* If DRY is selected, the fan speed can be set to AUTO only.
To set the airflow direction

● **Vertical airflow direction adjustment (Swing operation/Louvre position)**

* Press the "START / STOP" button to set the air conditioner in the operation mode. Then, proceed with the following steps.

Press the "⇗/↻" button. The temperature indicator will change to the vertical airflow direction setting display.

* It returns to the original indication of temperature in 3 seconds after the operation is completed.

Press the "⇗/↻" button to change the vertical louvre position. The position number will appear on the display.

Press and hold the "⇗/↻" button for 2 seconds or more to set the swing operation ON or OFF.

The flashing display indicates that the swing operation is OFF.

● **Horizontal airflow direction adjustment (Swing operation/Louvre position)**

* Press the "START / STOP" button to set the air conditioner in the operation mode. Then, proceed with the following steps.

Press the "◁||▷/↺" button. The temperature indicator will change to the horizontal airflow direction setting display.

* It returns to the original indication of temperature in 3 seconds after the operation is completed.

Press the "◁||▷/↺" button to change the horizontal louvre position. The position number will appear on the display.

Press and hold the "◁||▷/↺" button for 2 seconds or more to set the swing operation ON or OFF.

The flashing display indicates that the swing operation is OFF.

OPERATION

ℹ NOTES

(1) • Always use the "⤴/↻" button or the "⥮/↻" button. Attempting to move the airflow direction louvre manually could result in improper operation; in this case, stop operation and restart.
The louvre should begin to operate properly again.
• During cooling operation, do not set the vertical airflow direction louvre in the downward position for an extended period. Water vapor may condense near the outlet port and drops of water may drip from the air conditioner.

(2) The SWING operation may stop temporarily when the air conditioner's fan is not operating, or when operating at very low speeds.

(3) The swing operation is not available depending on the model. Please refer to the operating manual for the indoor unit.

(6) Room temperatures as low as 10 to 15 °C cannot be set depending on the model. (Heating)

OPERATING TIPS

Cooling/heating priority (AIRSTAGE™ (V-II Series Heat Pump model only))

- If another indoor unit in the same system is already operating in the cooling mode or dry mode, heating mode settings cannot be performed.
- An indoor unit that is set up as an Administrative Indoor Unit can operate in the AUTO mode.
  Administrative Indoor Unit:
  Special indoor unit is not restricted by the switching of cooling and heating described above.

Setting restriction

When 🔒 is displayed there are functions for which settings cannot be made.
When a button is pushed to change a restricted setting, 🔒 will flash.
When 🔒 is displayed, some operation are restricted. In such case, contact the administrator.

State display

- When "o1" or "o2" is indicated on the temperature indicator, it means under maintenance.
- When "RF" is indicated on the temperature indicator, anti freeze function is activated. However, this function cannot be operated by the remote controller.
- When "▤" is blinking, contact the authorized service personnel.
- Mode display blinks when inoperative setting of indoor unit is made.

Automatic defrosting operation and oil recovery operation

During automatic defrosting operation and oil recovery operation, ❄/⏻ will be displayed on the remote controller.

Weekly timer

- Set different operating times for each day of the week.
- Set 1 or 2 operating spans (1 or 2 ON times and 1 or 2 OFF times) per day.
- Set time to a resolution of 30 minutes.
- OFF time can be carried over to the subsequent day.

Day off

- Use the "DAY OFF" setting to switch off timer operation for a selected day in the coming week.
- This is a temporary, one-time setting. The "DAY OFF" setting is automatically cleared as soon as the specified day passes.

Temperature SET BACK timer

Use this timer function to change the set temperature in the operation times set for each day of the week.
This can be used together with other timer settings.

TROUBLESHOOTING

Before requesting service, perform the following checks:

Symptom	Problem
Doesn't operate at all.	● Has there been a power failure? ● Has a fuse of indoor unit blown out, or a circuit breaker been tripped? ● Is the main power switch set to the OFF position?
	● It is being controlled centralized?

If the problem persists after performing these checks, or if you notice burning smells, or the operation indicator flashes, immediately stop operation, turn off the electrical breaker and consult authorized service personnel.
