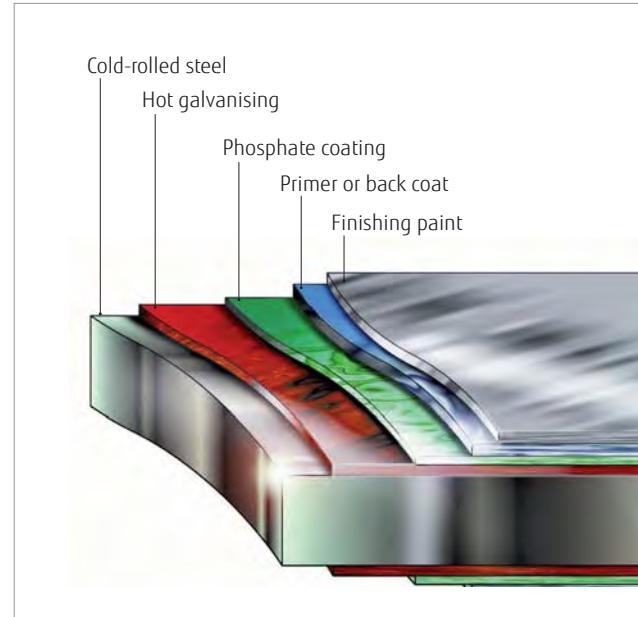

The panelling is double skin sandwich type made of galvanised sheet, with polyurethane foam insulation of minimum density 45 kg/m³, actual thickness: -50 mm

Panels are made as follows:

Inner skin: Hot dipped galvanised sheet (galvanisation not less than 140 g/m²), 5/10 mm thick.

Insulation: Rigid polyurethane foam minimum density 45 kg/m³, thermal conductivity 0,018 ÷ 0,024 w/m² °C.

Outer skin: Hot dipped pre-painted galvanised sheet (galvanisation not less than 140 g/m²), 6/10 mm thick.

PRE-PAINTED GALVANISED STEEL SHEET

Steel Sheet Features

Hot dipped galvanised steel sheet type Fe P02 GZ 140 UNI En 10142 with galvanisation not less than 140 g/m². The thickness is 6/10 mm.

Pre-painted steel sheet 6/10 mm thick with base support made of hot dipped galvanised steel (galvanisation not less than 140 g/m²) EURONORM 142-79 and coating, colour white-grey for a special resistance to weathering. The protective system consists of a dry film of 25 µm on the exposed skin and of a dry film of 5 µm on the non-exposed skin.

Hardness of film: F on the Koh - i - Noor's scale.

Other chemical-physical characteristics:

- Resistance beyond 250 h in salty mist (ECCA T8)
- Resistance beyond 1000 h in high humidity conditions (ASTM D 714)
- Film resistance to the cleaving and adhesion after bending (ECCA T7).

A self-adhesive PVC film is laid on the steel sheet exposed surface in order to avoid damages during the manufacturing procedures and transport.

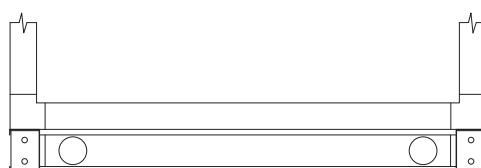

Baseframe

The bearing baseframe is made of galvanised steel with pressure bent, bolted or welded profile, according to the configuration of the unit.

It is arranged for the sections lifting and suitable for water piping passage and drain.

Perimeter baseframes heights and profiles are dimensioned as follows: H = 100 mm with bolted C profile for all units

The baseframes of all the above solutions are made of galvanised steel sheet with minimum thickness 2.0 mm.

SECTION VIEW.
The baseframe is flush with the panelling

Covering Roof (TT - Accessory)

- All units that must be positioned outside or generally speaking are exposed to the weather may be equipped with a hot galvanised steel sheet roof (galvanisation not less than 140 g/m²) as accessory element.
- The roof overhang with regard to the unit outer dimensions is of about 100 mm.
- All roof corners are equipped with accident prevention corners protections.

