

Low sound enclosure

EKLN140A

-10 dB(A)!

The smart way for sound reduction

Designed to be discreet

Our sound enclosure is more than just a technical device that does a quite good job. It is intended for use in sensitive environments. So we spent some time to give it a shape that fits into any surrounding.

These are the visual features:

- › Unobtrusive looks in anthracite colour-tone (RAL 7016)
- › Highly aesthetic finishing and smooth surface
- › Low height
- › Tailor-made design that fits our outdoor units perfectly and keeps the dimensions low

Great news

for sound sensitive surroundings

Meet strict sound requirements, while increasing flexibility to apply Sky Air and VRV systems thanks to **sound power reduction of up to 10 dB(A)**

- ✓ Specially designed for Sky Air and VRV heat pumps
- ✓ Factory tested and guaranteed data for capacity, efficiency and sound (according to ISO 3744)
- ✓ Minimal capacity reduction
- ✓ No additional calculations needed thanks to factory tested data, reducing design workload

Tried and tested: values that you can rely on

You want to finish your work faster? You want reliable results? You want your customers to get exactly what they ordered?

Our low sound enclosure eliminates possible problems and reduces your workload significantly:

- › **No incompatibilities** – tested combinations with the outdoor unit that you want to encase
- › **No surprises** – measured and guaranteed sound reduction according to ISO 3744
- › **No calculations** – tested performance values for capacity and efficiency

Sound power level measurement in acoustic chamber

The solution

that meets the needs

Minimal capacity reduction – tried and tested

The separated air inlet and outlet plus the exact fit of the sound enclosure prevent any air short circuit. The whole design is optimised to keep the capacity and air

flow as close as possible to the standard conditions. Resulting in great sound attenuation while working in optimal conditions.

Durable

You can fully rely on our enclosure. We use high-quality stainless steel with an impact-resistant powder coating, which is why we can offer you an extended warranty of three years!

Double layer of powder coated finishing:
First layer: epoxy-primer 60 µm
Second layer: polyester 80 µm
maximises corrosion resistance

High-quality sound insulating material

> 70–160 mm thick
> 20 kg/m³

Optional drain pan and heater

Flexible piping connections

In order to provide maximum reliability for colder climates, an optional drain pan and drain pan heater can be installed.

Multi-directional: front, side, rear, bottom

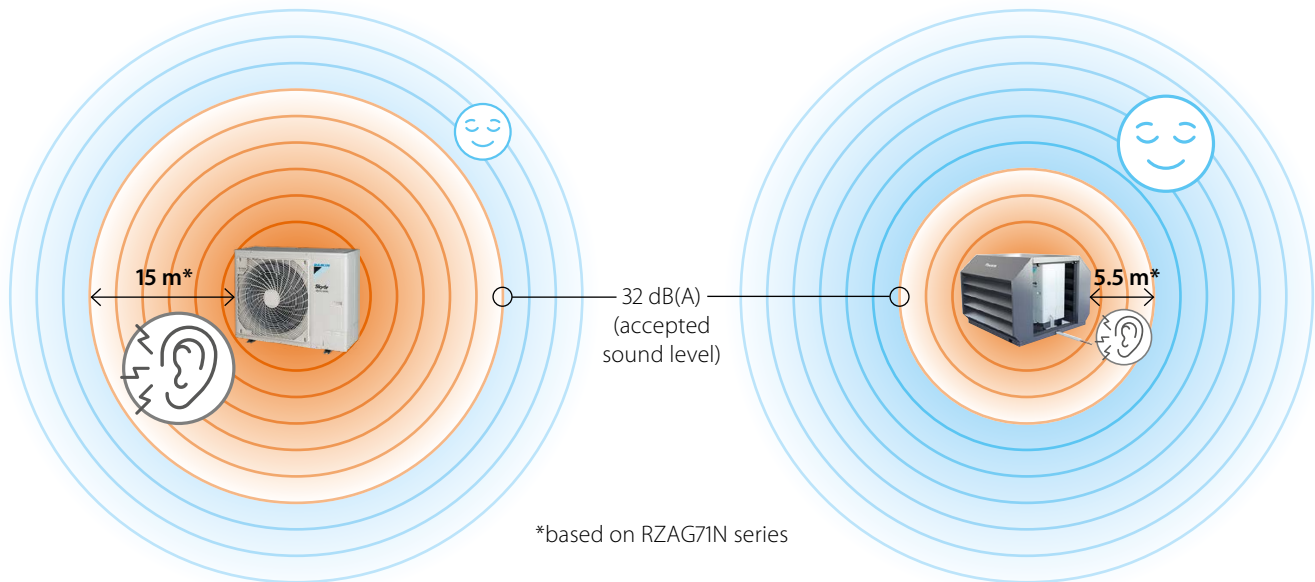

Increased flexibility to apply heat pumps based on tested data

The reduction of the sound power levels (up to -10 dB(A)) across the entire sound spectrum increases your flexibility significantly. In the example below with the low sound enclosure, the heat pump can be installed as close as 5.5 m

to the next premises, based on the 32 dB(A) threshold (check local regulations). Thanks to the precise Daikin sound and capacity data you can be confident about the solution you are offering.

