1 Features

1 - 1 VAM-J8

Ventilation with heat recovery as standard

1

- › Wide range of units: air flow rate from 350 up to 2,000 m³/h
- › Shorter installation time thanks to easy adjustment of nominal air flow rate, so less need for dampers compared with traditional installations
- › Filter change indication based on actual filter contamination
- › Energy saving ventilation using indoor heating, cooling and moisture recovery
- › Ideal solution for shops, restaurants or offices requiring maximum floor space for furniture, decorations and fittings
- › Free cooling possible when outdoor temperature is below indoor temperature (eg. during nighttime)
- › Reduced energy consumption thanks to specially developed DC fan motor
- › Prevent energy losses from over-ventilation while improving indoor air quality with optional CO₂ sensor
- › Can be used as stand alone or integrated in the Sky Air or VRV system
- › Optional medium and fine dust filters ePM10 70% (M6), ePM1 55% (F7), ePM1 70% (F8) to meet customer request or legislation
- › Specially developed heat exchange element with High Efficiency Paper (HEP)
- › No drain piping needed
- › Can operate in over- and under pressure
- › Total fresh air solution with optional electrical heater

(1) Measured according to JIS B 8628 - 2003 |

(2) When the heat reclaim ventilation unit is installed upside down, the minimal allowed outdoor air temperature is 5°C. |

(3) In accordance with commission regulation (EU) No 1253/2014 |

(4) Measured according to EN308 : 1997 |

(5) Clean the filter when the filter icon appears on the controller screen. Regular filter cleaning is important for delivered air quality and for the unit's energy efficiency.

(6) In accordance with regulation (EU) No 327/2011 |

(7) Voltage range: units are suitable for use on electrical systems where voltage supplied to unit terminal is not below or above listed range limits. |

(8) MCA= 1,25x(FLA(FM1)+FLA(FM2)+FLA(FM3)+FLA(FM4)) |

(9) MCA represents maximum input current. |

(10) MFA ≤ 4 x (FLA(FM1)+FLA(FM2)+...) |

(11) Select wire size based on the value of MCA |

(12) Fan step 8 is nominal specs. |

(13) The unit complies for "Code du travail" and "ERP 5e catégorie" applications according to French legislation. |

(14) "Code du travail" applications are non-public buildings (example offices). |

(15) "ERP (Etablissement Recevant du Public) de 5e catégorie" are smaller shops, hotels etc

NOTES to go through before starting the unit

1. Symbols:

-  : Earth wiring
-  : Wire number 15
-  : Field wire
-  : Field cable
-  : Connection ** continues on page 12 column 2
-  : Several wiring possibilities
-  : Option
-  : Wiring depending on model
-  : Not mounted in switch box
-  : PCB

2. In case you use the central remote control, connect it to the unit in accordance with the attached manual.
3. When connecting the input wires from outside, fresh-up or on/off control operation can be selected. (Contact with a minimum applicable load of 12 DC, 1mA)
4. For details of connection see the attached manual of the option kit.
5. SS1 has already been set to 'NOR.' at the factoryset. The unit will not run if the setting is changed.

Caution when performing service inside the EL. Compo. box

WARNING

- Do not open the EL.Compo. box cover for 10 minutes after the power supply is turned off.
- After opening the EL. Compo. box, measure (on A1P~A3P) the points shown at the right with a tester and confirm that the voltage of the capacitor in the main circuit is less than DC50V.

Caution for ELECTRIC SHOCK

A1P	Printed circuit board (main)
A2P	Printed circuit board assy (fan)
A3P	Printed circuit board assy (fan)
C7	Capacitor (M1F)
F1U	Fuse T, 6.3A, 250V (A1P)
F3U	Fuse T 6.3A, 250V (A2P, A3P)
HAP	Pilot lamp (service monitor-green)
K1R	Magnetic relay
K2R	Magnetic relay
L1R	Reactor
L2R	Reactor
M1F	Motor (exhaust air fan)
M2F	Motor (supply air fan)
M1D	Motor (damper)
PS	Switching power supply
Q1DI	Field earth leak detector (max. 300mA)
R1T	Thermistor (indoor air)
R2T	Thermistor (outdoor air)
R3T	Thermistor (PTC)
S1C	Limit switch damper motor
X1M	Terminal (A1P)
X2M	Terminal (outside input) (A1P)
X3M	Terminal (power supply)
V1R	Diode bridge
Z1F	Noise filter
Z2C	Noise filter (ferrit core)
Remote controller	
SS1	Selector switch
	Connector for option (see note 3)
X14A	Connector (CO ₂ sensor)
X24A	Connector (outside damper)
X33A	Connector (contact PCB)
X35A	Connector (appendices PCB)