Filtration

Plate Filters COARSE 55%

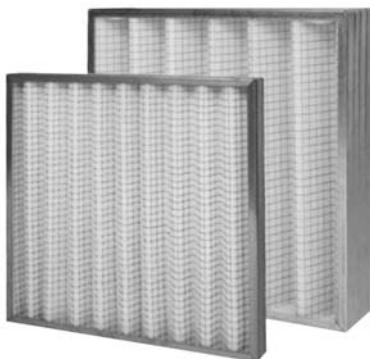

Plate filters filter the air at a low and medium efficiency.

- Plate filters are commonly used as prefilters in order to keep a longer efficiency of filters installed downstream.
- Plate filters are installed on guides fastened inside the unit. In this case the air bypass is minimum.

Plate filters are highly used because of the following features

- Easy removal
- Easy availability on spare parts market
- Regenerability (they can be washed with warm water and soap or common domestic detergents).

Plate filters are made of

- Galvanised steel sheet frame 48 mm th.
- Support containing net made of galvanised electrowelded wire
- Filtering material made of synthetic fiber with filtration efficiency COARSE 55%.

Filtration

Bag Filters ePM1 50%

N.B. ePM1 50% bag filters are mandatory for ECODESIGN ErP 2016 compliance

Bag filters have the characteristic of giving a wide filtering area thanks to their bag shape and therefore they highly reduce the crossing air speed.

The bags are installed on galvanised slides for side extraction. This filtering section includes the access door.

Soft bag filter features

- Efficiency, ePM1 50%
- Depth 287 mm
- Fiberglass filtering stuff
- Galvanised steel sheet frame
- 80% of the material is recyclable
- Limit relative humidity 100%.

Thermal Exchange Sections

DX Coil

The section consists of

- DX coil with copper tubes and aluminium fins, specifically designed to guarantee an high thermal exchange and an excellent ratio between sensible and latent heat;
- One distributor and one electronic expansion valve for each circuit connected to its control PCB, which is located in close proximity to avoid every possible interference, immunity and electromagnetic disturbance problems;
- Temperature probes installed at the front, at the rear and in the middle of the coil provide the data to the control PCB, which consequently determines the opening of the electronic expansion valve, depending on the work point and the set point;

On multi-module units the cooling circuits are interlaced to guarantee a full exploitation of the exchange surface and air treated uniformity also at partial loads. The section includes the PCB control.

Thermal Exchange Sections

Electrical Heating

Electrical heating section is used for the execution of heating and post-heating treatment

They are manufactured as follows

- galvanised steel sheet flanged containing frame
- finned steel tubular heaters on base insulators
- safety fix thermostat with manual reset
- electrical heating is foreseen for 3-Stage 400V/3P/50 up to 36 kW capacity.

Fan Section

EC Inverter Plug-Fan

The fan section is equipped with EC Inverter Plug-Fan.

- The EC Inverter Plug-Fans are managed by an electronic control adjusting fans rotational speed to adapt air flow and static pressure to the system capacity. They supply a variable air flow according to the requested thermal load, providing important benefits in terms of energy consumption and low noise operation especially when the unit is operating at partial load.
- The EC Inverter Plug-Fans can be set to different working conditions, according to the unit needs, directly on site through the control panel installed on the Electrical Board section.
- Compared to traditional Plug-Fans, thanks to EC Inverter technology the overall efficiency and acoustic behaviour of the fans has been significantly improved. The blade geometry with a diagonal trailing edge has positive effects on the aerodynamic performance and on the running smoothness of the fans. The same is true for the implemented nozzle contour.
- The overall dimension of the section can be kept at minimum thanks to the fan dimension: the EC motor is integrated directly in the impeller. A belt drive between the motor and the fan, which is commonly used otherwise, is not necessary. This reduces the required installation volume and the associated installation effort.
- The EC Plug-Fans significantly exceed the ErP 2015 norm and the requirements of energy efficiency class A+ stated in German manufacturer's association RLT Directive 01, "General Requirements for Ventilation and Air-conditioning Devices".
- AHU fan section equipped with EC Inverter Plug-Fans is provided with the Automatic Regulation Control Systems for Constant Air Flow and Constant Available Static Pressure. An electronic device with pressure sensors on the system and control sensors on EC Plug-Fans adjust the flow rate and the available static pressure to keep the air flow constant.