Without Daikin sound enclosure **you need to maintain a 15 m distance** from your closest neighbour

With the Daikin sound enclosure **you can install as close as 5.5 m** from your closest neighbour

Installation and maintenance made easy

Our hassle-free solution minimises your workload right from the start. The self-supporting unit can be installed easily on any flat surface – and even retrofitting existing installations is possible. The sound enclosure side panel is equipped with quick locks which guarantee convenient access to the outdoor unit.

In combination with Daikin's wide access area to the outdoor unit, all key components can be easily reached and maintained!

Tested to ease your work!

Double win with Daikin

Validated data

The sound enclosure is extensively tested with all suitable outdoor units. We offer measured data for:

- › Sound power (heating/cooling) according to ISO 3744
- › Sound pressure (heating/cooling) at 1 m distance
- › Sound pressure for low noise operation
- › Sound enclosure insertion loss
- › All data delivered in octave band spectra and A-weighted sound level

Sound power levels – cooling and heating, according to ISO 3744

- > dB(A) = A-weighted sound power level (A scale according to IEC)
- > Reference acoustic intensity: 0 dB = 10^{-12} W

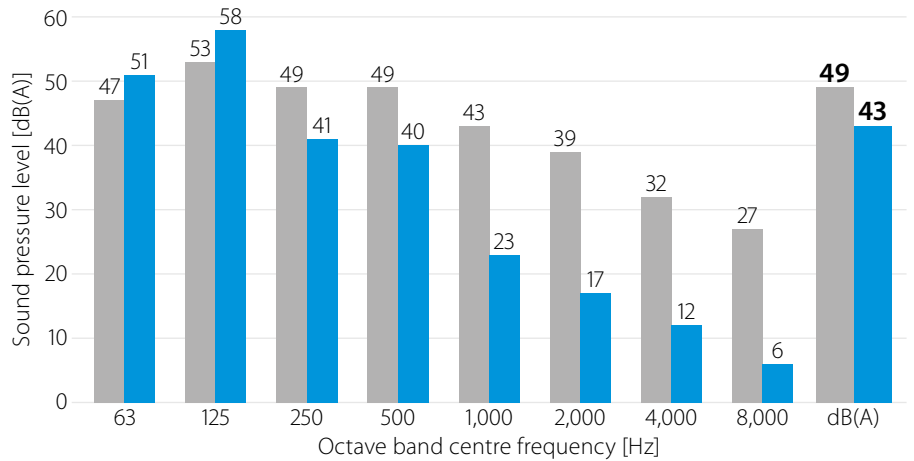

■ RZAG125N
■ RZAG125N + EKLN140A

Sound pressure levels – cooling and heating

- > Data is valid at free field condition
- > Data is valid at nominal operation conditions
- > dB(A) = A-weighted sound pressure level (A scale according to IEC)
- > Reference acoustic pressure 0 dB = 20 μ Pa
- > Microphone location at the discharge side; 1 m from the object; 1.5 m above the ground

■ RZAG125N
■ RZAG125N + EKLN140A

Sound pressure levels – low noise operation (level 3)

- > Data is valid at free field condition
- > Data is valid at nominal operation conditions
- > dB(A) = A-weighted sound pressure level (A scale according to IEC)
- > Reference acoustic pressure 0 dB = 20 μ Pa
- > Microphone location at the discharge side; 1 m from the object; 1.5 m above the ground

■ RZAG125N
■ RZAG125N + EKLN140A

Insertion loss values

- > Insertion loss measurement of standalone enclosure with calibrated sound source

■ Sound power level [dB(A)]
■ Reference sound source (RSS): B&K Type 4204 RSS

Benefits

- ✓ **Dedicated Daikin option for:**
 - › Sky Air Alpha-series
 - › Sky Air Advance-series
 - › VRV 5 S-series
- ✓ **Fully optimised and tested in Daikin factory**
 - › Guaranteed performance levels (sound, capacity, efficiency)
- ✓ **Outdoor unit sound reduction of up to -10 dB(A) on sound power levels**
 - › Enabling to meet local sound requirements
 - › Increased flexibility to apply outdoor units
 - › Reduces sound on the entire sound spectrum
- ✓ **Minimal capacity reduction**
 - › Separated air intake and discharge to prevent air flow short circuit
 - › No additional calculations needed thanks to factory tested data
- ✓ **Easy to integrate**
 - › Anthracite (RAL 7016), highly aesthetic finishing
 - › Mechanically designed to perfectly suit the Sky Air Alpha/Advance and VRV 5 S-series casings
 - › Self-supporting; can be installed on any flat surface
- ✓ **Fast & easy installation & servicing**
 - › 100 % weather resistant
 - › Easy opening to access most system components
- ✓ **Durable**
 - › 3 years warranty on all components
 - › Made of stainless steel with robust double layer powder coating, ensuring maximum corrosion resistance