NOTES

- In case you use the central remote controller, connect it to the unit in accordance with the attached manual.
- When connecting the input wires from outside, fresh-up or on/off control operation can be selected.
(Contact with a minimum applicable load of 12V DC, 1mA)
- For details of connection see the attached manual of the option kit.
- SS1(A1P) has already been set to "nor." At factory set. The unit will not run if the setting is changed.
- L: live, N: neutral, : field wiring.
- : terminal strip, : connector, : connection, : relay connector, : protective earth (screw), : noiseless earth

VAM350-2000

High efficiency filter / dust filter for VAM350-2000

1 Information for filter selection

1. Choose required airflow
2. Choose the filters
3. Add up all the pressure drops of the duct system on the installation site and the filters
[For filter characteristics, refer to D-drawings]
4. Compare this with the unit performance characteristics to see resulting airflow & ESP

Download the VAM selection software on the Daikin extranet for easy selection

1 - 1 Choose required airflow

Choose the required airflow based upon the application/information

1 - 2 Choose the filters

Depending on the application prefilters and/or dust filters will be needed.

Filter requirements according to EN779: 2012

Table: Recommended dust filter classes per filter section (definition of filter classes according to EN 779)

Outdoor Air Quality	Indoor Air Quality			
	IDA 1 (High)	IDA 2 (Medium)	IDA 3 (Moderate)	IDA 4 (Low)
ODA 1 (pure air)	N/A	ePM ₁ 70% (F8)	ePM ₁ 50% (F7)	ePM ₁₀ 75% (M5)
ODA 2 (dust)	N/A	ePM ₁₀ 70% (M6) + ePM ₁ 70% (F8)	ePM ₁₀ 75% (M5) + ePM ₁ 50% (F7)	ePM ₁₀ 75% (M5) + ePM ₁₀ 70% (M6)
ODA 3 (very high concentrations of dust of gases)	N/A	N/A	ePM ₁₀ 75% (M5) + ePM ₁ 50% (F7)	ePM ₁₀ 75% (M5) + ePM ₁₀ 70% (M6)

*) GF = Gas filter (carbon filter) and/or chemical filter

Outdoor air Quality:

- ODA 1 - Pure air
- ODA 2 - High concentration particles air
- ODA 3 - High concentration gas pollution
- ODA 4 - High concentration gas pollution and particles
- ODA 5 - Very high concentration gas pollution and particles

Indoor air Quality:

- IDA 1 - Optimum quality air (hospitals, laboratories, nursery)
- IDA 2 - Good quality air (offices, residences, museum,...)
- IDA 3 - Medium quality air (commercial buildings, cinema, theatre, room hotels, restaurants, bars, gym, computer room)

On the image below it is indicated where the standard prefilters and optional dust filters are installed. If 2 optional dust filters are used, the second one replaces the standard filter.

NOTES

Prefilters are factory mounted, ePM₁₀ 70% (M6), ePL₁ 55% (F7) and ePM₁ 70% (F8) dust filters are options

11 Installation

11 - 2 Filter Installation Method

VAM350-2000

1 - 3 Add up all the pressure drops of the duct system on the installation site and the filters
[For filter characteristics, refer to D-drawings]

unit	airflow (m³/h)	filter pressure drop		
		ePM10 70% (M6)	ePM1 55% (F7)	ePM1 70% (F8)
VAM350	350	39	52	88
VAM500	500	65	87	148
VAM650	650	61	83	140
VAM800	800	89	121	206
VAM1000	1000	80	109	185
VAM1500	1500	79	106	181
VAM2000	2000	80	109	185

NOTES

1. Table shows values at nominal level, refer to drawings for detailed information
2. Filters according to EN779:2012
3. For more information refer to VAM installation, operation manual or filter manual

To adjust static pressure after filter placement:

Setting mode	Setting switch No.	Description of setting
19 (29)	2	SA fan speed setting
	3	EA fan speed setting