Humidifier

Electrode humidifiers specifically designed for installation inside air handling units.

- The humidifier is constituted by two parts connected together electrically: the hydraulic part and the control unit based on a microprocessor board. The hydraulic part is completely inserted into the AHU, lying on the condensate drain tank immediately downstream of the cooling coil.
- The control is fully integrated in the microprocessor installed aboard the AHU.
- The hydraulic boiler is made up of plastic polypropylene "channel" having a section of 33 cm x 16 cm height, and having a length proportional to the width of the AHU. Inside the boiler are arranged longitudinally the stainless steel electrodes, connected to the power supply phases and easily removable. The lid is made of plastic sections with slope, so as to allow any condensation that falls by gravity into the boiler in order to avoid power losses.
- Between the plastic sections is obtained a narrow longitudinal slot which allows the output of the steam produced, that meets the air for the whole length of the AHU section.
- This solution prevents the formation of condensate in the pipes and also prevents any increase in steam pressure in the boiler due to blockages in the pipes conveying steam.

On one side of the kettle (the easiest to access once installed) you have the body of hydraulic management of the system

- Maximum water level sensor
- Draining bloc the draining bloc has been specially designed to empty the tank from water and limestone pieces without having to block and having to be able to work without pressure.

A electronic rotation sensor, rigidly grafted on the pivot motor, communicating with the microprocessor which manage the correct operation and shown in the display any faults that may appear.

Heat Recovery Section

Cross Flow Heat Recovery

The recovery unit efficiency has values up to 85%.

- The fixed plates static recovery units are air to air type, without moving parts, therefore working in a reliable and safe way. The air movement is in a crossed flow with heat transfer directly from higher temperature flow to the lower temperature one. The recovery unit efficiency has values up to 85%.
- This type of heat exchanger is made of pressed aluminium sheets, housed in a variable spacing depending on the use type.
- Sealings are made along the edges in order to prevent contamination on renewal air from polluting agents contained in exhaust air.

The normal supply foresees

- Recovery units with aluminium fins
- Cell prefilters COARSE 55% type (85% eff.) on fresh air side
- Galvanised steel sheet drain pan to collect possible condensation.

Heat Recovery Section

Thermal Wheel Recovery Units

The working principle is the following

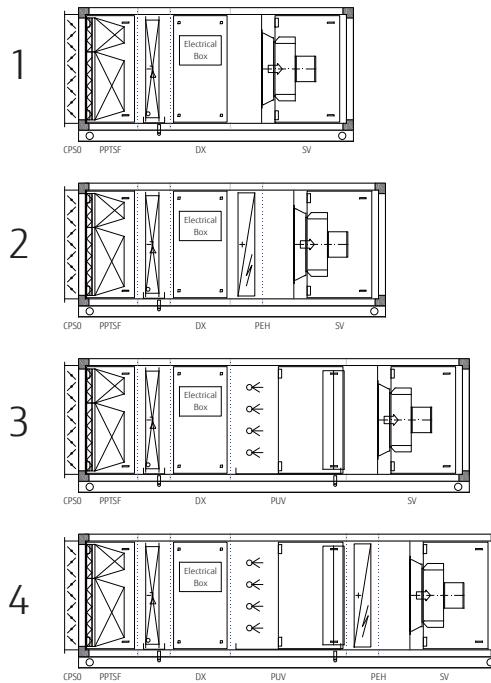

- The exhaust air crosses half circular rotor sector and gives part of its heat to the metallic mass. This, slowly wheeling, is invested from cold renewal air crossing in counterflow the other half of the exchanger, taking the heat given from the exhaust air. When the rotor is hygroscopic type, also humidity contained into the exhaust air will be partially transferred to the renewal air.
- The words "warm air" and "cold air" of the above description are valid for winter working cycle; in summer cycle the functions of transfer and absorption of heat and humidity are evidently inverted.

Usually these type of recovery units are made as follows

- aluminium rotor
- galvanised steel sheet frame
- constant speed electric gearmotor

Silencer PI

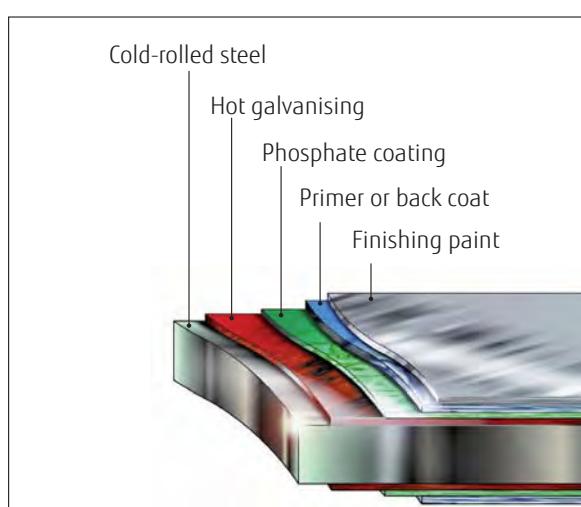

Loose Accessories

Galvanised metal sheet roof

All units that must be positioned outside or generally speaking are exposed to the weather may be equipped with a hot-galvanised metal sheet roof (galvanisation not less than 140 g/m²) an accessory element.

The roof overhang with regard to the unit outer dimensions is of about 100 mm. All roof corners are equipped with accident prevention protections.

Total Pressure Drops Calculation

AHU units, being controlled by EC Inverter Plug-Fans, can satisfy a high range of required air flow rate and static pressure.

The EC Inverter Plug-Fans can be set to different working conditions, according to the unit needs, directly on site through the control panel installed on the Electrical Board section.

Procedure for selection

- Select the AHU model most suitable according the air volume.
- Check the air flow static pressure operating point on the curve of the chosen fan by crossing the required air flow rate with the value of the overall static pressure.

To calculate the total static pressure value refer to the Components Pressure Drop table and add the net static pressure required for the plant.

Control System

AHU units include built-in electrical panel and expansion valve with PCB control. Set point is fixed via standard wired control. The cooling load is determined by the air return temperature and set point on the wired control.

AHU Controller

UTY-TXUX

Features

- Easy to install. Control connects to AHU PLC.
- Able to install the control after building decoration.
- Mode lock function: user can lock the running mode of Air Handling Unit.

Easy Operation

The remote controller realised an intuitive operation feeling by touch panel operation.

Functions

- Schedule setting change
- Set temperature and humidity
- Ambient's name
- Alarms setting
- Event setting

Specifications

Model name	UTY-TXUX
Format	mm
Display	Display touch color 3.5" 320 x 240
Power supply	24 Vac - 24 Vac/dc
Analogue inputs	1 x Integrated NTC
Connectivity	RS485 - Modbus SL, USB Micro-B (debug and programming)
Operating temperature	0 - +50 °C

System Controller

UTY-APGXZ1 Software

Features

System Controller realises the advanced integrated monitoring & control of VRF network system from small scale buildings to large scale buildings.

- Up to a maximum of 4 VRF network systems, 1,600 indoor units, and 400 outdoor units can be controlled.
- In addition to air conditioning precision control function, central remote control, electricity charge calculation, schedule management, and energy saving functions are strengthened and building manager and owner needs are met.

Max. Controllable

4 VRF network systems

Max. Controllable

400 outdoor units

Max. Controllable

1,600 indoor units

It is possible to perform centralised control to stop the operation of lighting and ventilation equipment in addition to air conditioners. This is useful in energy saving management over the whole building.

System Controller Lite

UTY-ALGXZ1 + UTY-PLGXX2 Software

Features

System Controller Lite has standard functions sufficient for air conditioner management in small and medium scale buildings.

- Up to a maximum of 1 VRF network system, 400 indoor units, and 100 outdoor units can be controlled.
- In addition to air conditioning precision control function, a variety of management software is available as an option to give customers a wide range of choice.

Max. Controllable

1 VRF network systems

Max. Controllable

100 outdoor units

Max. Controllable

400 indoor units

VRF
indoor units

Facilities
